This international encyclopedia documents and surveys, for the first time, the entire complex of translation as well as the operations and phenomena associated with it. Structured along systematic, historical and geographic lines, it offers a comprehensive and critical account of the current state of knowledge and of international research. The Encyclopedia (1) offers an overview of the different types and branches of translation studies; (2) covers translation phenomena - including

the entire range of interlingual, intralingual, and intersemiotic transfer and transformation - in their social, material, linguistic, intellectual, and cultural diversity from diachronic, synchronic, and systematic perspectives, (3) documents and elucidates the most important results of the study of translation to the present day, as well as the current debates, taking into account theoretical assumptions and methodological implications; (4) identifies, where possible, lacunae in existing research, listing priorities and desiderata for further research. The languages of publication are German, English, and French
Cubism and the Trompe l'Oeil Tradition Martinus Nijhoff Publishers

The age-old tradition of pictorial illusionism known as trompe l'oeil ("deceive the eye") employs visual tricks that confound the viewer's perception of reality and fiction, truth and falsehood. This radically new take on Cubism shows how Pablo Picasso, Georges Braque, and Juan Gris both parodied and paid homage to classic trompe l'oeil themes and motifs. The authors connect Cubist works to trompe l'oeil specialists of earlier centuries by juxtaposing more than one hundred Cubist paintings, drawings, and collages with related compositions by old masters. The informed and engaging texts trace the changing status of trompe l'oeil over the centuries, reveal Braque's training in artisanal trompe l'oeil techniques as an integral part of his Cubist practice, examine the material used in Gris's collages, and discuss the previously unstudied trompe l'oeil iconography within Cubist still lifes.
