Reading Graphic Design in Cultural Context explains key ways of understanding and interpreting the graphic designs we see all around us, in advertising, branding, packaging and fashion. It situates these designs in their cultural and social contexts. Drawing examples from a range of design genres, leading design historians Grace Lees-Maffei and Nicolas P. Maffei explain theories of semiotics, postmodernism and globalisation, and consider issues and debates within visual communication theory such as legibility, the relationship of word and image, gender and identity, and the impact of digital forms on design. Their discussion takes in well-known brands like Alessi, Nike, Unilever and Tate, and everyday designed things including slogan t-shirts, car advertising, ebooks, corporate logos, posters and music packaging.

The book that helped spark the retro craze for fifties architecture and introduced the term google to the world is back! First published by Chronicle in 1986, this key survey of mid-century coffee shop

and commercial architecture is still the standard work on the subject *Googie Redux* is a thoroughly revised and expanded edition of the classic and perennial top-selling book that rekindled the craze for 1950s coffee shop and commercial architecture. Long derided by critics as popular folly, the style - so named after John Lautner's eccentric Los Angeles coffee shop - was emblematic of Southern California's car-oriented architecture. By the time of the first edition's debut, these buildings were being demolished by the score. Alan Hess' 1985 *Chronicle* book did much not only to educate, legitimize, and popularize the style that characterized this endangered architecture, but it helped spark a resurgence of interest into midcentury modern design. Completely revised and significantly expanded in both text and images (some of them recently unearthed for this edition), this redesigned package features is still an entertaining and informative look at the rise, fall, and resurgence of the commercial architecture that changed the American landscape. Includes a greatly expanded guided tour of the iconic buildings in Southern California.

This book challenges current beliefs about organizational identity, reputation, and branding. It contains a wealth of new ideas for finding the elusive answers to questions troubling contemporary organizations. How does an organization create a strong reputation? These are some of the vexing problems addressed in this book by a diverse international team of contributors. According to the authors, the future lies with 'the expressive organization'. Such organizations not only understand their distinct identity and their brands, but are also able to express these externally and internally. Hello, My Name Is Awesome Routledge

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. *Brand New Justice*, now in a revised paperback edition, systematically analyses the success stories

of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.
