This smart, provocative look at how the American Dream of single-family homes, white picket fences, and two-car

garages became a lonely, overpriced nightmare explores how new trends in housing can help us live better. Over the past century, American demographics and social norms have shifted dramatically. More people are living alone, marrying later in life, and having smaller families. At the same time, their lifestyles are changing, whether by choice or by force, to become more virtual, more mobile, and less stable. But despite the ways that today's America is different and more

diverse, housing still looks stuck in the 1950s. In *Brave New Home*, Diana Lind shows why a country full of single-family houses is bad for us and our planet, and details the new efforts underway that better reflect the way we live now, to ensure that the way we live next is both less lonely and more affordable. Lind takes readers into the homes and communities that are seeking alternatives to the American norm, from multi-generational living, in-law suites, and co-living to microapartments, tiny

houses, and new rural communities. Drawing on Lind's expertise and the stories of Americans caught in or forging their own paths outside of our cookie-cutter housing trap, *Brave New Home* offers a diagnosis of the current American housing crisis and a radical re-imagining of future possibilities.

Tiny House Decisions

Union Square & Co.

Part how-to, part personal memoir, *The Big Tiny* is an utterly seductive meditation on the benefits of slowing down, scaling back, and appreciating the truly important things in life. More than ten years ago, a near-death

experience abruptly reminded sustainability advocate and pioneer Dee Williams that life is short. So, she sold her sprawling home and built an eighty-four-square-foot house—on her own, from the ground up. Today, Williams can list everything she owns on one sheet of paper, her monthly housekeeping bills amount to about eight dollars, and it takes her about ten minutes to clean the entire house. Adapting a new lifestyle left her with the ultimate luxury—more time to

spend with friends and family—and gave her the freedom to head out for adventure at a moment’s notice, or watch the clouds and sunset while drinking a beer on her (yes, tiny) front porch. Building Small Simon and Schuster

Traditionally, the American Dream has included owning a house, and until recently that meant the bigger the better. McMansions have flourished in suburbs across the country, and as houses got bigger we filled them with more

stuff. Kerri Fivecoat-Campbell had been subconsciously trying to live up to this American Dream when circumstances forced her and her husband into a 480-square foot house in the woods. What was supposed to be a writing cabin and guest house became their full-time abode and they quickly discovered that they had serendipitously discovered a better way of life. They realized that by living smaller, they were in fact, Living Large. They were not spending

extra time cleaning and maintaining the house, but had the freedom to pursue their hobbies; they did not waste money on things they didn’t need; and they grew emotionally (as well as physically) closer. Kerri and her husband realized that Living Large is less about square footage and more about a state of mind. As Kerri relates the story of her transformation to a “Living Larger,” she also profiles more than a dozen other families living tiny house lives and offers

practical advice for how you can too. The book will: *walk you through the financial advantages of small space living *help you define and find the right size house *teach you to scale down to the essentials to be surrounded only by things you love *show you how to make use of outdoor space *give tips on how to decorate judiciously and much more. Whether readers are inspired to join the tiny house movement or not, they are sure to be inspired to Live Large with less.

First published in 1973, Shelter

remains a source of inspiration and invention. Including the nuts-and-bolts aspects of building, the book covers such topics as dwellings from Iron Age huts to Bedouin

tents to Togo's tin-and-thatch houses; nomadic shelters from tipis to "housecars"; and domes, dome cities, sod iglus, and even treehouses. The authors recount personal stories about alternative

dwellings that illustrate sensible solutions to problems associated with using materials found in the environment - with fascinating, often surprising results.
