For kids who love the Origami Yoda and Zombie Chasers series comes the first book in an epically hilarious, fully illustrated middle grade adventure series, starring some of history's best-known mythical beasts, from the dynamic creators of Herbert's Wormhole. Twelve-year-old Jordan Grimsley has moved with his family into an old, abandoned house in Florida that belonged to his long-lost grandfather. While clearing stuff out of the attic, Jordan finds a scrapbook filled with old news clippings about local sightings of the mythological South Florida Skunk Ape. Determined to learn more, he persuades Eldon Pecone, the only other kid for miles, to come along on an excursion into the swamp, where many of the sightings occurred. This is when Jordan makes a startling discovery: not only is the Skunk Ape real, but Eldon is an elite member of a secret society of Creature Keepers—humans assigned to protect a variety of mythical beasts. And when they discover that the Loch Ness Monster has gone missing, it kick-starts a fast-paced, funny, and totally original race across the globe to restore order and balance to the world.

"Stunning. . . a bit like if you took Charlie and the Chocolate Factory and Monsters Inc. and shoved them in a TARDIS."—Buzzfeed It's a tentacled, inventive, gooey, world in there. . . Elliot Von Doppler and his friend Leslie think nothing ever happens in Bickleburgh, except inside the gleaming headquarters of DENKI-3000—the world's eighth-largest electronics factory. Beneath the glass towers and glittering skywalks, there's a rambling old mansion from which all the company's amazing inventions spring forth. And no one except Uncle Archie knows what's behind the second-to-last door at the end of the hall. Until Elliot and Leslie are invited to take a glimpse inside. They find stooped, troll-like creatures with jutting jaws and broken teeth. Tiny winged things that sparkle as they fly. And huge, hulking, hairy nonhumans (with horns). It is unlike anything they've ever seen. But when Chuck Brickweather threatens to shut down the DENKI-3000 factory if a new product isn't presented soon, the creatures know they are in danger. And when Uncle Archie vanishes, it's up to Elliot, Leslie, and every one of the unusual, er, "employees" to create an invention so astonishing it will save the Creature Department.
