Weird Ways of Witchcraft is the story of the radical DR. Leo Louis Martello, founder of the Witches' Anti-Defamation League and pioneer in the Witches Liberation Movement of the 1960s. An outspoken witch who brought formal charges against the Catholic Church for the damages done during the Inquisition and Salem Witch Trials, he staged the first Witch-In in Central Park, and he wrote The Witch Manifesto which appeared in print for the first time in the 1969 edition of this very book.

In October 1994, fifty-three members of the Order of the Solar Temple in Switzerland and Québec were murdered or committed suicide. This incident and two later group suicides in subsequent years played a pivotal role in inflaming the cult controversy in Europe, influencing the public to support harsher actions against non-traditional religions. Despite the importance of the Order of the Solar Temple, there are relatively few studies published in English. This book brings together the best scholarship on the Solar Temple including newly commissioned pieces from leading scholars, a selection of Solar Temple documents, and important previously published articles newly edited for inclusion within this book. This is the first book-length study of the Order of the Solar Temple to be published in English.

Are you taking over, or are you taking orders? Are you going backwards, or are you going forwards? White riot—I wanna riot. White riot—a riot of my own. —The Clash, "White Riot" Ten years after the battle in Seattle sparked an historic struggle against the forces of multinational conglomeration and American imperialism, the anti-globalization generation is ready to reflect on a decade of organizing that changed the face of mass action around the globe. Scholar and activist AK Thompson revisits the struggles against globalization in Canada and the United States at the turn of the century, and he explores the connection between political violence and the white middle class. Equal parts sociological study and activist handbook, *Black Bloc, White Riot* engages with the key debates that arose in the anti-globalization movement over the course of the past decade: direct or mass action? Summit-hopping or local organizing? Pacifism or diversity of tactics? Drawing on movement literature, contemporary and critical theory, and practical investigations, Thompson outlines the effect of the anti-globalization movement on the white, middle-class kids who were swept up in it, and he considers how and why violence must once again become a central category of activist politics. AK Thompson is a writer and activist living and working in Toronto, Canada. Currently completing his PhD in sociology at York University, Thompson teaches social theory and serves on the editorial committee of *Upping the Anti: A Journal of*

Theory and Action. His publications include *Sociology for Changing the World: Social Movements/Social Research* (Fernwood Publishing, 2006).

Anti-Semitism Harper Perennial

A classic initiatic primer for the serious magical aspirant, available now for the first time in English • Details occult purification and preparations for the path of natural and divine magic • Explains how initiation into the hermetic science transforms the novice not only mentally but also physically, altering even the very fluids of the body • Offers a return to the original hermetic path of initiation, following the strict procedures and symbolism as defined in the spiritual practices of Pythagoras and his tradition The main purpose of the hermetic science, as seen by Giuliano Kremmerz (1861-1930), Italian alchemist,

hermeticist, philosopher, and member of the Ur Group, is to allow the adept to concentrate on the natural and divine magic that will allow him or her to develop the latent powers innate in every human being. The initiatory path this opens, one the author compares to the Royal Way of Alchemy, transforms the novice not only mentally but also physically, altering even the very fluids of his or her body. For Kremmerz, magic is the supreme science, the highest expression of what exists and what is possible. With this book, first published in Italian in 1897 and available here for the first time in English, Kremmerz sought to redefine magical initiation as well as other key components of the occult sciences. His aim was to bring the hermetic path of initiation back into alignment with the strict procedures and symbolism that defined the spiritual practices of Pythagoras and the heirs to his tradition. He visualized the initiate as a disciple who has escaped the stagnant water in which the rest of humanity is immersed and entered a state of non-ordinary consciousness, one that allows for the successful pursuit of realization and contact with the magical will. In this transformative initiatory guide, Kremmerz details the occult purification and preparation the path of natural and divine magic requires. The spiritual course advocated by Kremmerz is arduous--to move forward on the path of true realization, one that will allow the initiate to "climb to heaven" while still alive, the aspirant must commit to total severance from everyday life. Yet Kremmerz's words themselves serve to trigger the beginning of transformation within us, making the very act of reading this primer the first step on the path of initiation into the hermetic science.

In *Migrants and City-Making* Ayşe Çağlar and Nina Glick Schiller trace the participation of migrants in the unequal networks of power that connect their lives to regional, national, and global institutions. Grounding their work in comparative ethnographies of three cities struggling to regain their former standing—Mardin, Turkey; Manchester, New Hampshire; and Halle/Saale, Germany—Çağlar and Glick Schiller challenge common assumptions that migrants exist on society's periphery, threaten social cohesion, and require integration. Instead Çağlar and Glick Schiller explore their multifaceted role as city-makers, including their relationships to municipal officials, urban developers, political leaders, business owners, community organizers, and social justice movements. In each city Çağlar and Glick Schiller met with migrants from around the world; attended cultural

events, meetings, and religious services; and patronized migrant-owned businesses, allowing them to gain insights into the ways in which migrants build social relationships with non-migrants and participate in urban restoration and development. In exploring the changing historical contingencies within which migrants live and work, Çağlar and Glick Schiller highlight how city-making invariably involves engaging with the far-reaching forces that dispossess people of their land, jobs, resources, neighborhoods, and hope.

What we propose doing in this book, namely, to make a serious attempt to assist some of those who have inhaled the poisonous fumes of infidelity and been left in a state of mental indecision concerning sacred things. Our principal object will be to set forth some of the numerous indications that the Bible is something far superior to any human production, and give some of the rules which require to be heeded if the Scriptures are to be properly interpreted; and though their scope will go beyond the general title of "Divine revelation," yet they will complement and complete the earlier ones.

"The Texas Folklore Society has been alive and kicking for over one hundred years now, and I don't really think there's any mystery as to what keeps the organization going strong. The secret to our longevity is simply the constant replenishment of our body of contributors. We are especially fortunate in recent years to have had papers given at our annual meetings by new members--young members, many of whom are college or even high school students. "These presentations are oftentimes given during sessions right alongside some of our oldest members. We've also had long-time members who've been around for years but had never yet given papers; thankfully, they finally took the opportunity to present their research, fulfilling the mission of the TFS: to collect, preserve, and present the lore of Texas and the Southwest. "You'll find in this book some of the best articles from those presentations. The first fruits of our youngest or newest members include Acayla Haile on the folklore of plants. Familiar and well-respected names like J. Rhett Rushing and Kenneth W. Davis discuss folklore about monsters and the classic 'widow's revenge' tale. These works--and the people who produced them--represent the secret behind the history of the Texas Folklore Society, as well as its future."--Kenneth L. Untiedt
