*Neues Hand-Wörterbuch der Deutschen Sprache für die Engländer und Englischen Sprache für die Deutschen*  
John Benjamins Publishing

In der folgenden Arbeit stellt der Autor dar, dass jeder Mensch in einer Art Illusion lebt, indem er glaubt, die objektive Realität mit seinen Augen bzw. Sinnen wahrnehmen zu können. Viele Menschen scheinen sich dessen nicht bewusst zu sein und verwechseln die objektive Realität mit der subjektiven. Als Symbole dienen hierbei z. B. visuelle Merkmale ('Schönheitssymbole'), die von einer Gemeinschaft mit Wertungen belegt sind ('schön'/'hässlich') oder auch Objekte, die bestimmte Gefühle auslösen, wie z.B. das Automobil, das gleichbedeutend mit Unabhängigkeit und Individualität ist. Das daraus resultierende 'Weltbild' beeinflusst nachhaltig unser Urteilsvermögen, was wiederum bedeutet, dass beides voneinander abhängig ist. Genau diese Tatsache wird von den meisten Menschen außer acht gelassen. Der Autor untersucht die Konstruktion von Wirklichkeit durch Sprache anhand der Übersetzung eines Textes vom Englischen ins Deutsche. Im Anhang folgt ein Exkurs zur Hirnforschung, der nachträglich hinzugefügt wurde und die zuvor erläuterten Untersuchungsergebnisse stützt.

This book is a study of central aspects of Weimar Classicism, written in the light of Ernst Cassirer's cultural theory. It provides a close reading of key texts, ranging across Goethe and Schiller's oeuvre as a whole, from their (philosophical) poems through their drama, prose-writing, and theoretical reflections on cultural and scientific topics. The work seeks to demonstrate the attested (but hitherto largely unanalysed) aesthetic power at the very heart of their writings, which in turn underpins their epistemological and ethical significance. The main theme of Weimar Classicism is the role of symbolism in Classicism, as distinct from the centrality of semiosis in competing cultural norms. The overall aim of the book is thus to see Weimar Classicism anew, both historically and analytically, as an enlightening context in which to reconsider many of the central tenets of contemporary (often called 'postmodern') cultural theory.

Figurative language has been regarded traditionally as situated outside the realm of grammar. However, with the advent of Cognitive Linguistics, metonymy and metaphor are now recognized as being not only ornamental rhetorical tropes but fundamental figures of thought that shape, to a considerable extent, the conceptual structure of languages. The present volume goes even beyond this insight to propose that grammar itself is metonymical in nature (Langacker) and that conceptual metonymy and metaphor leave their imprints on lexicogrammatical structure. This thesis is developed and substantiated for a wide array of languages and lexicogrammatical phenomena, such as word class meaning and word formation, case and aspect, proper names and noun phrases, predicate and clause constructions, and other metonymically and metaphorically motivated grammatical meanings and forms. The volume should be of interest to scholars and students in cognitive and functional linguistics, in particular, conceptual metonymy and metaphor theory, cognitive typology, and pragmatics.

Cassirer's conception of culture & theory of symbolism anticipated much of later cultural theory. The essays in this volume explore aspects of his thinking & demonstrate the influence that it had on later scholarship.

This collection of essays considers fundamental philosophical questions from a variety of perspectives, taking as point of departure the standpoint of Classical German thinkers Kant and Hegel with their focus on epistemic, moral, and aesthetic values as central to achievement of a meaningful human life, both as an individual and in the context of human society and culture, nature, and the universe as a whole. From this vantage point, the relationship of poetry and philosophy comes into play, and central ethical questions are raised regarding the practice of life in relation to human rights and the rights of other species.

Language structure and use are largely shaped by cognitive processes such as categorizing, framing, inferencing, associative (metonymic), and analogical (metaphorical) thinking, and - mediated through cognition - by bodily experience, emotion, perception, action, social/communicative interaction, culture, and the internal ecology of the linguistic system itself. The contributors to the present volume demonstrate how these language-independent factors motivate grammar and the lexicon in a variety of languages such as English, German, French, Italian, Hungarian, Russian, Croatian, Japanese, and Korean. The volume will be of great interest to students and scholars in cognitive and functional linguistics.

"Given the growing disenchantment, on all sides, with the 'high theory' of the 1970s and 1980s, and with the dominant master-trope of literary and cultural reflexion of the 1980s and 1990s, the extended metaphor or 'allegory', this volume offers a timely re-examination of what, according to Goethe, is a deeper mode of understanding the symbol. Via the life-long preoccupation of Ernst Cassirer with the problems of 'symbolic form', as he christened it, the papers collected here try to come to terms with the thinking of Goethe and Schiller on the symbol, and on related issues. Taken together, they attempt to elucidate the filiation of German classicism down through the nineteenth century to the present, in the belief that some of Cassirer's ideas have fed, often unacknowledged, into the mainstream of contemporary cultural theory, and that the rigour of his thought can help clear up much of the confusion in that

'theory'."
