 John A. Van de Walle has written a book that helps readers make sense of mathematics and become confident in their ability to teach mathematics to children K to 8. Elementary and Middle School Mathematics consists of 16 chapters reflecting the view that all mathematics can be taught through a problem-solving approach that motivates children and builds their confidence as they learn. This book thoroughly discusses the new standards and clearly develops four key aspects of teaching mathematics: the nature of mathematics as a science of pattern and order; an understanding of how children learn mathematics; a problem solving view of teaching mathematics; and specific methods for integrating assessment with instruction. Simple yet effective classroom activities are woven throughout the chapters as well as suggestions for technology and literature.

 The 11th Edition of *Helping Children Learn Mathematics* is designed to help those who are or will be teachers of mathematics in elementary schools help children develop understanding and proficiency with mathematics so they can solve problems. This text is built around three main themes: helping children make sense of mathematics, incorporating practical experiences, and using research to guide teaching. It also integrates connections and implications from the Common Core Standards: Mathematics (CCSS-M).

 The world's urban population now exceeds the world's rural population. What does this mean for the state of our cities, given the strain this global demographic shift is placing upon current urban infrastructures? Following on from previous *State of the World's Cities* reports, this edition uses the framework of 'The Urban Divide' to analyse the complex social, political, economic and cultural dynamics of urban environments. In particular, the book focuses on the concept of the 'right to the city' and ways in which many urban dwellers are excluded from the advantages of city life, using the framework to explore links among poverty, inequality, slum formation and economic growth. The volume will be essential reading for all professionals and policymakers in the field, as well as a valuable resource for researchers and students in all aspects of urban development.  Teaching Literature-Based Instructional Units: From Planning to Assessment provides an accessible roadmap to planning,

designing, and implementing literature-based instructional units for the English Language arts (ELA) classroom. Understanding that unit plans are the building blocks of the ELA curriculum, Hansen and Vásquez outline the theoretical foundations and approaches behind teaching ELA and offer a framework to help readers make sound decisions about their content pedagogy. In so doing, this text offers research-based and straightforward guidance on planning instruction around key literary texts. Placing literature at the center of the ELA curriculum, the approaches in this book not only support students' reading, writing, listening, speaking, and digital media skills, but will also motivate and inspire them. Part 1 addresses how to choose unit themes and texts, discusses the importance of having a rationale for choices made, and examines the practical, philosophical, and historical approaches to teaching literature. Part 2 provides step-by-step instructions for designing literature-based units of instruction by using backwards design. The text focuses on assessment before moving into how to scaffold and sequence lessons to meet learning objectives, and concludes with consideration given to teaching ELA in virtual environments. The wealth of activities, strategies, exercises, examples, and templates in this book make this text essential reading for instructors and pre-service teachers in ELA pedagogical methods courses and for practicing teachers of literature instruction.

 Thoroughly revised and expanded for a new generation of readers, this classic guide to enjoying literature to its fullest—a lively, enlightening, and entertaining introduction to a diverse range of writing and literary devices that enrich these works, including symbols, themes, and contexts—teaches you how to make your everyday reading experience richer and more rewarding. While books can be enjoyed for their basic stories, there are often deeper literary meanings beneath the surface. *How to Read Literature Like a Professor* helps us to discover those hidden truths by looking at literature with the practiced analytical eye—and the literary codes—of a college professor. What does it mean when a protagonist is traveling along a dusty road? When he hands a drink to his companion? When he's drenched in a sudden rain shower? Thomas C. Foster provides answers to these questions as he explores every aspect of fiction, from major themes to literary models, narrative devices, and form. Offering a broad overview of literature—a world where a road leads to a quest, a shared meal may signify a communion, and rain, whether cleansing or destructive, is never just a shower—he shows us how to make our reading experience more intellectually satisfying and fun. The world, and curricula, have changed. This third edition has been thoroughly revised to reflect those changes, and features new chapters, a new preface and epilogue, as well as fresh

teaching points Foster has developed over the past decade. Foster updates the books he discusses to include more diverse, inclusive, and modern works, such as Angie Thomas's *The Hate U Give*; Emily St. John Mandel's *Station Eleven*; Neil Gaiman's *Neverwhere*; Elizabeth Acevedo's *The Poet X*; Helen Oyeyemi's *Mr. Fox and Boy*; Snow, Bird; Sandra Cisneros's *The House on Mango Street*; Zora Neale Hurston's *Their Eyes Were Watching God*; Maggie O'Farrell's *Hamnet*; Madeline Miller's *Circe*; Pat Barker's *The Silence of the Girls*; and Tahereh Mafi's *A Very Large Expanse of Sea*.

 Karl Polanyi's "substantivist" critique of market society has found new popularity in the era of neoliberal globalization. The author reclaims this polymath for contemporary anthropology, especially economic anthropology, in the context of Central Europe, where Polanyi (1886-1964) grew up. The Polanyian approach illuminates both the communist era, in particular the "market socialist" economy which evolved under János Kádár in Hungary, as well as the post-communist transformations of property relations, civil society and ethno-national identities throughout the region. Hann's analyses are based primarily on his own ethnographic investigations in Hungary and South-East Poland. They are pertinent to the rise of neo-nationalism in those countries, which is theorized as a malign countermovement to the domination of the market. At another level, Hann's adaptation of Polanyi's social philosophy points beyond current political turbulence to an original concept of "social Eurasia".

 Written as a narrative short story, CallyRae shares her candid insights as she journeys through surviving with autoimmune diseases. Suffering from chronic daily pain, infections, and extreme fatigue, her outlook was one of frustration and hopelessness. As her life journey down the autoimmune highway took twists and turns, she learned to read the signs and listen to her body, mind, and spirit. She continues on the journey but has replaced pain with vitality, infections with health, and extreme fatigue with immense energy. Her outlook is now one of hope and happiness, and she considers herself blessed to live with the autoimmune diseases of rheumatoid arthritis, systemic lupus erythematosus, and oral lichen planus. She no longer suffers and survives but rather thrives and shares hope and inspiration to those who are looking for a better healthier way to live.

Focuses on "the public policy and financial implications of having two different sets of security standards for leasehold acquisitions undertaken by the General Services Administration in urban and suburban-based space procurements. To determine the appropriate security countermeasures to employ in a given space lease procurement, GSA and its civilian client agencies follow a standard promulgated by the Interagency Security Committee (ISC) ... To determine the appropriate security countermeasures to employ in a given space lease procurement for any Department of Defense (DOD) space requirement, GSA adheres to a standard promulgated by DOD, known as the Unified Facilities Criteria (UFC) DoD Minimum Antiterrorism Standards for Buildings ... The Committee is concerned that application of these two disparate security standards will give rise to two distinctly different classes of protected Federal employees: those Federal employees who work for the DOD, and those employees who do not."--P. vi-viii.

OA history of Christian education must not be confused with a

record of the achievements of the Sunday School. The discipline has advanced well beyond that stage, and today's sophisticated students fully understand that no proper concept of the history and philosophy of Christian education can be gained without seeing all the ramifications, implications, and influences that have affected it from pre-Christian times to the present. So Drs. Gangel and Benson have written this book, a historical flow of philosophical thought from a Christian point of view. Its focus is cultural-biographical, discussing each philosophy in its particular socio-historical setting, and giving special attention to significant individuals. The format is chronological, beginning with education in biblical times, working upward through history to arrive at the present - and beyond, raising questions and issues for the future.

"This delightful introduction to the composition of New-Age Wiccan Spell Poetry takes the reader through the whole process of making a piece of rhyme that works, and it also includes a Grimoire of spell poems by the author." Peter J Carroll, Past Grandmaster, Illuminates of Thanateros "Rather than simply advising readers to consider composing magical prose as part of their Craft, the author encourages personal experimentation by providing lucid, step-by-step examples of her own creative process. The extensive included Grimoire reveals lyrical verse as a powerful and elegant tool for focusing intent and achieving magical gnosis. A rich selection of spell-poems ranging from the pragmatic to the celebratory and visionary will inspire readers to explore the techniques herein and experiment with the possibilities for themselves." Long Way Down Routledge

Written by one of the leading scholars of Japanese religion, The Fluid Pantheon is the first installment of a multivolume project that promises to be a milestone in our understanding of the mythico-ritual system of esoteric Buddhism—specifically the nature and roles of deities in the religious world of medieval Japan and beyond. Bernard Faure introduces readers to medieval Japanese religiosity and shows the centrality of the gods in religious discourse and ritual; in doing so he moves away from the usual textual, historical, and sociological approaches that constitute the “method” of current religious studies. The approach considers the gods (including buddhas and demons) as meaningful and powerful interlocutors and not merely as cyphers for social groups or projections of the human mind. Throughout he engages insights drawn from structuralism, post-structuralism, and Actor-network theory to retrieve the “implicit pantheon” (as opposed to the “explicit orthodox pantheon”) of esoteric Japanese Buddhism (Mikkyō). Through a number of case studies, Faure describes and analyzes the impressive mythological and ritual efflorescence that marked the medieval period, not only in the religious domain, but also in the political, artistic, and literary spheres. He displays vast knowledge of his subject and presents his research—much of it in largely unstudied material—with theoretical sophistication. His arguments and analyses assume the centrality of the iconographic record, and so he has brought

together in this volume a rich and rare collection of more than 180 color and black-and-white images. This emphasis on iconography and the ways in which it complements, supplements, or deconstructs textual orthodoxy is critical to a fuller comprehension of a set of medieval Japanese beliefs and practices. It also offers a corrective to the traditional division of the field into religious studies, which typically ignores the images, and art history, which oftentimes overlooks their ritual and religious meaning. The Fluid Pantheon and its companion volumes should persuade readers that the gods constituted a central part of medieval Japanese religion and that the latter cannot be reduced to a simplistic confrontation, parallelism, or complementarity between some monolithic teachings known as “Buddhism” and “Shinto.” Once these reductionist labels and categories are discarded, a new and fascinating religious landscape begins to unfold.

The Fluid Pantheon Houghton Mifflin Harcourt

"Five little words: BlackBerry, Accenture, Viagra, Cayenne, e-business. Two of the words are appropriated (BlackBerry and Cayenne); two are completely made up (Viagra and Accenture); and one (e-business) is a composite word made of a word and a letter that already exist. . . .These five words are the characters in this book." Words shape and move the modern marketplace; they are at once ubiquitous and invisible. But where do words such as Saturn, PowerBook, and Tylenol originate? How did we come to "xerox" our paperwork and "have a cup of Starbucks"? Which names work, and why? For journalist Alex Frankel, what began as an exercise in curiosity--tracing the evolution of a handful of the most successful brand names from the marketplace to their places of origin--resulted in a year-long journey in which he gained access to a previously undiscovered world of forward-thinking creatives: professional namers, the unique group of marketers responsible for inventing words that ultimately become a part of our everyday vocabularies. Wordcraft is Frankel's in-depth look at how companies name themselves and their products and, in the process of defining their business through words and language, develop narratives that define the way they present themselves to the outside world. His lively, fly-on-the-wall narrative takes us into the conference rooms of Lexicon, the world's largest professional naming firm, where we see how the highly successful email pager known as the BlackBerry got its name. We travel to Germany to learn how Porsche approached the naming of its controversial SUV, a car that challenged the company's famously sporty image. The creative team behind Viagra explains how they took a completely fabricated word and turned it into a powerful idea. We witness how IBM assumed ownership of the word and story of "e-business" and in so doing turned around its corporate mindset and returned to a dominant industry position. The book is filled with stories about how things get their names, but it's not just tales of business meetings and product launches. We meet the characters who populate the naming world, "information age neologists" like freelance namer Andrea Michaels, who plays professional Scrabble and competes on TV game shows when not brainstorming for corporate clients. And we learn about the civic unrest that erupted in Denver when the naming rights for Mile High Stadium were sold. Frankel laces his narrative with cultural and historical references and quotations from thinkers as diverse as Marianne Moore and Lawrence Lessig, all of which add a layer of richness and depth to this book's multithreaded and engaging stories. For anyone intrigued by the power of words and ideas in today's marketplace, Wordcraft is a captivating tour of a fascinating world.
