**Drug War** W.  
W. Norton  
Carefully  
documenting  
the deceptions  
and excesses  
of television  
news  
coverage of  
the so-called  
cocaine  
epidemic,  
Cracked

Coverage  
stands as a  
bold  
indictment of  
the backlash  
politics of the  
Reagan  
coalition and  
its implicit  
racism, the  
mercenary  
outlook of the  
drug control  
establishment,  
and the  
enterprising  
reporting of  
crusading  
journalism.

Blending  
theoretical  
and empirical  
analyses,  
Jimmie L.  
Reeves and  
Richard  
Campbell  
explore how  
TV news not  
only interprets  
"reality" in  
ways that  
reflect  
prevailing  
ideologies, but  
is in many  
respects  
responsible for

constructing that reality. Their examination of the complexity of television and its role in American social, cultural, and political conflict is focused specifically on the ways in which American television during the Reagan years helped stage and legitimate the "war on drugs," one of the great moral panics of the postwar era. The authors persuasively argue, for

example, that powder cocaine in the early Reagan years was understood and treated very differently on television and by the state than was crack cocaine, which was discovered by the news media in late 1985. In their critical analysis of 270 news stories broadcast between 1981 and 1988, Reeves and Campbell demonstrate a disturbing disparity between the earlier

presentation of the middle- and upper-class "white" drug offender, for whom therapeutic recovery was an available option, and the subsequent news treatment of the inner-city "black" drug delinquent, often described as beyond rehabilitation and subject only to intensified strategies of law and order. Enlivened by provocative discussions of Nancy Reagan's antidrug

activism, the dramatic death of basketball star Len Bias, and the myth of the crack baby, the book argues that Reagan's war on drugs was at heart a political spectacle that advanced the reactionary agenda of the New and Religious Right--an agenda that dismissed social problems grounded in economic devastation as individual moral problems that could simply be remedied

by just saying "no." Wide ranging and authoritative, Cracked Coverage: Television News, the Anti-Cocaine Crusade, and the Reagan Legacy is a truly interdisciplinary work that will attract readers across the humanities and social sciences in addition to students, scholars, journalists, and policy makers interested in the media and drug-related issues. One of the New York Times's Best Books of the 21st Century Named one of the most important nonfiction books of the 21st century by Entertainment Weekly, Slate, Chronicle of Higher Education, Literary Hub, Book Riot, and Zora A tenth-anniversary edition of the iconic bestseller—"one of the most influential books of the past 20 years," according to the Chronicle of Higher

Education—with a new preface by the author "It is in no small part thanks to Alexander's account that civil rights organizations such as Black Lives Matter have focused so much of their energy on the criminal justice system."  
—Adam Shatz, London Review of Books  
Seldom does a book have the impact of Michelle Alexander's *The New Jim Crow*. Since it was first published in

2010, it has been cited in judicial decisions and has been adopted in campus-wide and community-wide reads; it helped inspire the creation of the Marshall Project and the new \$100 million Art for Justice Fund; it has been the winner of numerous prizes, including the prestigious NAACP Image Award; and it has spent nearly 250 weeks on the New York Times bestseller list. Most

important of all, it has spawned a whole generation of criminal justice reform activists and organizations motivated by Michelle Alexander's unforgettable argument that "we have not ended racial caste in America; we have merely redesigned it." As the Birmingham News proclaimed, it is "undoubtedly the most important book published in this century about the

U.S." Now, ten years after it was first published, The New Press is proud to issue a tenth-anniversary edition with a new preface by Michelle Alexander that discusses the impact the book has had and the state of the criminal justice reform movement today.

**Pediatric Neuro-Ophthalmology** Routledge Major Motion Picture based on Dark Alliance and starring Jeremy Renner, "Kill the

Messenger," to be released in Fall 2014 In August 1996, Pulitzer Prize-winning journalist Gary Webb stunned the world with a series of articles in the San Jose Mercury News reporting the results of his year-long investigation into the roots of the crack cocaine epidemic in America, specifically in Los Angeles. The series, titled "Dark Alliance," revealed that for the better part of a decade, a Bay

Area drug ring sold tons of cocaine to Los Angeles street gangs and funneled millions in drug profits to the CIA-backed Nicaraguan Contras. Gary Webb pushed his investigation even further in his book, *Dark Alliance: The CIA, The Contras, and the Crack Cocaine Explosion*. Drawing from then newly declassified documents, undercover DEA audio and videotapes that had never been publicly

released, federal court testimony, and interviews, Webb demonstrates how our government knowingly allowed massive amounts of drugs and money to change hands at the expense of our communities. Webb's own stranger-than-fiction experience is also woven into the book. His excoriation by the media—not because of any

wrongdoing on his part, but by an insidious process of innuendo and suggestion that in effect blamed Webb for the implications of the story—had been all but predicted. Webb was warned off doing a CIA expose by a former Associated Press journalist who lost his job when, years before, he had stumbled onto the germ of the "Dark Alliance" story. And though Internal

investigations by both the CIA and the Justice Department eventually vindicated Webb, he had by then been pushed out of the Mercury News and gone to work for the California State Legislature Task Force on Government Oversight. He died in 2004.

**Corruptions of Empire**  
Simon and Schuster  
A chilling survey of the American landscape. Investigative journalist Jeffrey St Clair

guides readers through the environmental wreckage of North America, from the plutonium-contaminated fields of the Hanford Nuclear Reservation to Indian Point Energy Center, the world's most dangerous nuclear plant. St Clair also delivers a forthright critique of the appropriation and disempowerment of the mainstream environmental movement, finding rejuvenated

life, hope and inspiration in grassroots campaigners who are still driven by a desire for social justice.

Pediatric Neuroophthalmology details the diagnostic criteria, current concepts of pathogenesis, neuroradiological correlates, and clinical management of a large group of neuroophthalmic disorders that present in childhood. Surprisingly distinct from neuroophthal

mic disorders afflicting adults, this set of diseases falls between the cracks of most ophthalmology training, and thus, warrants a practical, clinical guide for the practitioner in ophthalmology - the neuroophthalmologist, pediatric ophthalmologist, general ophthalmologist - as well as neurologists and for residents. The authors, leading pediatric ophthalmologists, have taken this

difficult subject matter and developed an accessible, user-friendly manual with a detailed approach to the recognition, differential diagnosis, and management of pediatric neuroophthalmologic disorders. *The Shadow Catcher* Createspace Independent Publishing Platform For all who dare look, this timely book shows how voting for the lesser evil candidate still leaves the American

Science & Business Media Follow-up to the New York Times bestseller *Spy Secrets That Can Save Your Life*--revealing high-stakes techniques and survival secrets from real intelligence officers in life-or-death situations around the world. Everyone loves a good spy story, but most of the ones we hear are fictional. That's because the most dangerous and important

spycraft is done in secret, often hidden in plain sight. In this powerful new book, bestselling author and former CIA officer Jason Hanson takes the reader deep inside the world of espionage, revealing true stories and expert tactics from real agents engaged in life-threatening missions around the world. With breathtaking accounts of spy missions in Eastern Europe, the

Middle East, Asia, and elsewhere, the book reveals how to: \* Achieve mental sharpness to be ready for anything \* Escape if taken hostage \* Set up a perfect safe site \* Assume a fake identity \* Master the "Weapons of Mass Influence" to recruit others, build rapport, and make allies when you need them most With real-life spy drama that reads like a novel paired with expert practical

techniques, Survive Like a Spy will keep you on the edge of your seat – and help you stay safe when you need it most. *Whiteout* Penguin The political and human carnage of the wars in Iraq, Afghanistan, and Yugoslavia are chronicled in this book, featuring entries from the authors, former marines, historians, a psychologist, an economist, a human rights lawyer, and former CIA analysts.

*Born Under a Bad Sky* Penguin PBS television commentator and syndicated radio talk-show host Tony Brown has been called an "out-of-the-box thinker" and, less delicately, and "equal opportunity ass kicker." Those who attempt to pigeonhole him do so at their own peril. This journalist, media commentator, self-help advocate, entrepreneur, public speaker, film

director, and author is a hard man to pin a label on -- and an even more difficult man to fool. In *Black Lies, White Lies*, Tony Brown does what few high-profile African Americans have done before: He dares to challenge the lies of both Black and White leaders, and he dares to tell the truth. He attacks White racism and Black self-victimization with equal vehemence. He condemns integration as

a disastrous policy, not for just Blacks but for the entire country. And he confronts the Black Talented Tenth, White liberals, conservatives, Democrats, Republicans, demagogues, and racists on all sides for their self-serving lies, their failures, and their lack of vision. But Tony Brown does not simply slash and burn. He also offers farsighted, workable solutions to America's problems. He provides a

blueprint for American renewal based on his belief that although we may not have come to this country on the same ship, we are all now in the same boat. Grand Theft Pentagon AK Press War and Drugs explores the relationship between military incursions and substance use and abuse throughout history. For centuries, drugs have been used to weaken enemies, stimulate

troops to fight, and quell post-war trauma. They have also served as a source of funding for clandestine military and paramilitary activity. In addition to offering detailed geopolitical perspectives, this book explores the intergenerational trauma that follows military conflict and the rising tide of substance abuse among veterans, especially from the Vietnam and Iraq-Afghan

eras. Addiction specialist Bergen-Cico raises important questions about the past and challenges us to consider new approaches in the future to this longest of US wars. *Whiteout* Pluto Press

This book explores the increasingly broad terrain of drugs in American society with an emphasis on politics. It begins with the War on Drugs initiated by President Richard Nixon

in the early 1970s and extends to the current day with the vast power of the pharmaceutical industry (Big Pharma), expansion of global criminal syndicates, militarization of the drug war, and struggles between states and federal government over the legalization of marijuana. From the beginning, the drug war produced increasing authoritarian tendencies in American politics, visible

not only in swollen national bureaucracies and burgeoning police functions, but in the rise of the largest prison-industrial complex in the world, a surveillance state, and the weakening of personal privacy and freedoms. At the same time, the legal drug system with some of the most profitable business operations anywhere has expanded to create a huge medical

edifice, affecting the delivery of health care, development of modern psychology, evolution of the treatment industry, and many other areas of contemporary life, including the world of sports and recreation. Although prohibitionism remains very much alive, targeting a wide range of illicit drugs, today it is the hundreds of widely-marketed chemical substances sold by Big Pharma that

result in some of the most serious health problems affecting society. This book explores the long historical trajectory of both the War on Drugs and the growth of Big Pharma, focusing on social outcomes and political consequences in the US and beyond. *Spooked* Harper Collins In this new edition of a cult classic, Henrik Krüger and Jerry Meldon have added new material and provided

updates of the investigations Danish investigative author Henrik Krüger set out to write a book about Christian David, a French criminal with a colorful past, and wound up writing a book—originally published in 1980—that spans all continents and names names all the way up to Richard Nixon. The Nixon administration and CIA wanted to eliminate the old French Connection and replace it

with heroin from the Golden Triangle, partly in order to help finance operations in Southeast Asia. The book delves into the relationships between French and U.S. intelligence services and organized crime probing into the netherworld of narcotics, espionage, and international terrorism. It uncovers the alliances between the Mafia, right-wing

extremists, neo-fascist OAS and SAC veterans in France, and Miami-based Cuban exiles. It lifts the veil on the global networks of parafascist terrorists who so frequently plot and murder with impunity, thanks to their relationships and services to the intelligence agencies of the so-called "free world." In short, this updated edition tells a story which our own media have systematically failed to tell.

Routledge  
In this gritty exposé, a firsthand look inside U.S. undercover operations targeting the immigrant smuggling, counterfeiting, and drug rings of Mexico's dangerous mafia. Living under an assumed identity and risking his life were all in a day's work for U.S. Government Agent Hipolito Acosta. He worked regularly in high-stakes undercover operations infiltrating

Mexico's most murderous immigrant smuggling rings and drug cartels. Acosta's investigations are legendary, both inside law enforcement and the crime cartels he helped neutralize. He had himself smuggled from Mexico to Chicago with a truckload of poor immigrants; worked his way into the confidences of a gang of international counterfeiters; socialized with some of

Mexico's most vicious drug lords; arrested a female smuggler by luring her across the U.S. border for an amorous rendezvous; and was the target of multiple murder plots by the criminals he put in jail. For three decades, Hipolito Acosta's work routinely made national headlines, and he quickly gained a reputation as a daring crime fighter who used his intelligence and audacity

to stay one step ahead of those who would kill him if his cover were ever blown. Acosta's stories read like chapters from a page-turning crime novel, but *The Shadow Catcher* is more than a front-seat ride through the criminal underworld along the U.S./Mexico border. This heartbreaking exposé goes beyond sensational headlines and medals of honor to divulge what an agent

endures in order to ensure that U.S. law is enforced and to reveal the unseen human side of illegal immigration.

The author critically examines the assumptions underlying drug prohibition and explores the contradictions of drug prevention policies. *Bernie and the*

*Sandernistas* Naval Institute Press In early August 1974, despite incredible risks and after six years of secret preparations, the CIA attempted to salvage the sunken Soviet ballistic missile submarine K-129 from the depths of the North Pacific Ocean. The audacious effort was undertaken with the cover of an undersea mining operation sponsored by eccentric

billionaire Howard Hughes. “Azorian”—incorrectly identified as Project Jennifer by the press—was the most ambitious ocean engineering endeavor attempted by man. Following the accidental sinking of a Soviet missile submarine in March 1968, U.S. intelligence agencies were able to determine the precise location and to develop a means of raising the

submarine from a depth of 16,400 feet. The remarkable salvage effort of the K-129, which contained nuclear-armed torpedoes and one nuclear tipped missile as well as crypto equipment, was conducted with Soviet naval ships a few hundred yards from the lift ship, the Hughes Glomar Explorer. The book is based, in part, on the research for Michael White’s documentary film *Azorian*:

The Raising of the K-129, released in late 2009. The research for the book and the documentary forced the CIA to issue a brief report on Project Azorian in early 2010, with one-third of the document redacted.
