DONAVAN KIM

The History of the Greek
and Roman Theater
Markus Wiener Publishers
This textbook provides a
detailed introduction to
the study of Latin from

the perspective of
contemporary linguistics.
It adopts some basic
tenets of generative
grammar in an in-depth
analysis of the main
phonological,
morphological, and
syntactic properties of
Latin, and offers a step-
by-step guide to the

universal principles and
specific parameters which
shape the language, along
with comparative data
from English and other
languages. Latin: A
Linguistic Introduction is a
user-friendly and essential
guide to the synchronic
study of Latin as a natural
language. The clarity of

exposition and the richness of the examples cited provide a new approach to Latin as a topic of linguistic research: although the general structure of the book is like that of a traditional Latin grammar, the discussion of grammatical rules is both more straightforward and more theoretically informed. This textbook is principally suitable for students of Latin and Romance linguistics at undergraduate level and above, but also for teachers and researchers

interested in new ways of looking at the study of Latin. It differs from many other textbooks in the field by striking a valuable balance between the longstanding tradition of classical philology and the innovations of contemporary linguistics.

The Flemish artist

Francois Balthazar

Solvyns, who lived in

Calcutta from 1791 to

1803, is little known, but

his collection of etchings

of the Hindus provide a

rich and compelling

portrait of India two

hundred years ago. These remarkable prints, depicting the people of Bengal in their occupations, festivals, and daily life, and the accompanying descriptive text, are only available in rare book collections and have rarely been referred to by scholars of Indian culture and history. In Part I of this lavishly illustrated volume, Robert Hardgrave introduces Solvyn's life and work. Part II reproduces Solvyn's etchings and descriptions, with Hardgrave's detailed commentary. This book

will make these invaluable images and writings generally available for the first time. It will be an important resource for those in South Asian studies and well as those interested in European artists in India and the European representation of the "other."

This book is related to the development of intraregional commercial exchanges in the region of the Indian Ocean. This issue is addressed from an economic as well as

from a legal point of view. The contributions, in English and French, aim to present an overview of the economic, customs-related, technical, legal and cultural restraints that hinder the creation of a free trading area. Cet ouvrage est consacré au développement des échanges commerciaux intrarégionaux dans la région de l'Océan Indien. Cette question est examinée sous un angle politique, économique et juridique. Les différentes contributions, en anglais et en français, visent à

établir un état des lieux des freins économiques, douaniers, techniques, juridiques et culturels à la création d'un espace de libre échange.

The publication is the first in a new series on existing and innovative paradigms in Heritage Studies. The series aims at systematising and developing the academic discourse on heritage, which has yielded a wealth and breadth of

contributions over the past few years. The publication offers its own emphasis by developing heritage studies with a perspective towards and as a contribution to human development. It thus offers a vision for the construction and establishment of a new discipline. The academic mainsprings and research interests of this repositioning of heritage studies as an academic discipline are discussed by internationally renowned thinkers and heritage practitioners. The

publication thus establishes first important points for discussion. Central to this publication are questions concerning the sustainable protection and use of heritage, focussing on the world cultural heritage and intangible cultural heritage, but equally questions on the relation of heritage and memory and how these could mutually enrich our understanding of heritage.

Genome Editing
Techniques are seen to be

at the frontier of current research in the field of emerging biotechnologies. The latest revolutionary development, the so-called CRISPR technology, represents a paradigmatic example of the ambiguity of such techniques and has resulted in an international interdisciplinary debate on whether or not it is necessary to ban the application of this technique by means of a moratorium on its use for human germline modifications, particularly in human embryos in the

reproduction process. However, given that other germline engineering techniques like mitochondrial (mt) DNA transfer techniques are already permitted and applied, the question arises what lies at the root of the apparent social unease about the modification of the human germline by Genome Editing Techniques like CRISPR. Against this background, the book seeks to make a substantial contribution to the current debate about a responsible and

participatory framework for research on emerging biotechnologies by analysing underlying perceptions, attitudes, arguments and the reasoning on Genome Editing Techniques. **Greek Tragedy** Walter de Gruyter Eighteenth-century Europe, commonly referred to as the Age of Enlightenment, witnessed a growing interest in China on the part of many great thinkers, inspired by reports of the Jesuit missionaries. The German philosophers Gottfried

Wilhelm Leibniz (1646-1716) and Christian Wolff (1679-1754) were among the admirers of Chinese thought and civilization. Leibniz contribution to the Western understanding of China was mainly metaphysical and religious. His younger contemporary and friend Wolff focused on Chinese ethics, concentrating on the practical morality and political ideals of Confucius. Julia Ching and Willard G. Oxtoby present English translations of important texts related to

China by Leibniz and Wolff, accompanied by two introductory essays on the philosophical and historical context. The epilogue sketches the reversal of the European opinion on China in the succeeding centuries, as reflected in the writings of Kant and Hegel.

A fluent and accurate new translation of the dialogue that, of all Plato's works, has seemed to speak most directly to the interests of contemporary

and analytical philosophers. White's extensive introduction explores the dialogue's central themes, its connection with related discussions in other dialogues, and its implication for the interpretation of Plato's metaphysics.

Aeneidos Liber II. Univ of California Press
Memorabilia (original title) is a collection of Socratic dialogues by Xenophon, a student of Socrates. The lengthiest and most famous of Xenophon's Socratic writings, the

Memorabilia is essentially an apologia (defense) of Socrates, differing from both Xenophon's Apology of Socrates to the Jury and Plato's Apology mainly in that the Apologies present Socrates as defending himself before the jury, whereas the former presents Xenophon's own defense of Socrates, offering edifying examples of Socrates' conversations and activities along with occasional commentary from Xenophon. Memorabilia is also known by its Latin title

Commentarii and a variety of English translations (Recollections, Memoirs, Conversations of Socrates, etc.). Xenophon's Socrates is more likely to give practical advice than to ask probing philosophical questions, and Xenophon is more interested in defending Socrates than in developing his philosophy. Where Plato's Socrates emphasizes self-knowledge, Xenophon's Socrates speaks more of self-control. Yet the Memorabilia also contains

charming set-pieces (including Socrates' conversation with the glamorous courtesan (hetaera) Theodote in III.11, and his sharp exchanges with two of the Thirty Tyrants in I.2). And Xenophon likely aimed to reach a wider range of readers, many of whom may have welcomed the more down-to-earth advice his Socrates gives. Xenophon's portrayal of Socrates was influential in antiquity, and helps us understand how various schools of ancient thought made use of Socrates.

The self-control of Xenophon's Socrates is in keeping with his role in inspiring ancient cynicism, which was traditionally said to be founded by Socrates' follower Antisthenes. It is clear that the Stoics made considerable use of Xenophon's version of the argument from design, and their account of natural law also owed something to Socrates, if not only to Xenophon's Socrates. Aside from Plato and Aristophanes, Xenophon is the only contemporary of Socrates

whose writings on the latter are extant. Xenophon's account of how Heracles had to choose between Virtue and Vice, a story he attributes to Prodicus, became a popular motif in ancient Greek and Roman culture. It became popular again in the Renaissance. (wikipedia.org)

 Reshaping Museum Space pulls together the views of an international group of museum professionals,

architects, designers and academics highlights the complexity, significance and malleability of museum space, and provides reflections upon recent developments in museum architecture and exhibition design. Various chapters concentrate on the process of architectural and spatial reshaping, and the problems of navigating the often contradictory agendas and aspirations of the broad range of professionals and stakeholders involved in any new project.

Contributors review recent new build, expansion and exhibition projects questioning the types of museum space required at the beginning of the twenty-first century and highlighting a range of possibilities for creative museum design. Essential reading for anyone involved in creating, designing and project managing the development of museum exhibits, and vital reading for students of the discipline.

Utopisches Vorstellen und Wollen bestimmt nach wie vor unser Dasein; es nimmt unterschiedliche Formen an, nicht zuletzt

dort, wo es kritisiert und verworfen wird. Die AutorInnen spüren diesem Faktum in konstruktiv-kritischer Weise nach. Das Faktum des Utopischen wird entweder als produktiv und unabdingbar bejaht oder als unfruchtbar bzw. destruktiv abgewiesen. Gerungen wird um einen vernünftigen, d. h. brauchbaren Begriff des Utopischen; die Weite, die Ernst Bloch dem Begriff gegeben hat, wird ebenso verteidigt wie in Frage gestellt. Insgesamt resultiert eine

representative und klare Auseinandersetzung um die aktuelle Idee des Utopischen - eine Idee, die im Blick auf das Ziel humanen Daseins nicht preisgegeben werden darf. Bei Kohlhammer nur in Deutschland und Österreich erhältlich

 Roman civilization is one
 of the bases of the
 modern world. The
 extraordinary
 achievements of Rome--
 political, military, cultural--
 and its dramatic,
 thousand-year history,
 during which it grew to
 dominate the whole world
 of classical antiquity
 before being
 overwhelmed in its turn,
 have been continuously

studied and variously
 interpreted ever since.
 Rome has been
 commended for its
 administration, praised for
 its system of justice,
 admired for its arts and
 technology, extolled for
 its "virtues," such as love
 of freedom,
 independence, discipline,
 courage, and austerity. It
 has also been condemned
 for its aggression, its
 exploitation of slaves, its
 excesses, and the
 decadence that led to its
 decline. But such was
 Rome's impact, and so
 remarkable was the

empire it built, that its
 influence has never
 ceased to be felt. Whether
 as a model of political
 power, of moral behavior,
 or of social control, Rome
 with its splendors and
 triumphs, its failings and
 disasters, is an
 inexhaustible quarry for
 the lessons that its history
 offers and the legacies
 that it has bequeathed.
 Karl Christ conveys the
 essence of this vital
 Roman tradition with a
 coherence and compact
 precision that few
 scholars, if any, have
 been able to achieve.

Following the main chronological developments of Roman history, he combines the necessary minimum of political and military narrative with lucid social and economic analysis, separate chapters of Roman ways of life and law, and wide-ranging coverage of literature, art, science, technology, and religion. With maps and photographs as well as a specially prepared bibliography for further reading, *The Romans* is the most up-to-date, authoritative and

comprehensive single-volume introduction to the history and civilization of Ancient Rome.

In the closing years of the seventeenth century, one of the most brilliant of modern European philosophers became actively involved in the search for intellectual and spiritual accord between Europe and China. In his search, Gottfried Wilhelm Leibniz entered the "Rites Controversy" on the side of the Jesuits, who had achieved positions of

remarkable proximity to the Chinese throne. Yet less than forty years later, the optimism of their cause had dummed. Leibniz died in isolation in Hanover, the papacy ruled against the Jesuits at Rome, and in China there was a growing distrust of the Christian missionaries by the monarchy. In contrast to past neglect of this subject as an intriguing but peripheral area of Leibniz' philosophy, Leibniz and Confucianism: The Search for Accord elevates Leibniz' interest in China

to a more central concern of Leibnizianism. Leibniz was deeply committed to an ecumenism that included not only the reunion of Roman and Protestant Christendom, but an ecumenism with which the spiritual and intellectual beliefs and practices of non-Westerners, especially the Chinese, could be reconciled. As an investigation into how that commitment was pursued and into some of the reasons why it failed, this book seeks to present Leibniz' experience a both

historical record and contemporary guide. Drawing upon unpublished material in the Leibniz archives in Hanover, Mungello traces the influences upon Leibniz through the Jesuit translators to the Chinese sources. In the process, we have the opportunity to observe the first historical instance of a major Western philosopher interpreting and reacting to Chinese (largely Neo-Confucian) philosophic notions and concepts. The author concludes by explaining

how he believes Leibniz' search for accord can assist our own contemporary search for accord. *Sophist* Johns Hopkins University Press Sinn (U. of Wurzburg) has directed several major excavations of the Greek city. He profiles a major tourist site of the ancient world, with people coming to for the famous games and a well known oracle. and why it is filled with
oriental art. He includes
