By exploring indigenous
people's knowledge and
use of sea ice, the SIKU
project has demonstrated
the power of multiple

perspectives and
introduced a new field of
interdisciplinary research,
the study of social (socio-
cultural) aspects of the
natural world, or what we
call the social life of sea
ice. It incorporates local
terminologies and
classifications, place
names, personal stories,
teachings, safety rules,

historic narratives, and
explanations of the
empirical and spiritual
connections that people
create with the natural
world. In opening the
social life of sea ice and
the value of indigenous
perspectives we make a
novel contribution to IPY,
to science, and to the
public

Sport and physical culture in Occupied France examines the Vichy state's attempts to promote physical education and sports in order to rejuvenate French men and women during the Occupation. Through this cultural lens, it illuminates the central paradox of state power during the Vichy Regime. The state organised a centralised physical cultural programme meant to control and

discipline French men and women. However, these activities instead empowered individuals and sporting associations to create spaces for individual expression, protect entrenched business enterprises, preserve republican institutions and organise sites for mutual aid and assistance. Based on extensive archival research, this innovative, multi-city analysis demonstrates how French sporting federations, associations and athletes appropriated Vichy's

physical education directives to reshape the ideology of the state and serve their own local agendas.

In *World History: Societies of the Past*, students explore societies of the

past and see the influences and impact history has on their lives today. The textbook provides students with an easy-to-understand and in-depth look at human societies?from early hunters-gatherers to ancient societies to the beginnings of modern-day societies (1850 CE). A chronological approach explores social, environmental, political, economic, cultural, and technological issues that remain relevant in today's world. To help your students visualize

historical situations and events, the textbook includes: hundreds of vibrant illustrations and historical artwork detailed maps, diagrams, and charts informative timelines questions, summaries, and quick facts stories of everyday people Recommended by Manitoba Education, Citizenship and Youth as a Manitoba Grade 7 Social Studies Learning Resource. recommended for British Columbia grade 7 classrooms

 Ocarina Books
 Agricultural expansion has transformed and

fragmented forest habitats at alarming rates across the globe, but particularly so in tropical landscapes. The resulting land-use configurations encompass varying mosaics of tree cover, human settlements and agricultural land units. Meanwhile, global demand for agricultural commodities is at unprecedented levels. The need to feed nine billion people by 2050 in a world of changing food demands is causing increasing agricultural intensification. As such,

market-orientated production systems are now increasingly replacing traditional farming practices, but at what cost? The Agrarian Change project, coordinated by the Center for International Forestry Research, explores the conservation, livelihood and food security implications of land-use and agrarian change processes at the landscape scale. This book provides detailed background information on seven multi-functional landscapes in Ethiopia,

Cameroon, Indonesia, Nicaragua, Bangladesh, Zambia and Burkina Faso. The focal landscapes were selected as they exhibit various scenarios of changing forest cover, agricultural modification and integration with local and global commodity markets. A standardized research protocol will allow for future comparative analyses between these sites. Each case study chapter provides a comprehensive description of the physical and socioeconomic context of each focal

landscape and a structured account of the historical and political drivers of land-use change occurring in the area. Each case study also draws on contemporary information obtained from key informant interviews, focus group discussions and preliminary data collection regarding key topics of interest including: changes in forest cover and dependency on forest products, farming practices, tenure institutions, the role and presence of conservation

initiatives, and major economic activities. The follow-on empirical study is already underway in the landscapes described in this book. It examines responses to agrarian change processes at household, farm, village and landscape levels with a focus on poverty levels, food security, dietary diversity and nutrition, agricultural yields, biodiversity, migration and land tenure. This research intends to provide much needed insights into how landscape-scale land-use

trajectories manifest in local communities and advance understanding of multi-functional landscapes as socioecological systems. *Twelve Years a Slave* Springer Science & Business Media

The history of urban development is associated with the degradation of rivers - the deterioration of water quality, increased flooding, and the loss of ecological resources. The story of urban streams and rivers is as much a social history as it is a technological one. The control of nature and exploitation of natural resources was at the heart of the industrialisation process and of advances in the co-ordination and effective

administration of water- and land-management schemes. Today, new approaches to the management of urban water are a response to advances in scientific knowledge and technology, and of a new concern for quality of life. Environmental improvement and ecological restoration demonstrate confidence in an area, which can enhance economic competitiveness. Along with improvements in air quality, building stock and transport networks, the

restoration of stream and river corridors can make a major contribution to the success of urban regeneration schemes. Urban Rivers provides an illustrated overview of the effects of urbanisation on the aquatic environment, potential solutions to the resulting problems, and new opportunities for the regeneration of urban streams and rivers, and of land along their corridors and of adjacent urban areas. The book is written to be accessible to a broad audience and should provide a

stimulating and informative introduction to the subject for all those concerned with the urban river environment.

CIFOR

This Thematic Study is a joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union. It presents an overall vision on astronomical heritage, attempts to identify what constitutes "outstanding

universal significance to humankind" in relation to astronomy, and identifies broad issues that could arise in the assessment of cultural properties relating to astronomy. This is the first Thematic Study in any field of science heritage. It is elaborated using examples of properties from around the world, including some already on the World Heritage List or national Tentative Lists. The subject matter ranges from early prehistory to modern astrophysics and space heritage, and also

prominently includes dark sky issues and modern observatory sites. An e-version of the Thematic Study was published in June 2010 in time to be presented to the 2010 meeting of UNESCO's World Heritage Committee, where it was duly approved. It has been circulated officially by the WHC to all of UNESCO's National Commissions. This full-colour paperback edition with some updates, and reformatted to new ICOMOS standards, was published in 2011 and is

now offered for public sale.

The Times Index Matador

This book examines heritage tourism across the Southeast Asian region from different disciplinary perspectives. With material that is new and topical, it makes an important contribution to the fields of tourism studies, cultural studies, development and planning studies, and beyond. Set against a backdrop of the demands, motivations and impacts of heritage tourism, the

volume focuses on disputes and conflicts over what heritage is, what it means, and how it has been presented, re-presented, developed and protected. It examines the actors involved in encounters and contestation, drawing in issues of identity construction and negotiation, and requiring the contextualization of heritage in national and global processes of identity formation and transformation. Among the questions touched upon are the ownership of

heritage, its appropriate use, access to it versus conservation needs, heritage as a commodity, as entertainment and as an educational medium.

Yearbook of International Organizations Routledge

This is the first volume that brings together research and practice from academic and industry settings and a combination of human and machine translation evaluation. Its comprehensive collection of papers by leading experts in human and

machine translation quality and evaluation who situate current developments and chart future trends fills a clear gap in the literature. This is critical to the successful integration of translation technologies in the industry today, where the lines between human and machine are becoming increasingly blurred by technology: this affects the whole translation landscape, from students and trainers to project managers and professionals, including in-house and freelance

translators, as well as, of course, translation scholars and researchers. The editors have broad experience in translation quality evaluation research, including investigations into professional practice with qualitative and quantitative studies, and the contributors are leading experts in their respective fields, providing a unique set of complementary perspectives on human and machine translation quality and evaluation, combining theoretical and

applied approaches. *Canadian Almancy & Directory, 2014* McGraw Hill Professional
This volume reviews recent hydrological and environmental issues resulting from human-induced water pollution practices while providing case studies on the physical, chemical, and eco-biological techniques used to mitigate the impacts of river ecosystem pollution in South Asian countries. The book demonstrates the key methods of measurement,

monitoring, mapping, and modeling of river water quality and how it is impacted by pollution and incorporates contemporary geospatial technological applications for the management and sustainability of future water resources. The major topics that the book addresses are the fundamental concepts of river ecosystem health, riverine ecology and habitats, risk assessment of riverine pollution, and technology-based river pollution control strategies. The book will

serve as an interdisciplinary guide for researchers, students, and GIS specialists working in various disciplines, including pollution hazards, river ecosystem restoration, water quality, remote sensing, zoology, natural resources management, and environmental geography.

[Directory of Associations in Canada](#) Springer Nature Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a

Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but

vitaly important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen

years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Global Change in Marine Systems Penguin

The Canadian Almanac & Directory contains sixteen directories in one – giving you all the facts and figures you will ever need about Canada. No other single source provides users with the quality and depth of up-to-date information for all types of research. This national directory and guide gives you access to statistics, images and over 100,000 names and addresses for everything from Airlines to Zoos—updated every year. Each section is a directory in itself, providing robust

information on business and finance, communications, government, associations, arts and culture (museums, zoos, libraries, etc.), health, transportation, law, education, and more. Government information includes federal, provincial and territorial—and includes an easy-to-use quick index to find key information. A separate municipal government section includes every municipality in Canada, with full profiles of

Canada's largest urban centers. A complete legal directory lists judges and judicial officials, court locations and law firms across the country. A wealth of general information, The Canadian Almanac & Directory also includes national statistics on population, employment, imports and exports, and more. National awards and honors are presented, along with forms of address, Commonwealth information and full color photos of Canadian symbols. Postal

information, weights, measures, distances and other useful charts are also incorporated. Complete almanac information includes perpetual calendars, five-year holiday planners and astronomical information. Published continuously for over 160 years, The Canadian Almanac & Directory is the best single reference source for business executives, managers and assistants; government and public affairs executives; lawyers; marketing, sales and advertising

executives; researchers, editors and journalists, and is a must for all Canadian libraries and universities
Translation Quality Assessment Portage & Main Press
Marine social and ecological systems around the world face multiple natural and anthropogenic stressors associated with global change. The resulting changes can create hardship for local societies that depend on them for food, livelihoods and wellbeing. Knowing how to respond to global

change in a timely and appropriate manner is increasingly occupying the attention of researchers, policy makers, decision makers and practitioners around the world. Written by an international group of researchers from the natural and social sciences, *Societal and governing responses to Global Change in Marine Systems* analyses and appraises societal and governing responses to change, highlighting and explaining similarities and distinctions between

successful, and less successful, responses. The authors present "I-ADApT", an analytical framework that enables decision makers to consider possible responses to global change, based on experiences elsewhere. Within this volume, I-ADApT is applied to 20 enlightening case studies covering a wide range of marine systems that have been challenged by critical global change issues around the world. Introducing innovative research to work towards

a range of possible responses to global change, *Societal and governing responses to Global Change in Marine Systems* will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers and practitioners interested in fields such as: Environment & Natural Resources, Marine Resources and social sciences.

Master the words and

phrases necessary for handling everyday situations Practice Makes Perfect: French Vocabulary helps you develop your vocabulary by providing practice in word-building and encouraging you to analyze new words for an ever-increasing vocabulary. Each chapter of this comprehensive book focuses on a theme, such as family or travel, so you can build your language skills in a systematic manner. As you lay the foundation for an increasing vocabulary,

you are able to perfect your new words with plenty of exercises and gain the confidence to communicate well in French. Practice Makes Perfect: French Vocabulary offers you: More than 120 exercises Concise grammatical explanations A new chapter on contemporary vocabulary An answer key to gauge your comprehension With help from this book, you can easily speak or write in French about: Different occupations and jobs * French holidays and

traditions * Taking the train * Growing your own garden * Where it hurts on your body * Your house * Your family and friends * What you studied in school * Your favorite TV show * Your family's background . . . and much more!

Associations Canada

This book provides a systematic and comprehensive guide to the current state of knowledge on tourism and

water. It is the first book to thoroughly examine the interrelationships of tourism and water use based on global, regional and business perspectives. Its assessment of tourism's global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the water sustainability of tourism will be measured for years to come. In

making a clear case for greater awareness and enhanced water management in the tourism sector, it is hoped that the book will contribute to the wise and sustainable use of this critical resource. The book is interdisciplinary in coverage and international in scope. It is designed as essential reading for not only students of tourism but also practitioners.
