Encyclopedia of National Dress [2 volumes] Xlibris Corporation
 This work is a comprehensive information on the indigenous bioresources of North Eastern India with the scope of bioprospecting for discovery and commercialization of new sources and products and long-term ecological balance. The exploration, conservation and sustainable utilization of bioresources of world's Megabiodiversity Hotspots are undeniable. North Eastern India is a recognised biodiversity hot spot where the evolutionary forces are at its optimum, making this region as centre of origin for many species. Although little bit exploratory studies have been conducted in this part of the globe but a scientific exploitation of the bioresources is almost lacking. Unscientific exploitation and overexploitation without proper knowledge of the bioresources may lead to imbalanced ecosystem of this mega diversity region. At the same time, very less exploration and exploitation will hamper biodiversity based development. Today, unscientific dramatic changes are underway in this region. Human activities are changing, degrading and destroying the bioresources in an unplanned manner. Scientific bioprospecting of the bioresources will boost the economy while ensuring conservation. This book offers comprehensive information about various levels of bioprospecting of the gene pool of this Indo-Burma Mega Biodiversity Hot Spot, the North East India, which is endowed with huge biodiversity potential for exploration and exploitation for the benefit of humankind. Also, this book highlights the less and merely explored part of the indigenous biodiversity of North East India with explanation towards their better sustainable exploitation for benefit of the people, economy and environment. The novelty of the book lies in expert coverage of the bioresources of this mega-diverse region including plants, microbes, insects etc. with provisions for their sustainable scientific utilization. This book portrays North East India as a melting pot of bioresources which are little explored and also those resources which are still to be explored. The book mainly highlights the bioprospecting approaches for North East Indian bioresources, and thus, it make itself a unique one in filling the knowledge gap that is there regarding the bioprospecting of the biodiversity of this special region on the earth. The book concludes by the ecotourism potential of this region. The target audiences for this book include biodiversity economists who are working on technology and bioresource management issues, and especially on biotechnology and biodiversity, development economists addressing the issues of bioresources in developing countries. These people may be in academia, in government, in

non-governmental organizations and in private companies. The other target audiences group is policy scholars in government/public sectors who are interested in issues of biotechnology, IPRs, and biodiversity. In addition, scholars/experts in both development studies and resource management studies form another group of target audiences. Also, the book will be useful for the interaction between developed and developing nations regarding the issues of biodiversity and bioprospecting, as North Eastern India is the hub of Biodiversity.
Sustainable Fibres for Fashion Industry Bloomsbury Publishing USA

Biodegradable and Biocompatible Polymer Composites: Processing, Properties and Applications begins by discussing the current state-of-the-art, new challenges and opportunities for various biodegradable and biocompatible polymer composite systems. Interfacial characterization of composites and the structure-property relationships in various composite systems are explained in detail via a theoretical model. Processing techniques for various macro and nanocomposite systems and the influence of processing parameters on properties of the composite are also reviewed in detail. The characterization of microstructure, elastic, visco-elastic, static and dynamic mechanical, thermal, rheological, optical, and electrical properties are highlighted, as are a broad range of applications. The book is a useful reference resource for both researchers and engineers working in composites materials science, biotechnology and nanotechnology, and is also useful for students attending chemistry, physics, and materials science and engineering courses. - Presents recent outcomes and highlights the going importance of biodegradable and biocompatible polymer composites and their impact on the environment - Analyzes all the main processing techniques, characterization and applications of biodegradable composites - Written by leading international experts working in the field of biodegradable and biocompatible polymer composites - Covers a broad range of application fields, including medical and pharmaceutical, agricultural, packaging and transport

DK Eyewitness Travel Guide: Cambodia & Laos Hemkunt Press
 An unparalleled portrait, Donald K. Swearer's *Buddhist World of Southeast Asia* has been a key source for all those interested in the Theravada homelands since the work's publication in 1995. Expanded and updated, the second edition offers this wide ranging account for readers at the beginning of the twenty-first century. Swearer shows Theravada Buddhism in Southeast Asia to be a dynamic, complex system of thought and practice embedded in the cultures, societies, and histories of Thailand, Myanmar (Burma), Laos, Cambodia, and Sri Lanka. The work focuses on three distinct yet interrelated aspects of this milieu. The first is the popular tradition of life models personified in myths and

legends, rites of passage, festival celebrations, and ritual occasions. The second deals with Buddhism and the state, illustrating how King Asoka serves as the paradigmatic Buddhist monarch, discussing the relationship of cosmology and kingship, and detailing the rise of charismatic Buddhist political leaders in the postcolonial period. The third is the modern transformation of Buddhism: the changing roles of monks and laity, modern reform movements, the role of women, and Buddhism in the West.
Monsoon Rains, Great Rivers and the Development of Farming Civilisations in Asia Univ of California Press
 This two-volume set presents information and images of the varied clothing and textiles of cultures around the world, allowing readers to better appreciate the richness and diversity of human culture and history. The contributors to *Encyclopedia of National Dress: Traditional Clothing around the World* examine clothing that is symbolic of the people who live in regions all over the world, providing a historical and geographic perspective that illustrates how people dress and explains the reasons behind the material, design, and style. The encyclopedia features a preface and introduction to its contents. Each entry in the encyclopedia includes a short historical and geographical background for the topic before discussing the clothing of people in that country or region of the world. This work will be of great interest to high school students researching fashion, fashion history, or history as well as to undergraduate students and general readers interested in anthropology, textiles, fashion, ethnology, history, or ethnic dress.

Explorations of the Highlands of the Brazil Woodhead Publishing
 This two-volume work presents a comprehensive survey of all the ways people celebrate religious life around the globe. *Religious Celebrations* is an alphabetically organized encyclopedia that covers more than 800 celebratory occasions from all of the world's major religious communities as well as many of the minor faith traditions. The encyclopedia provides a complete reference tool for examining the myriad ways people worldwide celebrate their religious lives across religious boundaries, providing information on numerous celebratory activities never before covered in a reference work. Offering the most comprehensive coverage of religious holidays ever assembled, this two-volume book covers festivals, commemorations, holidays, and annual religious gatherings all over the world, with special attention paid to the celebrations in larger countries. Entries written by distinguished researchers and specialists on different religious communities capture the unique intensity of each event, be it fasting or feasting, frenzied activity or the universal cessation of work, a huge gathering of the faithful en masse or a small family-centered event. The work spotlights celebrations that currently exist without overlooking now-abandoned celebrations that still

impact the modern world.

SILENT RISK State University of New York Press

This book is part of a five-volume set that explores sustainability in textile industry practices globally. Case studies are provided that cover the theoretical and practical implications of sustainable textile issues, including environmental footprints of textile manufacturing, consumer behavior, eco-design in clothing and apparels, supply chain sustainability, the chemistry of textile manufacturing, waste management and textile economics. The set will be of interest to researchers, engineers, industrialists, R&D managers and students working in textile chemistry, economics, materials science, and sustainable consumption and production. This volume explores some alternative synthetic raw materials resulting from the recycling and regeneration of renewable textile fibers, and how these sustainable green-based composites can contribute to improved ecological and human health. The book offers insights into the impacts of human-made fibers and microfiber pollution, and how biodegradable material sourcing can help to curb harmful environmental impacts from these practices and achieve clothing and apparel sustainability. *Ornithology of Sabah* Hal Leonard Corporation Utilizing contemporary accounts of India, China, Siam and the Levant, this study provides rich detail about these exotic lands and explores the priorities that shaped and motivated these bold envoys and chroniclers. Ames and Love offer a fascinating look at the symbiotic nature of cross-cultural interaction between France and the major trading regions of the Indian Ocean basin during the 17th century. During this period of intense French interest in the rich trade and cultures of the region, Louis XIV and his minister Jean-Baptiste Colbert in particular were concerned with encouraging French travelers, both clerical and lay, to explore and document these lands. Among the accounts included here are those of François Bernier, Jean-Baptiste Tavernier, and François Pyrard. Because these accounts reflect as much about the structures and priorities of France as they do about the cultures they describe, Ames and Love hope their analysis bridges the gap between studies on early modern France and those on the major Asiatic countries of the same period. Their findings challenge the current thinking in the study of early modern France by demonstrating that overseas expansion to Asia was of considerable importance and interest to all segments of French society. Specialists in traditional internal French history will find much in this study of European expansion to complement and supplement their research.

A New English-Hindustani Dictionary Palgrave Macmillan

Cambodia and Laos opened their doors to tourists in the late 80s and, while at first a destination frequented by backpackers and thrill seekers, its appeal has grown ever since. Blessed with stunning scenery and Angkor, one of the best cultural sights in the world, both countries now attract cultural sight-seekers and adventurous hikers, with their unbeatable combination of stunning temples and unspoiled countryside ideal for hiking, water sports, bird watching, and mountain biking. Part of the award-winning DK Eyewitness Travel series, this sumptuously illustrated guide leads readers to it all, from the majestic sight of the UNESCO-listed ancient city of Angkor in Cambodia to the tranquil temples and boutique hotels of Luang Prabang in Laos. Whether enjoying a delicious meal and cold beer overlooking the Mekong or kayaking on the Nam Song River surrounded by limestone karsts, the Eyewitness Guide: Cambodia & Laos is indispensable. Don't miss a thing on your vacation with the DK Eyewitness Travel guidebook to Cambodia and Laos.

Loy Krathong Festival Penguin

This very interesting compilation, written by the son of the first photographer and journalist of Ceylon, is of the various important dates in the history starting with the advent of the Portuguese in 1505. Its goes on to cover the Dutch period in a short cap to reach the copious section of the British period that commenced in 1795 and continues till the authors time of compiling in the 1920 s. Although the eras of the Portuguese and Dutch are over in a few pages. The record of the events of the British stretch over 125 pages. Another wonderful part of this book is 442 short notes on the places, people, history, scandals, poetry, celebrations, arrival of ships that make the book interesting to those who know Jaffna only by name.

Bioprospecting of Indigenous Bioresources of North-East India Bloomsbury Publishing USA

A new historical relation of the Kingdom of Siam is an unchanged, high-quality reprint of the original edition of 1693. Hanserbooks is editor of the literature on different topic areas such as research and science, travel and expeditions, cooking and nutrition, medicine, and other genres. As a publisher we focus on the preservation of historical literature. Many works of historical writers and scientists are available today as antiques only. Hanserbooks newly publishes these books and contributes to the preservation of literature which has become rare and historical knowledge for the future.

The Birds of Borneo Springer Science & Business Media

This book assesses the potential effects of biotechnological approaches, particularly genetic modification, on the present state of fiber crop cultivation and sustainable production. Leading international researchers discuss and explain how biotechnology can affect and solve problems in connection with fiber crops. The topics covered include biology, biotechnology, genomics and applications of fiber crops like cotton, flax, jute and bamboo. Providing complete, comprehensive and broad subject-based reviews, the book offers a valuable resource for students, teachers, and researchers including agriculturists, biotechnologists and botanists, as well as industrialists and government agencies involved in the planning of fiber crop cultivation.

Biodegradable and Biocompatible Polymer Composites Springer The Book Offers An Account Of The Tamils Society, Economy, Religious Beliefs, Educational Mechanisms, Arts And Cultural Expressions (During 1707-1947). It Also Discusses The Profound Influence Of Colonial Rule In The Tradition-Bound Tamilian Society.

The Legends of the Panjâb Univ of California Press

This book describes the Islamisation process that has unfolded in Malaysia over the last fifty years and provides feedback from in-depth interviews with 100 individuals from Malaysia's "educated classes", or the "elite", regarding their reactions to the changes that have accompanied Islamisation and how they feel it has impacted them. It includes a brief overview of Islamisation globally and a brief history of Malaysia, focusing especially on those aspects relevant to the book's subject. The book gives a comprehensive explanation of how and why Islamisation occurred in Malaysia and illustrates the extent of change that has accompanied it. The feedback from the research participants includes special analysis of reactions from Muslim women and non-Muslims. The reasons behind there being so little public debate about Islamisation and the concerns that this group of people have about what is happening is also explained. Finally, the author gives his opinion on the impact the change in government in May 2019 is likely to have.

Emphasizing the social processes that underpin the global economy and demonstrating how the uneven effects of global economic integration impact upon actors this book also underlines the reciprocal effects that reconfigure the terrain of global accumulation.

One Foot in Laos Springer

With an estimated 8,000 deaths per year in the United States from complications of UCA, an initial goal of 50% reduction of loss is possible. To achieve this goal requires the recognition by the obstetrical community of the issue. Recent research into circadian rhythms may help explain why UCA stillbirth is an event between 2:00 a.m. and 4:00 a.m. Melatonin has been described as stimulating uterine contractions through the M2 receptor. Melatonin secretion from the pineal gland begins around 10:00 p.m. and peaks to 60 pg at 3:00 a.m. Serum levels decline to below 10 pg by 6:00 a.m. Uterine stimulation intensifies during maternal sleep, which can be overwhelming to a compromised fetus, especially one experiencing intermittent umbilical cord compression due to UCA. It is now time for the focus to be on screening for UCA, managing UCA prenatally, and delivery of the baby in distress defined by the American College of Obstetricians and Gynecologists as a heart rate of 90 beats per minute for 1 minute on a recorded nonstress test. The ability of ultrasound and magnetic resonance imaging (MRI) to visualize UCA is well documented. The 18 20 week ultrasound review should include the umbilical cord, its characteristics, and description of its placental and fetal attachment. The American Association of Ultrasound Technologists has defined these parameters for umbilical cord abnormalities: B.1.4 Abnormal insertion B.1.5 Vasa previa B.1.6 Abnormal composition B.1.7 Cysts, hematomas, and masses B.1.8 Umbilical cord thrombosis B.1.9 Coiling, collapse, knotting, and prolapse B.1.10 Umbilical cord evaluation with sonography includes the appearance, composition, location, and size of the cord Cord Events: Although many stillbirths are attributed to a cord accident, this diagnosis should be made with caution. Cord abnormalities, including a Nuchal Cord, are found in approximately 30% of normal births and may be an incidental finding. (American College of Obstetrics and Gynecology Practice Bulletin 2009) According to NICHD's recent stillbirth study, UCA is a significant cause of mortality (10%). This finding is in agreement with other international UCA studies. (Bukowski et al. 2011) These histologic criteria identify cases of cord accident as a cause of stillbirth with very high specificity. (Dilated fetal vessels, thrombosis in fetal vessels, avascular placental villi.) (Pediatr Dev Pathol 2012) Finally, defining the morbidity (injury) of cord compression, such as fetal neurologic injury or heart injury identified with umbilical cord blood troponin T levels or pulmonary injury, is the next major area of investigation.

(Easy Piano Personality). New pianists hoping to play the songs of

Norah Jones will love this collection of 14 easy piano arrangements. Songs include: Come Away with Me * Don't Know Why * Happy Pills * I'm Alive * Not Too Late * Sunrise * Thinking About You * and more.

The Buddhist World of Southeast Asia Bloomsbury Publishing USA (Easy Piano Personality). An excellent collection of 21 of Joel's best, including: And So It Goes * It's Still Rock and Roll to Me * Just the Way You Are * The Longest Time * My Life * Piano Man * We Didn't Start the Fire * and more.

Global Economy Contested Routledge

Nestled between Vietnam to the east, Myanmar and China to the north, Thailand to the west and Cambodia to the south, Laos has long suffered from the depredations of its larger neighbors. But the biggest bully in its history was the United States which, starting in 1964, carried on a secret war against Laos. By the time of the ceasefire in February 1973, Laos had become the most heavily bombed nation in the history of the world. When renowned travel writer Dervla Murphy went to Laos in 1997, she discovered a country that had only just opened its borders to the West. What she found was a country where the people-kind, gentle, welcoming-more than compensate for everything that can go wrong. But she also discovered that the persisting problems bequeathed by its recent past are tragic and other problems threaten its immediate future. A series of chance meetings left her with a profound sense of a beautiful country and a unique culture threatened-once again-by the extreme pressures of the modern world.

The Secret Societies of All Ages and Countries John Murray

This book covers all sustainable fibres applicable in the fashion sector. It addresses the importance of these fibres in the fashion sector with the context of sustainability. This book, the first of its kind, addresses all the minute details pertaining to these fibres and connects these fibres with the world of sustainable fashion. It stresses the importance of having these fibres on board in developing sustainable apparels, as fibres play a major role as the starting point in the life cycle of apparel.

Life and Ritual in Old Siam Hal Leonard

Sure a lot of Thai girls are good in English especially hookers. But what if you want to ask a "normal" Thai girl out for a date? There are countless of nice Thai girls that have never dated a foreigner before but would love to if you can at least speak some basic Thai. Or think of all the university girls most of them don't speak English or are too shy but how if you tell them in Thai "You are cute, do you want to go for dinner with me?" Imagine how many more Thai girls you can meet if you know some really useful Thai vocabulary and phrases! Leaving alone to impress girls no matter if they speak English or not. And not just for arranging quick dates - if you are in a relationship with a Thai girl it does make sense to know how to ask her if she's horny or ask her to undress. You will learn all this and much more in this book. The Thai Love Course is divided into two parts: The first part is about teaching you all the language skills you need in order to talk to Thai girls confidently. There are 6 lessons: 1. Courting / Arranging a Date Learn everything from "What's your name?", "Where do you go?", "You are cute" to "Are you free tonight?" and "Do you want to have a meal together?" Step by step from the first thing you tell her to arranging a date. 2. During the Date / Bring her back to your room Once it's time to meet her and take her out for the date you will have a repertoire of more than enough questions and statements to convince her to go back to your or her room like "It's hot here, isn't it?", "Do you live alone?", "Do you want to watch a movie in my room?" and many more. 3. In the Apartment / Making Love The tools for your bedroom: "I love your skin", "Can I hug you?", "Can I kiss you?", "Don't be shy" to "What is your favorite position?", "Does it hurt?", "That feels good?" are just a few things you will be able to tell your girl. 4. Talking about Feelings If you want to be able to ask your honey why she loves you as well as understanding her answer - this chapter provides all relevant words and phrases you need to know. Also including useful tools for pickup lines ("You are so kind", "I don't want to sleep alone", "Do you want to be my girlfriend?" etc). 5. Breaking up Sooner or later you may want to end the relationship with your Thai girl and rather than ignoring her messages there are several ways to tell her that it's over and also give a reason for it ("You don't care about me at all", "You barely call me", "It's better we break up" etc). 6. Talking to Bar Girls / Hookers There is not one foreigner that I know who comes to Thailand on holiday or lives here permanently and has not been in "contact" with Thai bar girls. So in the final chapter you'll find everything related to talking to bar girls and hookers ("What time do you finish work?", "I want to take you outside", "How much do you want?", "That's too much" etc). You'll love this one. Each chapter has a list of relevant vocabulary followed by useful sentences for real conversations. Everything comes in English, Thai transliteration and Thai script. The second part is about understanding the way Thai girls are thinking and what they expect from you in a relationship. Plus bonus content including Pick Up Lines that really work and the most important Isaan Words.
