Le général russe Guerrassimov a réinventé la guerre. Les moyens employés par la Russie moderne déstabilisent les démocraties, interviennent dans les élections et modèlent par la désinformation, les structures sociétales. La boîte de Pandore est ouverte. La Russie

est bien moins riche que les entreprises-nations. Demain, elles feront comprendre aux Etats que leur futur n'a que faire des démocraties. Sauf si...

L'entreprise & l'homme Polity

This 2001 book is a follow-on to John Braithwaite's best-selling and influential *Crime, Shame and Reintegration*. Shame management is becoming a central concept, in theoretical and practical terms. This book makes a major contribution to the advancement of shame in a theoretical sense. For criminology, as well as for psychology, sociology and other areas,

this accessible book serves as an introduction to the concepts of shame, guilt and embarrassment. Presenting research by the Restorative Justice Centre at the Australian National University, the book contributes immeasurably to the development of practical alternatives to common sanctions in an effort to reduce crime and other social problems. Written by the key exponents of restorative justice, the book is an important re-statement of the theory and practice of shaming. It will develop important and often controversial debates about

punishment, shaming and restorative justice to a new level.

Neural Engineering, 2nd Edition, contains reviews and discussions of contemporary and relevant topics by leading investigators in the field. It is intended to serve as a textbook at the graduate and advanced undergraduate level in a bioengineering curriculum. This principles and applications approach to neural engineering is essential reading for all academics, biomedical engineers, neuroscientists, neurophysiologists, and industry professionals wishing to take advantage of the latest and greatest in this emerging field.

Annales des mines Société des Ecrivains Formations of Modernity is a major introductory textbook offering an account of the important historical processes, institutions and ideas that have shaped the development of modern societies. This challenging and innovative book 'maps' the evolution of those distinctive forms of political, economic, social and cultural life which characterize modern societies, from their origins in early modern Europe to the

nineteenth century. It examines the roots of modern knowledge and the birth of the social sciences in the Enlightenment, and analyses the impact on the emerging identity of 'the West' of its encounters through exploration, trade, conquest and colonization, with 'other civilizations'. Designed as an introduction to modern societies and modern sociological analyses, this book is of value to students on a wide variety of social science courses in universities and colleges and also to readers with no prior knowledge of sociology. Selected readings from a broad range of classical writers (Weber, Durkheim, Marx, Freud, Adam Smith, Montesquieu, Hobbes, Locke, Rousseau) and contemporary thinkers (Michael Mann, E.P. Thompson, Edward Said) are integrated in each chapter, together with student questions and exercises.

Circulaire à toute ma vie humaine

Cambridge University Press

The second edition of a bestseller, this comprehensive reference provides the fundamental information required to understand both the operation and proper application of all types of gas turbines. The completely updated second edition adds a

new section on use of inlet cooling for power augmentation and NOx control. It explores the full spectrum of gas turbines hardware, typical application scenarios, and operating parameters, controls, inlet treatments, inspection, trouble-shooting, and more. The author discusses strategies that can help readers avoid problems before they occur and provides tips that enable diagnosis of problems in their early stages and analysis of failures to prevent their recurrence.

The Psychology of Entrepreneurship Council of Europe

Alors qu'il a abjuré ses convictions maoïstes dans les années 80, Sébastien Lechevallier, devenu diplomate, participe en 2002 à un colloque réunissant ses ex-compagnons révolutionnaires. Mais sur place, il ne reconnaît pas les participants et le colloque se transforme rapidement en foire d'empoigne.

Journal officiel de la République française Psychology Press

La crise n'est qu'un symptôme. Le système entier est malade. Paul est cadre d'une grosse entreprise, son épouse Sophie maître de conférences en économie. Avec leur fils, ils menaient une

vie paisible et se croyaient à l'abri. Et pourtant... L'histoire d'une famille broyée par un monstre, véritable moloch auquel des grands prêtres vouent un culte démoniaque : l'argent. Sacrifiant tout humanisme à son service, décidant du sort des uns et de la vie des autres selon un seul et unique critère, celui de la rentabilité économique à court terme. Autopsie de A à Z d'une société capitaliste, le brûlot de Adam Ray Kerbur, mariant le roman à l'essai pour ne pas rater sa cible, dénonce avec une précision clinique la mainmise tentaculaire du libéralisme sur nos vies. Soulignant l'urgence du rôle de régulateurs des États et d'un contrôle strict et permanent à l'échelle mondiale, l'auteur signe une démonstration édifiante de la nécessité d'une nouvelle donne. Pédagogique, instructif, on ne peut plus d'actualité : indispensable.

Nouvelles universitaires Springer Science & Business Media

The fields of organizational climate and organizational culture have co-existed for several decades with very little integration between the two. In *Organizational Climate and Culture: An Introduction to*

Theory, Research, and Practice, Mark G. Ehrhart, Benjamin Schneider, and William H. Macey break down the barriers between these fields to encourage a broader understanding of how an organization's environment affects its functioning and performance. Building on in-depth reviews of the development of both the organizational climate and organizational culture literatures, the authors identify the key issues that researchers in each field could learn from the other and provide recommendations for the integration of the two. They also identify how practitioners can utilize the key concepts in the two literatures when conducting organizational cultural inquiries and leading change efforts. The end product is an in-depth discussion of organizational climate and culture unlike anything that has come before that provides unique insights for a broad audience of academics, practitioners, and students.

Neural Engineering

Entrepreneurship is essential for international social and economic well-being, as new ventures are the dominant source of job creation, market innovation, and economic growth in many societies. In this book, a noted group of researchers use findings, methods, and theories of modern psychology as the basis for gaining important, new insights into entrepreneurship-and into the hearts and minds of the talented, passionate professionals who create new business ventures. *The Psychology of Entrepreneurship*, a volume in the SIOP Organizational Frontiers Series, is the first book written about the psychology of entrepreneurship, and includes over 60

research questions to guide industrial organizational psychology, organizational behavior, and entrepreneurship research about entrepreneurs. It seeks to answer questions such as, how and why do some people, but not others, recognize opportunities, decide to start new ventures, and organize successful, rapidly growing new ventures? Some topics addressed include: methods to help researchers explore the domain of entrepreneurship research; the entire

process of starting a new business; characteristics of the individual entrepreneur; the history of entrepreneurship education; the cross-cultural effects of entrepreneurship; and the viewpoints of seasoned psychologists who analyze current entrepreneurship research methods. This book will appeal to teachers, students, and researchers in the areas of industrial organizational psychology, organizational behavior,

entrepreneurship, and management.
