Mozart's orchestral-inspired Sonata in D Major, K. 311 contains elaborate pianistic treatment and an exciting sonata-rondo finale with a cadenza worthy of one of Mozart's concertos. The flashy third movement is full of many contrasts involving dynamics, mood and texture. Throughout the sonata, the left hand becomes a true partner in all aspects of the composition, and thematic material is spread over different registers of the keyboard.

Pathways of Song, Volume One Hal Leonard Corporation

Document image analysis is the automatic computer interpretation of images of printed and handwritten documents, including text, drawings, maps, music scores, etc. Research in this field supports a rapidly growing international industry. This is the first book to offer a broad selection of state-

of-the-art research papers, including authoritative critical surveys of the literature, and parallel studies of the architecture of complete high-performance printed-document reading systems. A unique feature is the extended section on music notation, an ideal vehicle for international sharing of basic research. Also, the collection includes important new work on line drawings, handwriting, character and symbol recognition, and basic methodological issues. The IAPR 1990 Workshop on Syntactic and Structural Pattern Recognition is summarized, including the reports of its expert working groups, whose debates provide a fascinating perspective on the field. The book is an excellent text for a first-year graduate seminar in document

image analysis, and is likely to remain a standard reference in the field for years.

This nicely filled-out arrangement of the famous theme from Beethoven's 9th Symphony is especially appropriate as a performance piece for an intermediate level pianist, featuring elements of the symphonic work intertwined with the theme. It is presented in D major, has a wide keyboard range, and nice extremes in dynamics.
