In these phenomenal essays, 14 scholars take stock of the effects and response to identity, and culture studies within Mizo literary narratives. The essays address issues that contextualize the development of subaltern and postcolonial studies and the quest for identity within the Mizo perspective. This book offers a multidisciplinary perspective, with insights from history, memory studies, cultural studies and attempt to locate and situate dynamics that are related to orality, history and narrative. Linking the concern with identity to popular literature, individualism, and the need to draw borderlines, the essays identify the most important topics in individual and collective identities in the Mizo. The illuminating essays contextualize developments within Mizo intellectual history, and display aspects that relate to the continuing force in the ongoing study of the relationship between literature, ethnography, and ethnic and cultural studies. From

orality, colonial, and postcolonial parameters, the book analyzes the ways in which colonial struggles have continued to contribute to postcolonial discourse in the Mizo, by producing fundamental ideas about the relationship between non-western and western cultures.

Vegetables make up a major portion of the diet of humans and are critical for good health. With the world population predicted to reach 9 billion people by 2050, they will play an increasingly important role in food availability. The purpose of this book is to facilitate accuracy in communication among individuals working in agriculture and a better understand of the extent and diversity of vegetable production and utilization worldwide. Increasing global economic interdependence and trade in agricultural products makes precise communication among individuals utilizing different languages essential. There is currently a wide range of vegetables shipped around the world as seasonal, economic and other forces are shifting markets from exclusively

local toward global. The text provides up-to-date scientific names, synonyms, and common names for the commercially cultivated vegetable crops grown worldwide (404 crops), in addition to information on the plant parts utilized and their method of preparation. Common names from 370 languages are presented along with information on each of the languages. The text represents an essential reference source with the information presented in a concise and readily accessible format. It allows identifying a crop from the common name in a diverse cross-section of languages and is therefore of use to university and government researchers, libraries worldwide, agricultural organizations, agricultural scientists, embassies, international travelers, vegetable growers, shippers, packers, produce buyers, grocery store managers, gourmet restaurants, chefs, and gardeners.

Three closely related languages are spoken in Truk State, Federated States of Micronesia: Trukese, Mortlockese, and Puluwatese. Trukese has by far the largest number of speakers in the Truk state. Building on the dictionary by Samuel H. Elbert, published in 1947, this dictionary represents the Trukese language as it is spoken in the lagoon islands of Truk. It also includes an introduction which covers: the languages of Truk; the alphabet; the format of an entry; morphology; syntax; and bibliography. Maps and tables.

Much of world's documentary heritage rests in vulnerable, little-known and often inaccessible archives. Many of these archives preserve information that may cast new light on historical phenomena and lead to their reinterpretation. But such rich collections are often at risk of being lost before the history they capture is recorded. This volume celebrates the tenth anniversary of the Endangered Archives Programme at the British Library, established to document and publish online formerly inaccessible and neglected archives from across the globe. *From Dust to Digital* showcases the historical significance of the collections identified, catalogued and digitised through the Programme, bringing together articles on 19 of the 244 projects supported since its inception. These contributions demonstrate the range of materials documented — including rock inscriptions, manuscripts, archival records, newspapers, photographs and sound archives — and the wide geographical scope of the Programme. Many of the documents are published here for the first time, illustrating the potential these collections have to further our understanding of history.

The advent of colonialism and its associated developments has been characterized as one of the most defining moments in the history of South Asia. The arrival of Christian missionaries has not only been coeval to colonial rule, but also associated with development in the region. Their encounter, critique, endeavour and intervention have been very critical in shaping South Asian society and culture, even where they did not succeed in converting people. Yet, there is precious little space spared for studying the role and impact of missionary enterprises than the space allotted to colonialism. Isolated individual efforts have focused on Bengal, Madras, Punjab and much remains to be addressed in the context of the unique region of the North East India. In North East India, for example, by the time the British left, a majority of the tribals had abandoned their own faith and adopted Christianity. It was a socio-cultural revolution. Yet, this aspect has remained outside the scope of history books. Whatever reading material is available is pro-Christian, mainly because they are either sponsored by the church authorities or written by ecclesiastical scholars. Very little secular research was

conducted for the hundred years of missionary endeavour in the region. The interpretations, which have emerged out of the little material available, are largely simplistic and devoid of nuances. This book is an effort to decenter such explanations by providing an informed historical and cultural appreciation of the role and contribution of missionary endeavors in British India.

These volumes replace the 1933 Supplement to the OED. The vocabulary treated is that which came into use during the publication of the successive sections of the main Dictionary -- that is, between 1884, when the first fascicle of the letter A was published, and 1928, when the final section of the Dictionary appeared -- together with accessions to the English language in Britain and abroad from 1928 to the present day. Nearly all the material in the 1933 Supplement has been retained here, though in revised form (Preface).

This is the first dictionary of Seychelles Creole to focus upon translation into English. Seychelles Creole is the mother tongue of Seychellois and the language is strongly promoted by the Seychelles Government. However, the government also recognises the global importance of English and schools teach students the language to a high degree of competence. Today, Creole remains the language most commonly used in the home and between Seychellois in all situations. However, most Seychellois are very competent in English. A reasonable command of both languages is extremely useful in Seychelles.

This edited volume adds to the literature on Myanmar and its borders by drawing attention to the significance of geography, history, politics and society in the construction of the border regions and the country. First, it alerts us to the fact that the border regions are situated in the mountainous and maritime domains of the country, highlighting the commonalities that arise from shared geography. Second, the book foregrounds socio-spatio practices — economic, intimate, spiritual, virtual — of border and boundary-making in their local context. This demonstrates how state-defined notions of territory, borders and identity are enacted or challenged. Third, despite sharing common features, Myanmar's borderscapes also possess unique configurations of ethnic, political and economic attributes, producing social formations and figured worlds that are more cohesive or militant in some border areas than in others. Understanding and comparing these social practices and their corresponding life-worlds allows us to re-examine the connections from the borderlands back to the hinterland and to consider the value of border and boundary studies in problematizing and conceptualizing recent changes in Myanmar. "This ambitious project combines sophisticated theorization of boundary-making as a form of social practice and empirical studies of Myanmar's heterogeneous borderlands, both land and sea. Seeing the

country from its edges opens up a provocative and altogether novel vision of the contestations joining diverse peripheries and centre. This volume brings together the leading scholars of the country in a collection that is a must-have for anyone interested in contemporary Myanmar, border studies, and Southeast Asia." - Itty Abraham, Head, Department of Southeast Asian Studies, National University of Singapore (NUS) "This is the first book to attempt to bring together such a diverse range of Myanmar's land and maritime border regions for comparison. In doing so, it highlights the diversity of the country's demographic, social, economic and political make-up when viewed from the margins rather than the centre. It reveals how these border regions help to constitute the nation and how they shape what modern Myanmar is today — they also give strong indicators of what it might become. This is an essential read for anyone in the social sciences interested in borderlands, as well as those requiring a broader understanding of the challenges facing the contemporary

Myanmar government as it attempts to usher in social and political cohesion following decades of conflict." -- Mandy Sadan, Reader in the History of South East Asia, School of Oriental & African Studies (SOAS)
