One of Literary Hub's Most Anticipated Books of 2022 A “brilliant London historian” (BBC Radio) tells the story of Britain as never before—through its abandoned villages and towns. Drowned. Buried by sand. Decimated by plague. Plunged off a cliff. This is the extraordinary tale of Britain’s eerie and remarkable ghost towns and villages; shadowlands that once hummed with life. Peering through the cracks of history, we find Dunwich, a medieval city plunged off a cliff by sea storms; the abandoned village of Wharram Percy, wiped out by the Black Death; the lost city of Trellech unearthed by moles in 2002; and a Norfolk village zombified by the military and turned into a Nazi, Soviet, and Afghan village for training. Matthew Green, a British historian and broadcaster, tells the

astonishing tales of the rise and demise of these places, animating the people who lived, worked, dreamed, and died there. Traveling across Britain to explore their haunting and often-beautiful remains, Green transports the reader to these lost towns and cities as they teeter on the brink of oblivion, vividly capturing the sounds of the sea clawing away row upon row of houses, the taste of medieval wine, or the sights of puffin hunting on the tallest cliffs in the country. We experience them in their prime, look on at their destruction, and revisit their lingering remains as they are mourned by evictees and reimagined by artists, writers, and mavericks. A stunning and original excavation of Britain’s untold history, *Shadowlands* gives us a truer sense of the progress and ravages of time, in a moment when many of our own settlements are threatened as never before.

Retirement is a time of opportunity. Without the routine demands of working life, new ambitions can be realized and experiences enjoyed. Yet with so much to consider, people are often unsure how best to plan for their future. Furthermore, with rising retirement ages, the closure of many final salary pension schemes, poor annuity rates and uncertainty regarding universal benefits, the scope for concern and confusion is even greater. *The Good Retirement Guide* is essential reading

for all those looking forward to making the most of their retirement, and offers clear and concise suggestions and advice on a broad range of retirement-related subjects, including finance (investments, pensions, annuities, benefits and tax), housing, health, holidays, starting a business and looking after elderly parents.

Much of the literature on ancient Egypt centers on pharaohs or on elite conceptions of the afterlife. This scintillating book examines how ordinary ancient Egyptians lived their lives. Drawing on the remarkably rich and detailed archaeological, iconographic, and textual evidence from some 450 years of the New Kingdom, as well as recent theoretical innovations from several fields, it reconstructs private and social life from birth to death. The result is a meaningful portrait composed of individual biographies, communities, and landscapes. Structured according to the

cycles of life, the book relies on categories that the ancient Egyptians themselves used to make sense of their lives. Lynn Meskell gracefully sifts the evidence to reveal Egyptian domestic arrangements, social and family dynamics, sexuality, emotional experience, and attitudes toward the cadences of human life. She discusses how the Egyptians of the New Kingdom constituted and experienced self, kinship, life stages, reproduction, and social organization. And she examines their creation of communities and the material conditions in which they lived. Also included is neglected information on the formation of locality and the construction of gender and sexual identity and new evidence from the mortuary record, including important new data on the burial of children. Throughout, Meskell is careful to highlight differences among ancient Egyptians--the ways, for instance, that ethnicity, marital status, age, gender, and occupation patterned their experiences. Readers will come away from this book with new insights on how life may have been experienced and conceived of by ancient Egyptians in all their variety. This makes *Private Life in New Kingdom Egypt* unique in Egyptology and fascinating to read.

The New York Times Book Review Editor's Choice The flâneur is the quintessentially masculine figure of privilege and leisure who strides the capitals of the world with abandon. But it is the flâneuse who captures the imagination of the cultural critic Lauren Elkin. In her wonderfully gender-bending new book, the flâneuse is a "determined, resourceful individual keenly attuned to the creative potential of the city and the liberating possibilities of a good walk." Virginia Woolf called it "street haunting"; Holly Golightly epitomized it in *Breakfast at Tiffany's*; and Patti Smith did it in her own inimitable style in 1970s New York. Part cultural meander, part memoir, Flâneuse takes us on a distinctly cosmopolitan jaunt that begins in New York, where Elkin grew up, and transports us to Paris via Venice, Tokyo, and London, all cities in which she's lived. We are shown the paths beaten by such flâneuses as the cross-dressing nineteenth-century novelist George Sand, the Parisian artist Sophie Calle, the wartime correspondent Martha Gellhorn, and the writer Jean Rhys. With tenacity and insight, Elkin creates a mosaic of what urban settings have meant to women, charting through literature, art, history, and film the sometimes exhilarating, sometimes fraught relationship that women have with the metropolis. Called "deliciously spiky and seditious" by The Guardian, Flâneuse will inspire you to light out for the great cities yourself.

John Nolen's *New Ideals in the Planning of Cities, Towns, and Villages* is the most thorough assessment of city planning written by an American practitioner before 1920. It records the interplay of urban reform in Europe and the United States, the rise of the planning expert, the design of new towns, and the technique for directing urban expansion on systematic lines. Most important, it documents the blueprint for investing the "peace dividend" of the Great War to make urban life "more fit for democracy". Written for men fighting to make the world safe for democracy, *New Ideals* revealed how the domestic part of the peace program could justify their sacrifice. The wartime housing initiative had improved the living conditions of industrial workers and the same public regulation and control of the layout and character of residential neighbourhoods could provide what "men of service expect to find on their return, a new and better type of workman's home." While *New Ideals* strained towards the utopian, experience tempered Nolen's expectations and the high aims of the book were not immediately realised in a post-war society seeking a return to pre-war normalcy. However in the last decade, Nolen's planned communities have been closely studied as the demand for pedestrian-oriented neighbourhoods set on sustainable lines has moved from novelty to policy. *New Ideals* is an important text not only for its design template, but also its aspirations. Nolen's call to "make cities that will serve the needs--physical, economic, and spiritual--of all people" lays at the heart of the city planning profession and the lessons Nolen imparted inform a new generation planning cities to be both resilient and just.

This second handbook offers all new content in which readers will find a thoughtful and measured interrogation of significant contemporary thinking and practice in urban education. Each chapter reflects contemporary cutting-edge issues in urban education as defined by their local context. One important theme that runs throughout this handbook is how urban is defined, and under what conditions the marginalized are served by the schools they attend. Schooling continues to hold a special place both as a means to achieve social mobility and as a mechanism for supporting the economy of nations. This second handbook focuses on factors such as social stratification, segmentation, segregation, racialization, urbanization, class formation and maintenance, and patriarchy. The central concern is to explore how equity plays out for those traditionally marginalized in urban schools in different locations around the globe. Researchers will find an analysis framework that will make the current practice and outcomes of urban education, and their alternatives, more transparent, and in turn this will lead to solutions that can help improve the life-options for students historically underserved by urban schools.

Urban Ecology London Walks

This collection brings together the latest thinking in urban geography. It provides a comprehensive overview of topical issues and draws on experiences from across the world. The turn of the 1960s-70s, characterized by the rapid acceleration of globalization, prompted a radical transformation in the perception of urban and natural environments. The urban revolution and related prospect of the total urbanisation of the planet, in concert with rapid population growth and resource exploitation, instigated a surge in environmental awareness and activism. One implication of this moment is a growing recognition of the integration and interconnection of natural and urban entities. The present collection is an interdisciplinary inquiry into the changing modes of representation of nature in the city beginning from the turn of the 1960s/70s. Bringing together a number of different disciplinary approaches, including architectural studies and aesthetics, heritage studies and economics, environmental science and communication, the collection reflects upon the changing perception of socio-natures in the context of increasing urban expansion and global interconnectedness as they are/were manifest in specific representations. Using cases studies from around the globe, the collection offers a historical and theoretical understanding of a paradigmatic shift whose material and symbolic legacies are still accompanying us in the early 21st century.

This book focuses upon the legacies sought by cities that host major sports events. It analyses how governments, the IOC and others define and measure 'legacy'. It also focuses upon the challenges and opportunities facing future host cities of mega-events and questions what the global shift in geographical location of mega-events means for sports development and the business of sport and what are the attractions for cities seeking to harness the hosting of a mega-event, and whether there may be longer term consequences for the bidding and hosting major sporting events.

Handbook of Urban Geography Random House

'Sustainable Urban Neighbourhood' explores the way that the UK's towns and cities are changing at the turn of the millennium. Previously known as 'Building the 21st Century Home', the second edition of this successful text describes the way that environmental and demographic change, economic pressures and the needs of community could change urban areas forever just as the garden city movement did a century ago. Some of the arguments that were so contentious ten years ago are now widely accepted. Others rumble on, particularly after another property crash that has hit urban apartments. The central point, however, remains; urban renaissance will not be achieved by coercion but by the creation of positive urban models. Through case studies, the book describes one such model, the Sustainable Urban Neighbourhood: mixed-use, mediumdensity urban development, designed to minimise resource use and maximise community. This classic text will be essential reading for urban designers, architects and planners, and anyone involved in the development of new homes and the regeneration of towns and cities. * Links social, environmental and economic factors with urban design for a fresh approach * Grounded in practical realities of development. Visionary, whilst also putting theory into practice * Provides a model for sustainable reform by showing how architects work with existing planning laws and environments to improve site plans
