 Implement FEES successfully into your practice! In the 10 years since Dr. Langmore pioneered and described endoscopic technique for evaluating pharyngeal swallowing function, the use of FEES (flexible endoscopy) has grown exponentially. The procedure is used throughout the world, with workshops held to sold-out attendance; demand for training materials continues unabated. Now there is one book that comprehensively covers the role of endoscopy in the assessment and treatment of oropharyngeal dysphagia. Written in step-by-step detail by the creator of the technique, the book gives you all the information you need to implement FEES in your practice. It offers valuable comparisons to other imaging tools, especially fluoroscopy, showing how this portable technique is the most efficient and cost-effective for patients who cannot easily be transported to a hospital. Highlights of the book: Comprehensive review of anatomy/physiology of oral & pharyngeal musculature Provides FEES protocol sheets for complete how-to instruction Shows how to score a FEES examination & possible abnormal findings Demonstrates the use of endoscopy in a wide range of populations infants, children, and geriatric patients, and those with head and neck cancer Lays out rehabilitative & compensatory techniques for each dysphagia problem Summarizes safety data from the three largest clinical studies ever undertaken Includes dozens of "best practice" case studies

 Object-oriented analysis and design (OOAD) has over the years, become a vast field, encompassing such diverse topics as design process and principles, documentation tools, refactoring, and design and architectural patterns. For most students the learning experience is incomplete without implementation. This new textbook provides a comprehensive introduction to OOAD. The salient points of its coverage are: • A sound footing on object-oriented concepts such as classes, objects, interfaces, inheritance, polymorphism, dynamic linking, etc. • A good introduction to the stage of requirements analysis. • Use of UML to document user requirements and design. • An extensive

treatment of the design process. • Coverage of implementation issues. • Appropriate use of design and architectural patterns. • Introduction to the art and craft of refactoring. • Pointers to resources that further the reader's knowledge. All the main case-studies used for this book have been implemented by the authors using Java. The text is liberally peppered with snippets of code, which are short and fairly self-explanatory and easy to read. Familiarity with a Java-like syntax and a broad understanding of the structure of Java would be helpful in using the book to its full potential.

 "[A] new literary genre, the MBA Memoir . . . Delivers 97 pearls of warmth, wit and wisdom from the most inspirational entrepreneur I have ever met." —Frances Edmonds, bestselling author of *Repotting Your Life Called the "Queen of Beauty"* and the most influential lone woman to impact the beauty industry since Estée Lauder by the New York Times, Leslie Blodgett's story is anything but ordinary. As the CEO of BareMinerals, she reinvented how beauty was sold by tapping into the power of community before the idea of social media existed. In 2006, Blodgett took the company public in one of the largest cosmetic IPOs of the decade,

and in 2010, the company was acquired for \$1.8 billion. *Pretty Good Advice* is her next chapter. This refreshing book features 97 candid and entertaining insights on business, life, and beauty. Personal and often surprising, Blodgett dishes on leading with humor, why wearing blush and reading obituaries are two of the most optimistic things you can do, and why you owe it to your coworkers not to be boring. *Pretty Good Advice* is full of frank, actionable advice to help light a fire under you. "If you want to laugh, get totally inspired, learn a bunch and enjoy reading something so engrossing you won't put it down but you could because it's written in these amazing one-ish-page chunks, GET IT. Could not be better for right now." —Jean Godfrey June, *Beauty Editor*, GOOP "A moving and clear-eyed memoir of an extraordinary life. Charmingly made-up as a how-to guide, Leslie chronicles that life in vivid and memorable lessons that jump off the page." —John W. Evans, author of *Should I Still Wish*

 Autism spectrum disorders (ASDs) have been increasingly diagnosed in recent years and carries with it far reaching social and financial implications. With this in mind, educators, physicians, and parents are searching for the best practices and most effective treatments. But because the symptoms of ASDs span multiple domains (e.g., communication and language, social, behavioral), successfully meeting the needs of a child with autism can be quite challenging. *Evidence-Based Practices and Treatments for Children with Autism* offers an insightful and balanced perspective on topics ranging from the historical underpinnings of autism treatment to the use of psychopharmacology and the implementation of evidence-based practices (EBPs). An evaluation methodology is also offered to reduce the risks and inconsistencies associated with the varying definitions of key autism terminology. This commitment to clearly addressing the complex issues associated with ASDs continues throughout the volume and provides opportunities for further research. Additional issues addressed include: Behavioral excesses and deficits treatment Communication treatment Social awareness and social skills treatment Dietary, complementary, and alternative treatments Implementation of EBPs in school settings Interventions for sensory dysfunction With its holistic and accessible approach, *Evidence-Based Practices and Treatments for Children with Autism* is a vital resource for school psychologists and special education professionals as well as allied mental health professionals, including clinical child and developmental psychologists, psychiatrist, pediatricians, primary care and community providers.

 Traumatic brain injury (TBI) is a complex condition for which limited research exists. The recent conflicts in Iraq and

Afghanistan have resulted in numerous service members returning home after sustaining TBI, and healthcare providers scrambling to find resources on how to treat them. This toolkit is a comprehensive source of inventories and therapy options for treating service members with mild TBI. All aspects of mild TBI are covered, including vestibular disorders, vision impairment, balance issues, posttraumatic headache, temporomandibular dysfunction, cognition, and fitness, among others. With easy-to-follow treatment options and evaluation instruments, this toolkit is a one-stop resource for clinicians and therapists working with patients with mild TBI.

This original study examines women's activism against war in areas as far apart as Sierra Leone, India, Colombia and Palestine. It shows women on different sides of conflicts in the former Yugoslavia and Israel addressing racism and refusing enmity and describes international networks of women opposing US and Western European militarism and the so-called 'war on terror'. These movements, though diverse, are generating an antimilitarist feminism that challenges how war and militarism are understood, both in academic studies and the mainstream anti-war movement. Gender, particularly the form taken by masculinity in a violent sex/gender system, is inseparably linked to economic and ethno-national factors in the perpetuation of war.

Enhancing the Effectiveness of Team Science John Wiley & Sons This exciting new practical resource, expected to be available in late 2010 consists of two treatment manuals: one for everyday communication partners and families and another for training people with brain injury. The purpose is to provide speech pathologists and other health professionals with a comprehensive resource to improve the conversational skills of communication partners of people with TBI, and also to provide conversational skills training for people with TBI directly to improve everyday communication skills. The manual is divided into four sections: Section 1 outlines the background of the manuals, research and training programs. Section 2 contains information on preparation required for the two programs. Section 3 contains the program for Everyday Communication Partners (ECP) which is divided into seven modules over 10 sessions. Each module is divided into pre-session preparation (aims, resources to bring, what to do before, during and after the session), and appendices including participant and home work handouts). Section 4 contains the program for people with TBI who attend treatment without a communication partner and is also divided into seven modules over 10 sessions. It is also divided into pre-session preparation (aims, resources to bring, what to do before, during and after the session), and appendices (participant and home work handouts).

An essential and comprehensive guide to university finances. In University Finances, higher education expert Dean O. Smith • demystifies basic accounting procedures, budgets, debt financing, and financial statements • explores more unusual financial topics, such as methods for calculating fringe benefit rates, bond refunding costs, and indirect cost allocations • shows that the use of university wealth is highly restricted by donors, bondholders, government regulators, and others • answers nuanced questions, like "How are USDA formula funds calculated?" and "Why does the university pursue more and more research funding when it loses money on every grant?" • illustrates financial calculations using realistic examples Some of these explanations are unavailable in print or online to anyone but a handful of professional accountants. Rigorous, detailed, and wide-ranging, University Finances is a unique and powerful resource.

The term arthrogyposis describes a range of congenital

contractures that lead to childhood deformities. It encompasses a number of syndromes and sporadic deformities that are rare individually but collectively are not uncommon. Yet, the existing medical literature on arthrogyposis is sparse and often confusing. The aim of this book is to provide individuals affected with arthrogyposis, their families, and health care professionals with a helpful guide to better understand the condition and its therapy. With this goal in mind, the editors have taken great care to ensure that the presentation of complex clinical information is at once scientifically accurate, patient oriented, and accessible to readers without a medical background. The book is authored primarily by members of the medical staff of the Arthrogyposis Clinic at Children's Hospital and Medical Center in Seattle, Washington, one of the leading teams in the management of the condition, and will be an invaluable resource for both health care professionals and families of affected individuals.

Annotation. In 2000 and 2001, twelve northern states of the Federal Republic of Nigeria introduced Islamic criminal law as one of a number of measures aiming at "reintroducing the shari'a." Immediately after its adoption, defendants were sentenced to death by stoning or to amputation of the hand. Apart from a few well publicised trials, however, the number and nature of cases tried under Islamic criminal law are little known. Based on a sample of trials, the present thesis discusses the introduction of Islamic criminal law and the evolution of judicial practice within the regions historical, cultural, political and religious context. The introduction of Islamic criminal law was initiated by politicians and supported by Muslim reform groups, but its potential effects were soon mitigated on higher judicial levels and aspects of the law were contained by local administrators. From its historical grandeur to its metropolitan grit and stunning glamor, experience Paris through the lens of acclaimed photographer William Albert Allard, considered one of color photography's most celebrated pioneers. Over the course of three decades, former Magnum photographer William Albert Allard has been returning to Paris and embodying the idea of the flâneur, the idle yet keen wandering observer. Paris is the stunning culmination of Allard walking through the City of Light in search of nothing and everything, those gloriously unexpected scenes that unknowingly carry the weight of the world, if only for a moment. Visit backstage at music events and fashion shows, admire the cavernous rooms of fine museums, stroll the meandering streets of the city's neighborhoods, walk along the Seine, and spot lounging sunbathers, café patrons, and laborers with this masterful portraitist. Allard brings his personal voice and wonderful talent to this legendary city, revealing Paris in a personal, intimate way through the lens of his camera. Vibrant with color and rich with the details of human nature, this long out-of-print collection is now available again so viewers can marvel at both the work of a master photographer and the myriad poses struck by one of the world's greatest cities. "To walk in Paris is to stroll through a never-ending series of one-act plays with ever changing, often beautiful, sets, populated by sometimes equally attractive characters on display."—William Albert Allard Starting in 1964, Allard contributed to National Geographic magazine for 50 years, longer than any other single contributor. A pioneer of color documentary photography and a superb portraitist, Allard was credited early in his career with changing the look of National Geographic through his intimate work on the American subcultures of the Amish of Pennsylvania and the Hutterites of Montana. Allard has previously published six critically acclaimed books. His first, Vanishing Breed, photographs and writing about

the American cowboy, published in 1981, was nominated for The American Book Award. Paris is the winner of the 5th edition of the Federation of European Professional Photographers (FEP) Book Prize Award.

Jonathan Safran Foer emerged as one of the most original writers of his generation with his best-selling debut novel, Everything Is Illuminated. Now, with humor, tenderness, and awe, he confronts the traumas of our recent history. What he discovers is solace in that most human quality, imagination. Meet Oskar Schell, an inventor, Francophile, tambourine player, Shakespearean actor, jeweler, pacifist, correspondent with Stephen Hawking and Ringo Starr. He is nine years old. And he is on an urgent, secret search through the five boroughs of New York. His mission is to find the lock that fits a mysterious key belonging to his father, who died in the World Trade Center on 9/11. An inspired innocent, Oskar is alternately endearing, exasperating, and hilarious as he careens from Central Park to Coney Island to Harlem on his search. Along the way he is always dreaming up inventions to keep those he loves safe from harm. What about a birdseed shirt to let you fly away? What if you could actually hear everyone's heartbeat? His goal is hopeful, but the past speaks a loud warning in stories of those who've lost loved ones before. As Oskar roams New York, he encounters a motley assortment of humanity who are all survivors in their own way. He befriends a 103-year-old war reporter, a tour guide who never leaves the Empire State Building, and lovers enraptured or scorned. Ultimately, Oskar ends his journey where it began, at his father's grave. But now he is accompanied by the silent stranger who has been renting the spare room of his grandmother's apartment. They are there to dig up his father's empty coffin.
