Persian Grammar Eisenbrauns

Die vorliegende Studie ist die erste umfassende Analyse der Verbergänzungen und zusammengesetzten Verben im Persischen auf der Grundlage einer der erfolgreichsten linguistischen Theorien, die sich auch in der Praxis bewahrt hat: der Valenztheorie. Dass die in der linguistischen Forschung zum Persischen vorherrschenden Begriffe "transitiv/intransitiv" die Vielfalt der Verbergänzungen kaum erfassen, ist

eine der wesentlichen Ergebnisse dieser Untersuchung. Zusammengesetzte Verben, die im persischen Verbsystem eine dominante Rolle spielen, werden hinsichtlich ihrer Syntax und Semantik neu beleuchtet und aus valenztheoretischer Sicht analysiert. Der praxisorientierte Aufbau, Verblisten und zahlreiche Beispiele lassen das Buch nicht nur zu einer Grundlage für weitere valenztheoretische Analysen werden, sondern schaffen auch einen Rahmen für den Unterricht des Persischen als Fremdsprache.

Verbergänzungen und zusammengesetzte Verben im Persischen Routledge

In 1997, Eisenbrauns published the highly-regarded two-volume Phonologies of Asia and Africa, edited by Alan Kaye with the assistance of Peter T. Daniels, and the book rapidly became the standard reference for the phonologies of the Afro-Asiatic languages. Now the concept has been extended, and Kaye has assembled nearly 50 scholars to write essays on the morphologies of the same language group. The coverage is complete, copious, and again will likely become the standard work in the field. Contributors are an international Who's Who of Afro-Asiatic linguistics, from Appleyard to Leslau to Voigt. It is with great sadness that we report the death of Alan Kaye on May 31, 2007, while these volumes were in the final stages of preparation for the press. Alan was

diagnosed with bone cancer on May 1 while on research leave in the United Arab Emirates and was brought home to Fullerton by his son on May 22.

This volume explores the economies of countries in Asia, as well as the former Soviet socialist bloc countries of Central Asia and the Balkans. It analyses the region from the perspective of

globalization and regional economic integration, economic growth and sustainable development, international trade and finance, money market and banking systems, labor market and external migration, energy and agricultural sectors. This book will appeal to anyone who is interested in economies of this region, their transition process towards a market economy regime, and their integration in the global world, including academicians from any field of social sciences, as well as decision makers, politicians, businessmen and journalists.

Marxism and Other Western Fallacies

John Benjamins Publishing Company

This monograph presents a morpho-syntactic investigation on modality, aspect, and negation by concentrating

on Persian, and is designed to contribute to theoretical linguistics and the study of Iranian languages. The analysis is based on the Minimalist program. This research challenges the idea that the syntactic structure maps on the semantic interpretation or vice versa. The discussion presented in this monograph shows that the syntactic structure of Persian modals is uniform no matter if the modals are interpreted as having root or epistemic readings. Although it is claimed that modals are raising constructions in different languages, modals in Persian, which does not have subject-raising constructions, show a different syntactic behavior.

Furthermore, the structural analysis of the interaction of Persian modals and negation shows that because of the

scope interaction of negation and modals, the syntactic structure of modals with respect to negation mostly corresponds to the semantic interpretation of modals.

Modality, Aspect and Negation in Persian

Oneworld Publications

This monograph is about the chains of verbs commonly found in Creole Languages, West African languages, in particular the Kwa sub-group of Niger-Congo, Chinese and certain other languages and have acquired the name of 'serial verbs' in the literature. As a case study, the serial constructions of Sranan, a creole language of Surinam with an English lexical base, are examined in detail.

Dari Grammar and Phrasebook is the result of many years of research and teaching. It has two parts. Part one (grammar) is a systematic presentation of Dari sound system (phonology, word

formation (morphology) and sentence structure (syntax). Each chapter begins with an introduction. This is followed by analysis of the new concepts providing plenty of examples and illustrations. Next comes the chapter summary. Each chapter in part one ends with exercises. Part two (phrasebook) is about how to communicate with Afghans on a variety of situations (topics). This part first discusses language functions such as asking, ordering, requesting, apologizing, persuading, and so on. The second part is about topics or situations involving shopping, health, transportation, security, government and so on. The relevant vocabulary under each topic is listed into nouns, verbs and adjectives. The topics also include cross-cultural notes and proverbs.

The series is a platform for contributions of all kinds to this rapidly developing field. General problems are studied from the perspective of individual languages, language families, language groups, or language samples. Conclusions are the result of a deepened study of empirical data. Special emphasis is given to little-known languages, whose analysis may shed new light on long-standing

problems in general linguistics.

The Syntax of Serial Verbs Routledge

A country marked by controversy, Iran's

social, cultural and political dynamics

are too often reduced to a few

misleading clichés. Islamism is widely

considered to shape all social relations in

Iranian society and, while Iranian society

is indeed Islamic, this term's multiple

meanings in everyday life and practices

go far beyond the naïve and monolithic

idea we are used to. The Thousand and

One Borders of Iran analyses travel as a

social practice, exploring how diasporas,

margins and so-called peripheries are

central in the construction of a national

identity and thus revealing the

complexities of Iranian history and

society. Written by a leading

anthropologist, it draws upon fieldwork

carried out in Iran and Iranian migrant communities across Dubai, Tokyo and Los Angeles from 1998 to 2015. While casting new perspectives on the place of transnational relations in an increasingly globalized world, this work also sheds new light on the evolution of Iranian society, countering the explanation furnished by nationalist ideology that has been reproduced by the Islamic Republic itself. Its unique approach to the analysis of Iranian society through the theme of travel and borders considers the links and even the quarrels between the centre of Iranian society and the periphery, and the foreign elements that have contributed to society's development. Travel is key to these interactions and, following the travels of merchants and workers,

students or the faithful, elected officials and experts, or exiles and refugees, this book offers an anthropological study of travel that re-thinks Iranian history and national identity. This book would be of interest to students and scholars of Iranian Studies, Middle Eastern Studies and Anthropology.

A Concise Pahlavi Dictionary Uppsala Universitet

This volume brings together selected papers from the first North American Conference in Iranian Linguistics, which was organized by the linguistics department at Stony Brook University. Papers were selected to illustrate the range of frameworks, diverse areas of research and how the boundaries of linguistic analysis of Iranian languages have expanded over the years. The contributions collected in this volume address advancing research and complex methodological explorations in a broad range of topics in Persian syntax, morphology, phonology, semantics, typology and classification,

as well as historical linguistics. Some of the papers also investigate less-studied and endangered Iranian languages such as Tat, Gilaki and Mazandarani, Sorani and Kurmanji Kurdish, and Zazaki. The volume will be of value to scholars in theoretical frameworks as well as those with typological and diachronic perspectives, and in particular to those working in Iranian linguistics.

It uses the official reformed spelling, and gives attention to handwriting, educated standard and educated colloquial pronunciation, and the important polite forms. The grammar is explained with copious examples, all shown both in Persian script and in Roman transliteration. The grammatical themes are grouped logically, and there are cross-references, appendices and a

subject index to facilitate the search for the right form.
