This volume combines empirical research-based and theoretical perspectives on shame in cultural contexts and from socio-culturally different perspectives, providing new insights and a more comprehensive cultural base for contemporary research and practice in the context of shame. It examines shame from a positive psychology perspective, from the angle of defining the concept as a psychological and cultural construct, and with regard to practical perspectives on shame across cultures. The volume provides sound foundations for researchers and practitioners to develop new models, therapies and counseling practices to redefine and re-frame shame in a way that leads to strength,

resilience and empowerment of the individual.

Exploring dance from the rural villages of Africa to the stages of Lincoln Center, Judith Lynne Hanna shows that it is as human to dance as it is to learn, to build, or to fight. Dance is human thought and feeling expressed through the body: it is at once organized physical movement, language, and a system of rules appropriate in different social situations. Hanna offers a theory of dance, drawing on work in anthropology, semiotics, sociology, communications, folklore, political science, religion, and psychology as well as the visual and performing arts. A new preface provides commentary on recent developments in

dance research and an updated bibliography.

Authorship in film has been a persistent theme in the field of cinema studies. This volume of new work revitalizes the question of authorship by connecting it to larger issues of identity--in film, in the

marketplace, in society, in culture.

Essays range from the auteur theory and Casablanca to Oscar Micheaux, from the American avant-garde to community video, all illuminating how "authorship" is a complex idea with far-reaching implications. This ambitious and wide-ranging book will be essential reading for anyone concerned with film studies and the concept of the author.

play, *The Fifth Column and Four Stories of the Spanish Civil War* brilliantly evokes the tumultuous Spain of the 1930s. These works, which grew from Hemingway's adventures as a newspaper correspondent in and around besieged Madrid, movingly portray the effects of war on soldiers, civilians, and the correspondents sent to cover it.

This handbook provides practical tools and concepts forged from international best practice, and sharpened in the context of post-apartheid South Africa, that can be used to build critical diversity literate organizations.

Organizations the world over – from nonprofits to large corporations, and secondary schools to massive

intergovernmental institutions – increasingly tip into crisis as they fail to meet the challenges of diverse and complex societies. Their durability is tested by how they deal with difference, and whether they break out of dominant ways of thinking about culture, merit, and success. This book is thus designed to contribute to the ongoing conversation between the strategic imperatives of organizational leaders, and the day-management of diversity interventions by diversity practitioners and human resources specialists. The authors present the CDL model in an easily understandable and practically implementable format that is grounded as much in rigorous academic research as it is in thousands of hours of industry experience. Six prominent, active critical

diversity literacy practitioners offer concrete advice and insights into addressing racism, sexism, homophobia, ableism, and other oppressive dynamics. The text offers guidance on: · Analyzing what has changed in the local and global environment of the contemporary organization, and how to 'read' these challenges; · Identifying the warning signs of crisis, and addressing issues before they arise by building a responsive and flexible style of leadership; · Using the Critical Diversity Literacy framework to secure organizational alignment; · Theorizing how change happens within organizations; · Meeting and overcoming resistance from entrenched power interests; · Designing training and organizational development

interventions.

The authors in this volume address the questions 'What is empowerment?' Is it power over resources? Is it the ability to create 'effective demand'? Is it about the ability to make choices? Is it about access to resources and how they are controlled, politically, economically, by NGOs, by political parties, by the state? Do political parties facilitate or do they channel energies away from empowerment? They evaluate how in different circumstances different political agents have been seen as provider of

resources.

By the time he was killed in the jungles of Bolivia, where his body was displayed like a deposed Christ, Ernesto "Che" Guevara had become a synonym for revolution everywhere from Cuba to the barricades of Paris. This extraordinary biography peels aside the veil of the Guevara legend to reveal the charismatic, restless man behind it. Drawing on archival materials from three

continents and on interviews with Guevara's family and associates, Castaneda follows Che from his childhood in the Argentine middle class through the years of pilgrimage that turned him into a committed revolutionary. He examines Guevara's complex relationship with Fidel Castro, and analyzes the flaws of character that compelled him to leave Cuba and expend his energies, and ultimately his life, in quixotic adventures in the Congo and Bolivia. A masterpiece of scholarship, Companero is the definitive portrait of a figure who continues to fascinate and inspire the world over.

With the outbreak of the Korean War, the poor, rural West German state of Rhineland-Palatinate became home to

some of the largest American military installations outside the United States. In *GIs and Frauleins*, Maria Hohn offers a rich social history of this German-American encounter and provides new insights into how West Germans negotiated their transition from National Socialism to a consumer democracy during the 1950s. Focusing on the conservative reaction to the American military presence, Hohn shows that Germany's Christian Democrats, though eager to be allied politically and militarily with the United States, were appalled by the apparent Americanization of daily life and the decline in morality that accompanied the troops to the provinces. Conservatives condemned the jazz clubs and striptease parlors that Holocaust survivors from

Eastern Europe opened to cater to the troops, and they expressed scorn toward the German women who eagerly pursued white and black American GIs. While most Germans rejected the conservative effort to punish as prostitutes all women who associated with American GIs, they vilified the sexual relationships between African American men and German women. Hohn demonstrates that German anxieties over widespread Americanization were always debates about proper gender norms and racial boundaries, and that while the American military brought democracy with them to Germany, it also brought Jim Crow. *Race After Hitler* OECD Publishing Originally performed by its creators, this 1987 Edinburgh Fringe hit remains the

second longest-running West End comedy in history and has been translated into over thirty languages. The Complete Works of William Shakespeare (abridged) is not so much a play as it is a vaudeville show in which three charismatic, wildly ambitious actors attempt to present all thirty-seven of Shakespeare's plays in a single performance. They have a rudimentary concept of the stories and have imperfectly memorized a smattering of famous lines. Backstage there's a meager assortment of costumes and props. Thus armed, the three brazenly launch into their task with an earnest focus and breakneck enthusiasm.

Finally, the authors place at readers' disposal introductory training methods, necessary for all who wish to work responsibly in intercultural contexts. The book's "constructivist" approach affords the perception of new aspects and perspectives of German-African realities, and of the current

discussion on intercultural conflict-management.

In the current ever changing world – the liquid modernity – the most pressing psychological challenge to all of us is to create and maintain a personal balance between mental stability and mental flexibility. In *Transformative Learning and Identity* Knud Illeris, one of the leading thinkers on the way people learn, explores, updates and re-defines the concept and understanding of transformative learning while linking the concept of transformative learning to the concept of identity. He thoroughly discusses what transformative learning is or could be in a broader learning theoretical perspective, including various

concepts of learning by change, as opposed to learning by addition, and ends up with a new, short and distinct definition. He also explores and discusses the concept of identity and presents a general model depicting the complexity of identities today. Building on the work of Mezirow, various perspectives of transformative learning are analysed and discussed, including; transformative learning in different life ages; progressive and regressive transformations; motivation and identity defence; development of identity; personality and competence, and transformative learning in school, education, working life, and in relation to current and future life conditions. This vital new book by one of the leading learning theorists of our time will prove

of lasting interest to academics, teachers, instructors, leaders and researchers in the field of adult learning

and education. It will also appeal to many students and researchers of psychology and sociology in general.
