 Medicine And Systems Biology This book
 provides a systems-based approach to
 periodontology and offers a scientific
 roadmap of the interactions which can
 lead to periodontal disease. The content
 is divided into five sections. The first
 introduces the reader to the concept of
 systems theory and its mathematical
 foundation. The second section provides
 the reader with a current view of
 periodontal medicine including the

INTEGRATION INTO PERIODONTAL CARE.
P4 medicine allows an integrated
patient-centered and systems-based
model for management of chronic
disease. Because plaque-induced
periodontitis is a classic chronic disease,
it is appropriate to consider how P4
medicine may be adapted for
periodontal therapy.

Periodontitis is a destructive
inflammatory disease of the supporting
tissues of the teeth and is caused by
specific microorganisms or group of
specific microorganisms. The association
of periodontal infection with organ
systems like cardiovascular system,
endocrine system, reproductive system,
and ...
