Poor public resource management and the global financial crisis curbing fundamental fiscal space, millions thrown into poverty, and authoritarian regimes running successful criminal campaigns with the help of financial assistance are all phenomena that raise fundamental questions around finance and human rights. They also highlight the urgent need for more systematic and robust legal and economic thinking about sovereign finance and human rights. This edited collection aims to contribute to filling this gap by introducing novel legal theories and analyses of the links between sovereign debt and human rights from a variety of perspectives. These chapters include studies of financial complicity, UN sanctions, ethics,

transitional justice, criminal law, insolvency proceedings, millennium development goals, global financial architecture, corporations, extraterritoriality, state of necessity, sovereign wealth and hedge funds, project financing, state responsibility, international financial institutions, the right to development, UN initiatives, litigation, as well as case studies from Africa, Asia and Latin America. These chapters are then theorised by the editors in an introductory chapter. In July 2012 the UN Human Rights Council finally issued its own guidelines on foreign debt and human rights, yet much remains to be done to promote better understanding of the legal and economic implications of the interface between finance and human rights. This book will contribute to that understanding as well as help practitioners in their everyday work. The authors include world-renowned lawyers and economists, experienced practitioners and officials from international organisations.

This is a revised and updated edition serving as a guide to understanding financial reporting and corporate cash flow. It discusses the key relationships financial report users need to understand in managing, lending to, and investing in business. It also shows how to cut through a maze of numbers in order to understand these reports. A standard graphic model is used throughout the text and self testing review questions and answers are included at the end of chapters.

This book examines the concept of witness protection which is still at an early developmental stage in several African countries including Nigeria, from a legal and institutional perspective. Recent developments in Nigeria highlight the need to clarify legal and conceptual issues within the existing legal framework for protecting witnesses. Using the Nigerian case study, the book illustrates some obscurities inherent in the concept of witness protection. These are highlighted around five critical areas: the definition of witness protection; the scope of beneficiaries requiring protection; the nature of crimes necessitating protection; the nature of protective measures; and the administrative control of witness protection. Specifically, this book draws from the existing literature and practices of witness protection and adopts two distinct perspectives: the criminal justice perspectives and human rights perspectives as heuristic tools for analysing the concept and to separate the disparate influences that shape how it is construed. These distinctions are utilised throughout the book as an integrated way of conceptualising the concept of witness protection. By discussing the practice of witness protection within the Nigerian context, the book contributes to African conversations on the topic of witness protection. The clarifications made in this book are utilised in making normative proposals for developing a legal framework for witness protection in Nigeria. They are also useful for other African countries interested in developing a witness protection framework as part of criminal justice reform. This book will serve as a reference point for legal scholars, researchers, academics, (postgraduate) students and policy makers interested in the concept of witness protection. It would also be useful for courses 'concerned with comparative criminology where there is an interest in developments in the Global South.'

The Naqab Bedouin and Colonialism brings together new scholarship to challenge perceived paradigms, often dominated by orientalist, modernist or developmentalist assumptions on the Naqab Bedouin. The past decade has witnessed a change in both the wider knowledge production on, and political profile of, the Naqab Bedouin. This book addresses this change by firstly, endeavouring to overcome the historic isolation of Naqab Bedouin studies from the rest of Palestine studies by situating, studying and analyzing their predicaments firmly within the contemporary context of Israeli settler-colonial policies. Secondly, it strives to de-colonise research and advocacy on the Naqab Bedouin, by, for example, reclaiming 'indigenous' knowledge and terminology. Offering not only a nuanced description and analysis of Naqab Bedouin agency and activism, but also trying to draw broader conclusion as to the functioning of settler-colonial power structures as well as to the politics of research in such a context, this book is essential reading for students and researchers with an interest in Postcolonial Studies, Development Studies, Israel/Palestine Studies and the contemporary Middle East more broadly.

Planning today is more important than ever. Both acquisition and allocation of resources are increasingly difficult for arts organizations as a result of emerging technologies, reduced arts education, aging donors, and the advent of new forms of entertainment. It is essential for arts organizations to take a coherent approach to these issues to remain vibrant over time. In fact, most arts organizations do periodically attempt some kind of planning exercise. But a review of hundreds of such plans suggests that most contain merely a wish list, rather than concrete plans for the future: "We will increase ticket sales!" is a common "strategy" expressed in too many arts plans. In the absence of details about how ticket sales will be increased, it's an empty promise. In *Strategic Planning in the Arts*, Michael M. Kaiser, the former head of the Kennedy Center in Washington, DC, and an arts management guru, has produced a clear, concise guide for staff or board members of not-for-profit arts organizations who are responsible for developing, evaluating, or implementing plans. Relying on real-world cases and examples, Kaiser shows how to conceive, assess, and act on every part of the strategic plan, from the mission statement to the financial statement; from managing the board to marketing. Praise for Michael Kaiser: "A rich yet tidy cornucopia of solutions for the challenges facing the American arts scene." - Washington Post

The world of money is being transformed as households and organizations face changing economies, and new currencies and payment systems like Bitcoin and Apple Pay gain ground. What is money, and how do we make sense of it? Money Talks is the first book to offer a wide range of alternative and unexpected explanations of how social relations, emotions, moral concerns, and institutions shape how we create, mark, and use money. This

collection brings together a stellar group of international experts from multiple disciplines—sociology, economics, history, law, anthropology, political science, and philosophy—to propose fresh explanations for money's origins, uses, effects, and future. Money Talks explores five key questions: How do social relationships, emotions, and morals shape how people account for and use their money? How do corporations infuse social meaning into their financing and investment practices? What are the historical, political, and social foundations of currencies? When does money become contested, and are there things money shouldn't buy? What is the impact of the new twenty-first-century currencies on our social relations? At a time of growing concern over financial inequality, Money Talks overturns conventional views about money by revealing its profound social potential.

The Routledge Handbook of Persian Gulf Politics provides a comprehensive and up-to-date analysis of Persian Gulf politics, history, economics, and society. The volume begins its examination of Ottoman rule in the Arabian Peninsula, exploring other dimensions of the region's history up until and after independence in the 1960s and 1970s. Featuring scholars from a range of disciplines, the book demonstrates how the Persian Gulf's current, complex politics is a product of interwoven dynamics rooted in historical developments and memories, profound social, cultural, and economic changes underway since the 1980s and the 1990s, and inter-state and international relations among both regional actors and between them and the rest of the world. The book comprises a total of 36 individual chapters divided into the following six sections: Historical Context Society and Culture Economic Development Domestic Politics Regional Security Dynamics The Persian Gulf and the World Examining the Persian Gulf's increasing importance in regional politics, diplomacy, economics, and security issues, the volume is a valuable resource for scholars, students, and policy makers interested in political science, history, Gulf studies, and the Middle East.
