*Globalization,
Deglobalization, and
New Paradigms in
Business* Taylor &
Francis
This book constitutes
the refereed
proceedings of the
Second International
Conference on
Innovative
Technologies and
Learning, ICITL 2020,
held in Porto, Portugal,
in November 2020. The
65 full papers
presented together

with 2 short papers
were carefully
reviewed and selected
from 127 submissions.
The papers are
organized in the
following topical
sections: Augmented
and Virtual Reality in
Education; Educational
Data Mining and
Learning Analytics;
Emerging Issues and
Trends in Education;
Innovative Learning in
Education; Online
Course and Web-Based
Environment;
Technology-Enhanced
Learning; Application
and Design of
Innovative Learning

Software; and Science, Technology, Engineering, Arts and Design, and Mathematics. Due to the Corona pandemic this event was held virtually.

Lakeland: American Psychiatric Pub
Extremely accurate prophecies about the end of the world by Our Saints. In this edition, you will find a (back-)translation of some of the prophecies and the instructions of famous Orthodox Saints and hermits. You will have the opportunity to read the words of people who have long since left this world. The words they have left, as prophecies and instructions to us poor and fools are greatly valuable in strengthening our faith and instruction and

confirmation of the authenticity and truthfulness of the Orthodox Christianity as a true path to God. Some of the translations of the texts contain specific prophecies related with the lands of Serbia, Russia and Greece. However, many of them apply to all of us, modern Orthodox Christians, as well as to all people on earth. Their words are a warning of a bleak future that awaits us and our descendants.

PoC or GTFO, Volume 3 UNESCO Publishing

A comprehensive one-volume reference on current JLFET methods, techniques, and research
Advancements in transistor technology have driven the modern smart-device

revolution—many cell phones, watches, home appliances, and numerous other devices of everyday usage now surpass the performance of the room-filling supercomputers of the past. Electronic devices are continuing to become more mobile, powerful, and versatile in this era of internet-of-things (IoT) due in large part to the scaling of metal-oxide semiconductor field-effect transistors (MOSFETs). Incessant scaling of the conventional MOSFETs to cater to consumer needs without incurring performance degradation requires costly and complex fabrication process owing to the presence of metallurgical junctions. Unlike conventional MOSFETs,

junctionless field-effect transistors (JLFETs) contain no metallurgical junctions, so they are simpler to process and less costly to manufacture. JLFETs utilize a gated semiconductor film to control its resistance and the current flowing through it. *Junctionless Field-Effect Transistors: Design, Modeling, and Simulation* is an inclusive, one-stop reference on the study and research on JLFETs. This timely book covers the fundamental physics underlying JLFET operation, emerging architectures, modeling and simulation methods, comparative analyses of JLFET performance metrics, and several other interesting facts related to JLFETs. A calibrated simulation

framework, including guidance on SentaurusTCAD software, enables researchers to investigate JLFETs, develop new architectures, and improve performance. This valuable resource: Addresses the design and architecture challenges faced by JLFET as a replacement for MOSFET Examines various approaches for analytical and compact modeling of JLFETs in circuit design and simulation Explains how to use Technology Computer-Aided Design software (TCAD) to produce numerical simulations of JLFETs Suggests research directions and potential applications of JLFETs Junctionless Field-Effect Transistors: Design, Modeling, and Simulation is an

essential resource for CMOS device design researchers and advanced students in the field of physics and semiconductor devices.

The Pixar Theory

Springer

This book constitutes the proceedings of the 8th International Conference on Big Data Analytics, BDA 2020, which took place during December 15-18, 2020, in Sonapat, India. The 11 full and 3 short papers included in this volume were carefully reviewed and selected from 48 submissions; the book also contains 4 invited and 3 tutorial papers. The contributions were organized in topical sections named as follows: data science systems; data science architectures; big data analytics in healthcare;

information interchange of Web data resources; and business analytics.

Strategies for Doubling the Farmers' Income

Bright Sparks

This book constitutes the refereed proceedings of the 4th International Conference on Innovative Technologies and Learning, ICITL 2021, held in November/December 2021. Due to COVID-19 pandemic the conference was held virtually. The 59 full papers presented together with 2 short papers were carefully reviewed and selected from 110 submissions. The papers are organized in the following topical sections: Artificial Intelligence in

Education; Augmented, Virtual and Mixed Reality in Education; Computational Thinking in Education; Design Framework and Model for Innovative learning; Education Practice Issues and Trends; Educational Gamification and Game-based Learning; Innovative Technologies and Pedagogies Enhanced Learning; Multimedia Technology Enhanced Learning; Online Course and Web-Based Environment; and Science, Technology, Engineering, Arts and Design, and Mathematics.

Using ICTs and blended learning in transforming technical and vocational education and training
Taylor & Francis
This book gathers selected papers

presented at the 2nd International Conference on Computing, Communications and Data Engineering, held at Sri Padmavati Mahila Visvavidyalayam, Tirupati, India from 1 to 2 Feb 2019. Chiefly discussing major issues and challenges in data engineering systems and computer communications, the topics covered include wireless systems and IoT, machine learning, optimization, control, statistics, and social computing.

Business and Professional Communication
Academic Press
Volume 3 of the PoC || GTFO collection--read as Proof of Concept or Get the Fuck Out--continues the series of wildly popular collections of this

hacker journal. Contributions range from humorous poems to deeply technical essays bound in the form of a bible. The International Journal of Proof-of-Concept or Get The Fuck Out is a celebrated collection of short essays on computer security, reverse engineering and retrocomputing topics by many of the world's most famous hackers. This third volume contains all articles from releases 14 to 18 in the form of an actual, bound bible. Topics include how to dump the ROM from one of the most secure Sega Genesis games ever created; how to create a PDF that is also a Git repository; how to extract the Game Boy Advance BIOS ROM; how to sniff Bluetooth Low Energy

communications with the BCC Micro:Bit; how to conceal ZIP Files in NES Cartridges; how to remotely exploit a TetriNET Server; and more. The journal exists to remind us of what a clever engineer can build from a box of parts and a bit of free time. Not to showcase what others have done, but to explain how they did it so that readers can do these and other clever things themselves.

Smartland Korea

Springer Nature

This book analyzes the changing dynamics of competition and the emergence of deglobalization trends and processes. The authors begin by explaining the role of technology on globalization and its impact on competitive strategy. Then, they

present a theoretical framework that outlines the connection between globalization and modern society. The book also delves into the shift toward deglobalization and addresses how the onset of the COVID-10 pandemic has accelerated the process. Concluding with a discussion of how the 4th Industrial Revolution has resulted in new paradigms for business, this book will fill a gap through its investigation of an emerging concept for scholars in international business.

The Indian Media

Business Periodicals Service Company

This volume critically analyzes the multiple lives of the "gamer" in India. It explores the "everyday" of the gaming life from the

player's perspective, not just to understand how the games are consumed but also to analyze how the gamer influences the products' many (virtual) lives. Using an intensive ethnographic approach and in-depth interviews, this volume situates the practice of gaming under a broader umbrella of digital leisure activities and foregrounds the proliferation of gaming as a new media form and cultural artifact; critically questions the term gamer and the many debates surrounding the gamer tag to expand on how the gaming identity is constructed and expressed; details participants' gaming habits, practices and contexts from a cultural perspective and analyzes the

participants' responses to emerging industry trends, reflections on playing practices and their relationships to friends, communities and networks in gaming spaces; and examines the offline and online spaces of gaming as sites of contestation between developers of games and the players. A holistic study covering one of the largest video game bases in the world, this volume will be of great interest to scholars and researchers of cultural studies, media and communication studies and science and technology studies, as well as be of great appeal to the general reader.

Starch Press
 This 16th International Conference on Information Technology - New Generations (ITNG), continues an annual event focusing on state of the art technologies pertaining to digital information and communications. The applications of advanced information technology to such domains as astronomy, biology, education, geosciences, security and health care are among topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine Learning, Robotics, High Performance

Computing, and Innovative Methods of Computing are examples of related topics. The conference features keynote speakers, the best student award, poster award, service award, a technical open panel, and workshops/exhibits from industry, government and academia.

 Optimize the performance of your mobile websites and webapps to the extreme. With this hands-on book, veteran mobile and web developer Maximiliano Firtman demonstrates which aspects of your site or app slow down the user's experience, and what you can do to

achieve lightning-fast performance. There's much at stake: if you want to boost your app's conversion rate, then tackling performance issues is the best way to start. Learn tools and techniques for working with responsive web design, images, the network layer, and many other ingredients—plus the metrics to check your progress. Ideal for web developers and web designers with HTML, CSS, JavaScript, and HTTP experience, this is your guide to superior mobile web performance. You'll dive into: Emulators, simulators, and other tools for measuring performance Basic web performance concepts, including metrics, charts, and goals How to get real data from

mobile browsers on your real networks APIs and specs for measuring, tracking and improving web performance Insights and tricks for optimizing the first view experience Ways to optimize post-loading experiences and future visits Responsive web design and its performance challenges Tips for extreme performance to achieve best conversion rates How to work with web views inside native apps

Innovative Technologies and Learning Arcadia Publishing
Fundamentals of Telemedicine and Telehealth provides an overview on the use of information and communication technologies (ICTs) to solve health problems,

especially for people living in remote and underserved areas. With the advent of new technologies and improvement of internet connectivity, telehealth has become a new subject requiring a new understanding of IT devices and how to utilize them to fulfill health needs. The book discusses topics such as digitizing patient information, technology requirements, existing resources, planning for telehealth projects, and primary care and specialized applications. Additionally, it discusses the use of telemedicine for patient empowerment and telecare in remote locations. Authored by IMIA Telehealth working group, this book is a valuable

source for graduate students, healthcare workers, researchers and clinicians interested in using telehealth as part of their practice or research. - Presents components of healthcare that can be benefitted from remote access and when to rely on them - Explains the current technologies and tools and how to put them to effective use in daily healthcare - Provides legal provisions for telehealth implementation, discussing the risks of remote healthcare provision and cross border care

 All three of Alex and Eva's stories now in one volume! Taken by the Billionaire

Werewolf Eva is screwed. Maybe. Okay, definitely. And in a bad, not a good, way. Her trouble-magnet little brother has gone and gotten involved with vampires...and the deal's gone bad. Now he owes them and their repayment plan involves dead bodies rather than monthly payments. Which means Eva has no choice but to approach the last person she ever wanted to for help. Alex. Her older, hot, ex-cousin from her mother's short-lived third, or was it fourth, marriage. He's also a billionaire. Hot, ripped, wealthy... Oh, yeah, and an alpha werewolf. There's just one problem. Alex Kingwood never does anything without a price... Her. For as long as he wants her.

Turned by the Billionaire Werewolf She's bartered her body to the big, bad wolf...now she's in danger of losing her heart as well. In return for dealing with her brother's vampire problem, Eva belongs to the Alpha of the Kingwood pack, and billionaire werewolf, Alex. The sex is scorching, and Alex as powerful and charismatic as she'd remembered him. An overbearing asshole she can deal with, but when the mask slips, her heart might end up a casualty of their little war too. One weekend, that's all he'd thought he needed. Now a lifetime won't be enough... Alex has Eva, the woman he's lusted after for years. Sex. That's what he'd told himself was what he

needed. He'd get her own from under his skin and get rid of her. But things don't go to plan when long-buried emotions get involved. Then someone else has issues with their arrangement, and Alex finds himself making the hardest choice of his life. Save her, kill her, or condemn her to a fate worse than death? Mated to the Billionaire Werewolf Eva has two problems; Her wolf and her lover are both avoiding her. New werewolf Eva has two problems. One, her wolf seems reluctant to make an appearance and two, Alex, her lover and alpha of the Kingwood pack, is avoiding her. Has she failed at being a wolf before she'd even begun? He bit her to save her life, so why won't he even look at

her now? If she's not a wolf, she can't be his... Biting Eva to save her life was a mistake Alex can't regret, but pack law states he has to let her go if her wolf doesn't manifest. So far, Eva's wolf seems non-existent, a fact more than one member of the pack has noticed. He has to distance himself from her, send her away, but he can't. Add in a deal he doesn't want to make with the local vampires, and Alex is ready to cut loose and deal with some issues with his claws and teeth... But pack law rules absolute and a challenge is issued that could destroy their future before it begins...

The Old Weird

Albion O'Reilly Media

This book examines the phenomenon of

prime time soap operas on Indian television. An anthropological insight into social issues and practices of contemporary India through the television, this volume analyzes the production of soaps within India's cultural fabric. It deconstructs themes and issues surrounding the "everyday" and the "middle class" through the fiction of the "popular". In its second edition, this still remains the only book to examine prime time soap operas on Indian television. Without in any way changing the central arguments of the first edition, it adds an essential introductory chapter tracking the tectonic shifts in the Indian "mediascape" over the past decade - including

how the explosion of regional language channels and an era of multiple screens have changed soap viewing forever. Meticulously researched and persuasively argued, the book traces how prime time soaps in India still grab the maximum eyeballs and remain the biggest earners for TV channels. The book will be of interest to students of anthropology and sociology, media and cultural studies, visual culture studies, gender and family studies, and also Asian studies in general. It is also an important resource for media producers, both in content production and television channels, as well as for the general reader.

"O'Reilly Media, Inc."
 "Technological Addictions is the first guide designed to provide insight and strategies to clinicians, patients, and families grappling with the collateral damage of technology's pervasiveness and pull. Mental health professionals are beginning to understand that video games, online pornography, internet gaming, internet gambling, and other technological pastimes can be every bit as addictive as substances such as alcohol, tobacco, and illicit drugs. Editor Petros Levounis is among the foremost experts on addiction and, together with coeditor James Sherer and a roster of prominent

contributors, has created a groundbreaking book that emphasizes the lived reality of the people who struggle with these addictions every day. In 10 rigorous yet down-to-earth chapters, the book explores the psychological and cultural context of each technology and related behavior, from social media to cybersex, and examines thoroughly the difference between healthy engagement with technology and addiction. This discussion premised on the understanding that technology should not be rolled back or restricted but is an increasingly beneficial and even necessary part of modern life. Two chapters specifically focus on

the way technology addictions impact particular populations, such as children and adolescents and older adults. Addiction to technology does not discriminate; no preexisting psychological or physical conditions are required, and everyone is susceptible. Technological Addictions provides guidance found nowhere else, guidance that both clinicians and laypeople will find useful and compelling"-

Programming the Mobile Web Springer Nature

"Every Pixar movie is connected. I explain how and possibly why." These are the words that began the detailed essay now known as "The Pixar Theory,"

which came out way back in 2013. It collected over 10 million views on Jon's blog alone, and was syndicated on BuzzFeed, Mashable, Huffpost, Entertainment Weekly, and more - generating over 100 million impressions and now translated into a dozen languages. Now, these thoughts and ideas first written by Jon Negroni have been fully realized inside this book, aptly named The Pixar Theory. In this book, you'll find an analysis of every single Pixar movie to date and how it tells a hidden story lurking behind these classic movies. You'll learn about how the toys of Toy Story secretly owe their existence to the events of The Incredibles. You'll learn

about what truly happened to the civilization of cars from Cars before the events of WALL-E. And of course, you'll find out the possible truth for why "Boo" of Monsters Inc. is the most important Pixar character yet.

Welcome to the Pixar Theory. Don't forget to fasten your imagination.

This encyclopedia aims to offer researchers an indication of the breadth and importance of information systems in education, including the way IT is being used, and could be used to enable learning and teaching. The encyclopedia covers all aspects of the interaction between education and information technologies, including IT in kindergartens, primary and secondary schools, universities, training colleges, industry training, distance education and further education. It also covers teaching

and computing, the use of IT in many different subject areas, the use of IT in educational administration, and national policies of IT and education.

Today's market for mobile apps goes beyond the iPhone to include BlackBerry, Nokia, Windows Phone, and smartphones powered by Android, webOS, and other platforms. If you're an experienced web developer, this book shows you how to build a standard app core that you can extend to work with specific devices. You'll learn the particulars and pitfalls of building mobile apps with HTML, CSS, and other

standard web tools. You'll also explore platform variations, finicky mobile browsers, Ajax design patterns for mobile, and much more. Before you know it, you'll be able to create mashups using Web 2.0 APIs in apps for the App Store, App World, OVI Store, Android Market, and other online retailers. Learn how to use your existing web skills to move into mobile development Discover key differences in mobile app design and navigation, including touch devices Use HTML, CSS, JavaScript, and Ajax to create effective user interfaces in the mobile environment Learn about technologies such as HTML5, XHTML MP, and WebKit extensions Understand variations of platforms

such as Symbian, BlackBerry, webOS, Bada, Android, and iOS for iPhone and iPad Bypass the browser to create offline apps and widgets using web technologies

Junctionless Field-Effect Transistors SAGE Publications Pvt. Limited

When Peter Thiel and Max Levchin launched an online payment website in 1999, they hoped their service could improve the lives of millions around the globe. But when their start-up, PayPal, survived the dot.com crash only to find itself besieged by unimaginable challenges, that dream threatened to become a nightmare. PayPal's history as told by former insider Eric

Jackson is an engrossing study of human struggle and perseverance against overwhelming odds. The entrepreneurs that Thiel and Levchin recruited to overhaul world currency markets first had to face some of the greatest trials ever thrown at a Silicon Valley company before they could make internet history. Revised and updated, this narrative is an adventure in capitalism. Reveals how PayPal went from bleeding \$10 million per month to becoming a financial powerhouse. Sheds light on eBay's current woes, and PayPal's pending showdown with Google. -- Publisher.
