Innovative Business Practices Taxmann Publications Private Limited
This second decade of the millennium finds the world changing at

a once unimaginable pace. Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation. Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and growth. We are currently experiencing a business era of turbulence and

dynamic change – an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors

and organisational types, scholars of different business specialisations set the theoretical foundations of contemporary thinking and present their practical implementations.

'Desperate times call for desperate measures.' The outbreak of COVID-19 aptly justifies this expression as the world faces an unprecedented situation. But what is so unusual about the coronavirus, especially since viral attacks- H1N1, Ebola and Nipah-have taken place earlier as well? How has it affected India and the world? What are the socio-economic implications for India?

How has India's response been to the coronavirus? What is more important-life or livelihood? How can India recover from the sudden economic shock caused by the pandemic? This book is an attempt to answer these and many more such questions. The coronavirus hit the world in December 2019 like a hurricane. What started as a medical emergency soon turned into an economic one. No global financial crisis has ever hit humanity as hard as COVID-19. The world, therefore, was caught ill prepared when the pandemic struck. The situation, to say the least, is worse than a war. The situation in India is no different: In terms of the number of cases reported, it is second

only to the United States. This book highlights the enormity of the impact of the coronavirus pandemic on India. It critically examines the government's efforts to control the disease and mitigate its adverse effects on Indian economy and society. Making a compelling argument that an economy is not like a rubber ball, which, if dropped on a hard surface, will bounce back to its original position, the author provides incisive reasons to why economic recovery will be slow and not 'V-shaped'. He, however, cogently suggests that good governance, a robust public-health system, and clean and representative politics are key to bringing India's economy back

on track. It also deals with each and every aspect of Forensic Audit of various items of statement of Profit & Loss and Balance Sheet. The Present Publication is the Latest Edition & is updated with all amendments and legal position up to July 2020, authored by G.C. Pipara. Understanding the Forensic Audit is not complete, without actual Case Analysis and this book includes analysis of actual company cases relating to Forensic

Audit, where either fraud or misrepresentation of information is found. With the help of Case Analysis, how to achieve the maximum objective of Forensic Audit, has been explained in a lucid language with step by step approach. Each part of this book deals with the different segments of the forensic audit and each part has been devised carefully, keeping in mind - 'Maximum Result' and with an objective that the real purpose of Forensic Audit is served. This book deals with -

- Misstatement of information in financial statement,
- Incorrect details in financial statement,
- Diversion of funds by an entity,
- Siphoning of Funds by an entity,
- Fraud in

some of the transactions undertaken by the entity,

- Fraud in books of accounts and other records,
- Fraud in the balance sheet - one which is even audited,
- Fraud by the auditor in helping the organization to accomplish its intention etc.

The structure of the Book is as follows:

- Part One Deals with the introduction of forensic audit and looks into the past, present and future of forensic audit. This part is presented to establish the foundation of the book.
- Part Two Deals with important transactions pertaining to purchases of goods, sales and other major expenditures - which forms part of the statement of profit & loss account.

Provisions and contingent liabilities are often used by an entity to cook the books of account and therefore, a separate chapter is presented on this issue. • Part Three The various items contained in the balance sheet, are a major part of the activities of any entity and therefore, is a major part of any forensic audit also. Therefore, in this part of the book, the following important activities of an entity's are covered: □ Fixed (Hard) Assets – hard to spot □ Intangible Assets and Goodwill – neither visible nor real □ Capital Work In Progress (CWIP), Stock In Progress (SIP) and Stock – not seeing the light of day □ Piling Stock and Mounting Debtors – an evergreen

technique for every-greening □ Investments – without objectives like a traveller without a destination □ Loans and Advances given – gone with the wind □ Equity and Shareholders – invisible ownership • Part Four Apart from specific activities of an entity, as covered in part two and three, there are some transactions that are special. These are considered as “Key Metrics” for the purpose of forensic audit and thus, covered in this part of the book, which includes:- □ Absence of confirmation of balances □ Off-balance sheet transactions □ Round-tripping etc. It is also common in forensic audit that full records are not made available to the auditors and thus, a

separate chapter on “Dog ate my Accounts” is presented. • Part Five For explaining the concept of forensic audit properly, a new Structure has been invented by the author - termed as “T-3 Structure” wherein: □ T-1 : Test □ T-2 : Trace and □ T-3 : Track With the help of a concept called “Look Forward – Look Backward” on T-3 Structure, how the successful forensic audit can be carried out is explained in a separate chapter, under the head “Look Forward – Look Backward”. • Part Six Lastly, it is found that in various cases of fraud and misrepresentation of details in the financial statement, the Statutory Auditor were found to be the helping hand. As in forensic

audit - responsibility has to be fixed and thereafter, a separate part itself for the role played by the statutory auditor - “Where were the Auditor’s - strange but true”.
