MARSH LI

Diesel Equipment Superintendent

Vols. for 1919- include an Annual statistical issue (title varies).

Central Valley Project, West San Joaquin Division, San Luis Unit, California: San Luis Dam and pumping-generating plant, and O'Neill Dam and pumping plant: construction

Eighty-two CTD stations were taken in

the Mediterranean Sea during February, 1975 . These stations were concentrated in the Alboran Sea near Gibraltar to investigate whether water typical of the deep western Mediterranean was flowing directly up and over the sill at Gibraltar. Temperature, salinity, and potential temperature at standard pressures are presented for each of the stations.

Yachting

Includes section "Laws, regulations and rules affecting wharves, warehouses and cargo."

Pacific Road Builder and Engineering Review

This book examines the Texas-based company's heavy equipment that has been used in the mining, construction, and oil industries from the 1920s to present. Two hundred photos illustrate the fascinating tales behind LeTourneau breakthroughs like the first electric-diesel front-end loader. Founder Robert Gilmour LeTourneau is regarded as the father of high-volume earthmoving equipment, and holds more U.S. patents than any other person, save Thomas Edison. Fans of heavy equipment are sure to enjoy this profile of the manufacturer of the world's largest

front-end loaders.
