The city of Edinburgh has always been innovative in its

provision of transport ranging from the end of the 19th century when it leased land for the creation of a cable tramway network through operating the same when the lease ended in June 1919 to the current era when it trials a range of vehicles as it seeks to achieve zero carbon emissions by 2030. The company's maintenance standards are sufficiently high that after 15 years of daily service withdrawn vehicles are valued by the second hand vehicle market and continue in further service with operators for a number of years before being scrapped. while 15 years is the normal working life with the company, this is being shortened as new vehicles are introduced to meet the

zero carbon commitment. These changes have increased between 2011 and 2022 and the book illustrates them by photographs of the transport fleets – both buses and trams – operated during that period of change. The operator tries to remain loyal to one supplier but changes within the industry have resulted in a number of different vehicles being purchased; the rationale of the change in supplier is documented as the company returns to previous suppliers. The local transport scene has also seen services disrupted as operators providing services from outside the city boundaries have discontinued services leading to the city

operator creating subsidiary companies to provide replacement services. These operate buses initially operated by the city fleet albeit adopting different livery styles that identify their relationship to the city’s transport network.

Lothian Buses Time Out Guides

The study of the law of tort is generally preoccupied by case law, while the fundamental impact of legislation is often overlooked. At a jurisprudential level there is an unspoken view that legislation is generally piecemeal and at best self-contained and specific; at worst dependent on the whim of political views at a particular time. With a different starting point, this volume seeks to test such notions, illustrating, among

other things, the widespread and lasting influence of legislation on the shape and principles of the law of tort; the variety of forms of legislation and the complex nature of political and policy concerns that may lie behind their enactment; the sometimes unexpected consequences of statutory reform; and the integration not only of statutory rules but also of legislative policy into the operation of tort law today. The apparently sharp distinction between judicially created private law principles, and democratically enacted legislative rules and policies, is therefore questioned, and it is argued that to describe the principles of the law of tort without

referring to statute is potentially highly misleading. This book shows that legislation is important not only because of the way it varies or replaces case law, but because it also deeply influences the intrinsic character of that law, providing some of its most familiar characteristics. The book provides the first extended interpretation of legislative intervention in the law of tort. Each of the chapters, by leading tort scholars, deals with an aspect of the influence of legislation on the law of tort. While the nature, sources and extent of legislative influence in personal injury law is an essential feature of the collection, other significant areas of tort law are explored,

including tort in the context of commercial law, labour law, regulation and the welfare state. Essays on the Compensation Act 2006 and Human Rights Act 1998 bring the current state of the interplay between tort, politics and legislation to the forefront. In all of these contexts, contributors explore the deeper lessons that can be learned about the nature of the law of tort and its changing role and functions over time.
