Computational Linguistics and Intelligent Text Processing How to Meet the Web Content Accessibility Guidelines 2.0

Disability is defined by hierarchy. Regardless of culture or context, persons with disabilities are almost always pushed to the bottom of the social hierarchy. With the advent of the Convention on the Rights of Persons with Disabilities (2006), disability human rights seemingly provided a path forward for tearing down ableist social hierarchies and ensuring that all persons with disabilities everywhere were treated equally. Despite important progress, the disability human rights project not only remains incomplete, but has often created new hierarchies among persons with disabilities themselves or across the human rights it promotes. Certain groups of persons with disabilities have gained new voices while others remain silenced and certain rights are prioritized over others depending on what states, international organizations, or advocates want rather than what those on the ground need most. This volume was inspired both by the continued need to expose human rights violations against persons with disabilities, but to also explore the nuanced role that hierarchies play in the spread, implementation, and protection of disability human rights. The enjoyment of human rights is not equal nor is the recognition of specific individuals and groups' rights. In order to change this situation, inequalities across the disability human rights movement must be explored. Divided into five parts: Who counts as disabled? Political,

social, and cultural context Which rights on top, whose rights on bottom? Pushed to the periphery in the disability rights movement Representations of disability and comprised of 34 newly-written chapters including case-studies from the Anglophone Caribbean, Bangladesh, Bosnia-Herzegovina, China, Ghana, Haiti, Hungary, India, Israel, Kenya, Latin America, Poland, Russia, Scotland, Serbia and South Africa, and other countries, this book will be of interest to all scholars and students of disability studies, sociology, human rights law and social policy.

Dyslexia and Accessibility in the Modern Era: Emerging Research and Opportunities Springer Science & Business Media

Assistive technology has made it feasible for individuals with a wide range of impairments to engage in many activities, such as education and employment, in ways not previously possible. The key factor is to create consumer-driven technologies that solve the problems by addressing the needs of persons with visual impairments. Assistive Technology for Blindness and Low Vision explores a broad range of technologies that are improving the lives of these individuals. Presenting the current state of the art, this book emphasizes what can be learned from past successful products, as well as what exciting new solutions the future holds. Written by world-class leaders in their field, the chapters cover the physiological bases of vision loss and the fundamentals of orientation, mobility,

and information access for blind and low vision individuals. They discuss technology for multiple applications (mobility, wayfinding, information access, education, work, entertainment), including both established technology and cutting-edge research. The book also examines computer and digital media access and the scientific basis for the theory and practice of sensory substitution. This volume provides a holistic view of the elements to consider when designing assistive technology for persons with visual impairment, keeping in mind the need for a user-driven approach to successfully design products that are easy to use, well priced, and fill a specific need. Written for a broad audience, this book provides a comprehensive overview and in-depth descriptions of current technology for designers, engineers, practitioners, rehabilitation professionals, and all readers interested in the challenges and promises of creating successful assistive technology.

Electronic Government Taylor & Francis

Covering key areas of evaluation and methodology, client-side applications, specialist and novel technologies, along with initial appraisals of disabilities, this important book provides comprehensive coverage of web accessibility. Written by leading experts in the field, it provides an overview of existing research and also looks at future developments, providing a much deeper insight than can be obtained through existing research libraries, aggregations, or search engines.

Managing the Regulatory Environment: Guidelines for Practice Success: CRC Press

Although the digital revolution has made content available to more people than

print books ever could, ebooks are still only as accessible as the foundation they're built on—and all too often the foundation is weak. But that's changing. With the introduction of EPUB 3, publishers now have the means to create a single rich data source for audiences of all reading abilities. Through practical tips and examples, *Accessible EPUB 3* takes you inside the EPUB 3 format and explores how you can enrich and enhance content for all readers. Author Matt Garrish demystifies the process of making content easier to access, demonstrating how accessible practices are intertwined with standard content best practices. Among many techniques, this guide will teach you how to: Add structure and meaning to your publications to make them more usable by accessible technologies Tailor EPUB Navigation Documents for readers requiring either full or reduced navigation Create media overlays to synchronize human narration with text display Improve text-to-speech playback by adding SSML, PLS lexicons, and CSS3 Speech functionality

Delivering together for inclusive development Springer

This book constitutes the refereed proceedings of the 10th International Conference on Computers Helping People with Special Needs, ICCHP 2006, held in Linz, Austria, in July 2006. The 193 revised contributions presented were carefully reviewed and selected for inclusion in the book. The papers evaluate how various fields in computer science can contribute to helping people with various kinds of disabilities and impairment.

UNESCO Publishing

Assessing English Language Proficiency in U.S. K-12 Schools offers

comprehensive background information about the generation of standards-based, English language proficiency (ELP) assessments used in U.S. K-12 school settings. The chapters in this book address a variety of key issues involved in the development and use of those assessments: defining an ELP construct driven by new academic content and ELP standards, using technology for K-12 ELP assessments, addressing the needs of various English learner (EL) students taking the assessments, connecting assessment with teaching and learning, and substantiating validity claims. Each chapter also contains suggestions for future research that will contribute to the next generation of K-12 ELP assessments and improve policies and practices in the use of the assessments. This book is intended to be a useful resource for researchers, graduate students, test developers, practitioners, and policymakers who are interested in learning more about large-scale, standards-based ELP assessments for K-12 EL students.

Doing Accessible Social Research

Springer

The development of online learning

environments has enhanced the availability of educational opportunities for students. By implementing effective curriculum strategies, this ensures proper quality and instruction in online settings. The Handbook of Research on Writing and Composing in the Age of MOOCs is a critical reference source that overviews the current state of larger scale online courses and the latest competencies for teaching writing online. Featuring comprehensive coverage across a range of perspectives on teaching in virtual classrooms, such as MOOC delivery models, digital participation, and user-centered instructional design, this book is ideal for educators, professionals, practitioners, academics, and researchers interested in the latest material on writing and composition strategies for online classrooms.

City Imaging: Regeneration, Renewal and Decay IGI Global

This book shows how accessible communication, and especially easy-to-understand languages, should be designed in order to become instruments of inclusion. It examines two well-established easy-to-understand varieties: Easy Language and Plain Language, and shows that they have complementary profiles with respect to four central qualities: comprehensibility, perceptibility, acceptability and stigmatisation potential. The book introduces Easy and Plain Language and provides an outline of their linguistic, sociological and legal profiles: What is the current legal framework of Easy and Plain Language? What do the texts look like? Who are the users? Which other groups are involved in the production and use of Easy and Plain Language offers? Which qualities are a hazard to acceptability and, thus, enhance their

stigmatisation potential? The book also proposes another easy-to-understand variety: Easy Language Plus. This variety balances the four qualities and is modelled in the present book.

Code of Federal Regulations

American Dental Association

In this book, Daniela Aidley and Kriss Fearon provide a practical introduction to making it easier for everyone to take part in research. It will be invaluable to researchers from a variety of backgrounds looking to increase participation in their research, whether postgraduate students, experienced academic researchers, or practitioners.

Design for Emergency Management

Springer

Provides an overview of the federal regulations from the DEA, CDC, OSHA, HIPAA, EPA and ACA-1557 that impact the dental office. Includes quick overviews, checklists, do's and don'ts, tip sheets and FAQ on how to comply with the most common regulations that impact a dental practice.

Security in Computing and Communications IOS Press

This book examines the paradoxes, challenges, potential and problems of urban living. It understands cities as they are, rather than as they may be marketed or branded. All cities have much in common, yet the differences are important. They form the basis of both imaginative policy development and productive experiences of urban life. The phrase 'city imaging' is often used in public discourse, but rarely defined. It refers to the ways that particular cities are branded and marketed. It is based on the assumption that urban representations can be transformed to develop tourism and attract businesses and in-demand workers to one city in preference to another. However, such a

strategy is imprecise. History, subjectivity, bias and prejudice are difficult to temper to the needs of either economic development or social justice. The taste, smell, sounds and architecture of a place all combine to construct the image of a city. For researchers, policy makers, activists and citizens, the challenge is to use or transform this image. The objective of this book is to help the reader define, understand and apply this process. After a war on terror, a credit crunch and a recession, cities still do matter. Even as the de-territorialization of the worldwide web enables the free flow of money, music and ideas across national borders, cities remain important. *City Imaging: Regeneration, Renewal, Decay* surveys the iconography of urbanity and explores what happens when branding is emphasized over living.

Design and Implementation of Educational Games: Theoretical and Practical Perspectives Apress

Complete proceedings of the 15th European Conference on eGovernment Portsmouth UK Published by Academic Conferences and Publishing International Limited

Information Technology. W3C Web Content Accessibility Guidelines (WCAG) 2.0 IOS Press

Through a combination of theory, practice, and a range of interdisciplinary case studies, this book expands how we define and think about the critical role and relationship between design and emergencies. This role extends far beyond aesthetics: the book highlights the urgency of ensuring that a wide range of stakeholders and a diverse representation of the public comes together to work towards preventing disasters. Design in the context of disasters, such as earthquakes,

hurricanes, flooding and (wild) fires, provides new ways of looking at challenges. It contributes methods to actively engage communities in managing and minimizing disaster risk. Contributors present the latest research on how (collaborative) design and design thinking contribute to the development of processes and solutions to increase disaster literacy and decrease disaster risk for individuals and entire communities. Chapters highlight applied research and implementation of design and design thinking before, during, and after emergencies, resulting in a set of design guidelines derived from best practice. The book will be of interest to scholars and practitioners in emergency management, product and service design, strategic design, design research, co-design, social design, design for change, and human-centered design.

Universal Access in Human-Computer Interaction. Design Approaches and Supporting Technologies Springer

This two-volume set, consisting of LNCS 7816 and LNCS 7817, constitutes the thoroughly refereed proceedings of the 13th International Conference on Computer Linguistics and Intelligent Processing, CICLING 2013, held on Samos, Greece, in March 2013. The total of 91 contributions presented was carefully reviewed and selected for inclusion in the proceedings. The papers are organized in topical sections named: general techniques; lexical resources; morphology and tokenization; syntax and named entity recognition; word sense disambiguation and coreference resolution; semantics and discourse; sentiment, polarity, subjectivity, and opinion; machine translation and multilingualism; text mining, information extraction, and information retrieval;

text summarization; stylometry and text simplification; and applications.

E-Governance Rowman & Littlefield
Developing hand in hand with e-Business in its use of information and communication technologies (ICTs), e-Government emerged in the 1990s with the promise of a more accessible, efficient and transparent form for public institutions to perform and interact with citizens. The successes-and some critics say, general failures-of e-Government initiatives around the world have led to the development of e-Governance-a broader, more encompassing concept that involves not only public institutions but private ones as well. Taking a multidisciplinary approach, this book explores e-Governance in theory and practice with an analytical narrative from heterodox perspectives. Covering such essential issues as global governance of the Internet, the European Knowledge Economy, the transformative promise of mobile telephony, the rise of e-Universities, Internet accessibility for the disabled and e-Governance in transition economies, this book draws on contributions from experienced academics and practitioners with an expertise in an emerging field. In addition, each chapter includes such features as discussion of key issues that draw on case studies in order to facilitate significant discussion questions.

E-Government Website Development: Future Trends and Strategic Models Springer

Learn 'How to Meet the Web Content Accessibility Guidelines 2.0 I wrote this book to help you learn how to meet these important guidelines. You'll find out how an accessible website can still be beautiful, successful and fun for your users. Taking each guideline in turn,

you'll learn why it's important for users, the best way to comply, plus any tips and tricks to make your life easier. Web accessibility is an in-demand and growing skill for developers, and this book is designed to get you started, fast. "Of all the books and documents that discuss why and how to make websites more accessible, this is the one I use and recommend more than any other." - Martin Ansdell-Smith"

The Routledge International Handbook of Disability Human Rights Hierarchies PediaPress

This book constitutes the refereed proceedings of the 14th IFIP WG 8.5 International Conference on Electronic Government, EGOV 2015, held in

Thessaloniki, Greece, in August/September 2015 in conjunction with the 7th International Conference on eParticipation, ePart 2015. The 25 revised full papers presented were carefully reviewed and selected from 53 submissions. The papers have been organized in the following topical sections: foundations; open and smart government; services, processes and infrastructure; and application areas and evaluation.
