Des Pawson has been a professional ropeworker for more than 25 years. His passion for knots goes back to the time when, aged 7, he was given a book with some knots in it. He has studied knots and sailors' ropework ever since. Over that time he has built up a number of recipe books containing the information required to make each item, whether it is a key fob, fender, mat or knife lanyard. Des Pawson's Knot Craft contains a selection from those recipe books, giving the reader the basic designs, illustrating which knots and sennits are used to make them. Here is a step-by-step breakdown of how to put the knots together as well as the size and lengths of materials required. Many books have been published on how to tie practical knots but not many books give help in putting the knots together to make an object.

Paracord: (FREE Bonus Included)15 Legendary Paracord Projects For Beginners With Illustrations If you have ever heard of paracord but are unsure about exactly what it is or how to use it, then this book is for you! Paracord was first created for use as a pull cord in World War Two parachutes, it was chosen due to its strength and durability. It could also be removed from the parachute and taken with a soldier once they were behind enemy lines. The genuine product is known as paracord 550; the term simply describes the fact that it can handle the stress of five hundred and fifty pounds. It has at least five strands inside it which make up the cord, in fact, it is usually seven strands. The cord can retain its strength even with one or two of these strands broken! In more recent times its role as a survival aid has become increasingly commented on. Using a simple design you can make a product, such as a keychain, which can be carried with you at all times. In a survival situation it can be unraveled to provide you a surprising amount of rope; even more length can be generated by pulling the strands out from inside the sheath.
