### OCONNOR COLTON

*Elementary English Grammar & Composition with Online Support for Class 7* S. Chand Publishing  
 In *The 7 Habits of Happy Kids*, Sean Covey uses beautifully illustrated stories to bring his family's successful philosophy to the youngest child. For the Seven Oaks friends, there is always something to do. Whether they're singing along with Pokey Porcupine's harmonica or playing soccer with Jumper Rabbit, everyone is having fun and learning all sorts of things. These seven stories show how practicing the 7 Habits makes this possible for the whole Seven Oaks Community. From learning how to take charge of their own lives to discovering how balance is best, the Seven Oaks friends have tons of adventures and find out how each and every kid can be a happy kid!

*Solution to Nutan Saral Hindi Mala Book-5* Pearson Education India

The series Science Success is meant for Pre-primary and Classes 1 to 8. It fulfills the vision of National Curriculum Framework (NCF) is meant for the schools affiliated to CBSE and other schools affiliated to various State Education Boards. This series emphasizes meaningful learning of science for the overall development of learners. It focuses on helping children understand their natural environment and correlate science with their everyday experiences in an interesting and comprehensive manner. The text has been designed with beautiful illustrations to help children develop skills of observation, investigation, and scientific attitude. Goyal Brothers Prakashan

This book is designed to equip students to navigate through MS Excel and basic data computation methods, which are essential tools in research or professional settings and in classrooms. It illustrates the concepts used in research and data analysis and economic and financial decision-making in business and in daily life. The book will help students acquire knowledge and develop skills in statistical techniques and financial analysis using MS Excel. With illustrations and examples, it will help the readers to: Visualize, present, and analyze data through MS Excel spreadsheets and tables and create personal or business spreadsheets Learn how to work with spreadsheets, use formulae, and perform calculations and analysis Create tables including Pivot Tables Become familiar with basic statistical and financial measures Design creative spread sheets and communicate effectively in business using spreadsheets and data analysis This revised and updated second edition will be an essential resource for students of economics, commerce, management, and other social science subjects, and will be useful to those studying econometrics, financial technology, basic computational techniques, data analysis, and applied economics. Content The book is developed through three phases, with each phase standing on its own as well as providing a foundation for the next. In the first phase, Excel is introduced for the students to learn entry of data, manipulation of data, carrying out operations and develop presentations. The second phase

introduces basic statistical measures of data summarisation and analysis, following which these are illustrated in Excel spreadsheets with the techniques introduced in the first phase. In addition, a few advanced tools of statistical analysis are introduced and illustrated in Excel. The third phase introduces financial measures of common use, their general computation and working them out in Excel. The book intends to illustrate the concepts used in economic and financial decision-making in business and in daily life; it helps demonstrate a deeper understanding from both theoretical and practical perspectives. An effort has been made to make the book student-friendly by using simple language and giving a number of illustrations in each chapter, solved in such a simple manner that they can be easily understood by the students. Practical questions have been included at the end of each chapter so that the students can independently solve them and test their understanding of the concepts and computations introduced in the chapter. Outcome At the end, students will be able to describe what a spreadsheet is and what Excel's capabilities are and can work with elements that make up the structure of a worksheet. They will be able to work with spreadsheets and enter data in Excel, use formulae and calculations, and create tables, charts and pivot tables. They will be familiar with basic statistical and financial measures of general use. They will be able to do basic computations in statistics and finance in Excel. Students will acquire the capacity to create personal and/or business spreadsheets following current professional and/or industry standards. Their potential for critical thinking to design and create spreadsheets and communicate in a business setting using spreadsheet vocabulary will be enhanced. In the digital age, students necessarily need to know data, data sources and how to 'dirty' their hands with data. There can be no substitute to 'talking through numbers'. The book introduces students to a variety of Indian and International data sources and teaches them how to import data-be it social, economic, financial and so on-to the Excel sheet. Once they master it, the data world is there for them to conquer! The educational background required for the student to understand the text is some basic English and Mathematics of school-leaving level. Some flair for numbers will be an asset and for them it will be a breeze; others will have to make an effort but ample illustrations and practice questions make life simple, whether it is basic statistics or slightly intricate finance!

This book foregrounds the subjectivity of 'acting women' amidst violent debates on femininity and education, livelihood and labour, sexuality and marriage. It looks at the emergence of the stage actress as an artist and an ideological construct at critical phases of performance practice in British India. The focus here is on Calcutta, considered the 'second city of the Empire' and a nodal point in global trade circuits. Each chapter offers new ways of conceptualising the actress as a professional, a colonial subject, simultaneously the other and the model of the 'new woman'. An underlying motif is the playing out of the idea of spiritual salvation, redemption and modernity. Analysing the dynamics behind stagecraft and spectacle, the study highlights the politics of demarcation and exclusion of social roles. It presents rich archival work from diverse sources, many translated for the first time. This book makes a distinctive contribution in intertwining performance studies with literary history and art practices within a cross-cultural framework. Interdisciplinary and innovative, it will appeal to scholars and researchers in South Asian theatre and performance studies, history and gender studies.

Tune in to Grammar presents a systematic and step-wise strategy for approaching grammar at any grade. The series presents grammar rules lucidly and leads the learner to assimilate and apply them to communication in everyday life. The learner is Introduced to the concept with a warm-up and led through clearly demarcated stages of acquiring proficiency in grammar. The culmination of a chapter corresponds to the learner being able to use the language in games, projects, activities and a wide range of situations which involve working individually or in groups.

Ever since the dawn of human life on this planet, Man has always sought to understand Nature, his

own place in the scheme of Creation and the purpose of Life itself. In this quest for Truth, spanning many centuries and diverse civilizations, organized religion has shaped human life and determined to a large extent, the course of history. While some religions have been based on books, claimed by their adherents to be divinely inspired, others have relied solely on human experience. Al-Qur'aan, the main source of the Islamic faith, is a book believed by Muslims, to be of completely Divine origin. Muslims also believe that it contains guidance for all mankind. Since the message of the Qur'aan is believed to be for all times, it should be relevant to every age. Does the Qur'aan pass this test? In this booklet, I intend to give an objective analysis...
