**for Bioactive Molecules** *Using*  
*Ethnobotany and Pharmacognosy for*  
*Novel Drug Discovery A Book on Mayan*  
*Herbal Medicine* *Bioactive Molecules And*  
*Medicinal Plants* The aim of this book was  
to review the current status of bioactive  
molecules and medicinal plants research  
in light of the surge in the demand for  
herbal medicine. The chapters focus on  
bioactive molecules (e.g., stilbenes and p-  
toestrogens) and on medicinal plants as a  
whole (e.g., *Bacopa monnieri*). We hope  
that this book will be useful for  
researchers in academia, industry, and  
agriculture planning. *Bioactive Molecules*

MA37. This strain produces many bioactive molecules, most of which belong to carbazoles, pyrrolizidines, and fluorinated metabolites. Further probing of the metabolites of MA37 has led to the discovery of a new naphthacene-type aromatic natural product, which we have named accramycin A 1. This molecule was isolated using an HPLC-photodiode array (PDA) guided isolation process and MS/MS molecular networking. Molecules | Topical Collection : Bioactive Compounds  
A team led by scientists at Scripps Research has developed a theoretical approach that could ease the process of making highly complex, compact molecules. Such molecules are often found in plants ...
