Designing Cities with Children and Young People focuses on promoting better outcomes in the built environment for children and young people in cities across the world. This book presents the experience of practitioners and researchers who actively advocate for and participate with children and youth in planning and designing urban environments. It aims to cultivate champions for children and young people among urban development professionals, to ensure that their rights and needs are fully acknowledged and accommodated. With international and interdisciplinary contributors, this book sets out to build bridges and provide resources for policy makers, social planners, design practitioners and students. The content moves from how we conceptualize children in the built environment, what we have discovered through research, how we frame the task and

legislate for it, and how we design for and with children. Designing Cities with Children and Young People ultimately aims to bring about change to planning and design policies and practice for the benefit of children and young people in cities everywhere.

Preventing Graffiti and Vandalism  
Cambridge University Press

Chapters written by leading authorities offer current perspectives on the origins and development of language disorders. They address the question: How can the child's linguistic environment be restructured so that children at risk can develop important adaptive skills in the domains of self-care, social interaction, and problem solving? This theory-based, but practical book emphasizes the importance of accurate definitions of subtypes for assessment and intervention. It will be of interest to students, researchers, and practitioners in the field of developmental language disorders.

Jamboree! To many

country music fans the word conjures up memories of Saturday nights around the family radio listening to live broadcasts from that haven of hillbilly music, West Virginia. From 1926 through the 1950s, as Ivan Tribe shows in his lively history, country music radio programming made the Mountain State a mecca for country singers and instrumentalists from all over America. Wilma Lee and Stoney Cooper, Little Jimmy Dickens, Hawkshaw Hawkins, Red Sovine, Blaine Smith, Curly Ray Cline, Grandpa Jones, Cowboy Loye, Rex and Eleanor Parker, Lee Moore, Buddy Starcher, Doc and Chickie Williams, and Molly O'Day were among the many who came to prominence via West Virginia radio. Wheeling's "WWVA jamboree," first broadcast in 1933, attracted a wide audience, especially after 1942, when the station increased its power. The show's success spawned numerous competitors, as new stations all over West Virginia followed WWVA's lead in headlining country music. The state also played an important role in the early recording industry. The Tweedy Brothers, Frank

Hutchison, Roy Harvey, Blind Alfred Reed, Frank Welling and John McGhee, Cap and Andy, and the Kessinger Brothers were among West Virginians whose waxings contributed to the state's reputation for fine native musicianship. So too did those who sought out and recorded the Mountaineer folksong heritage. As Nashville's dominance has grown since the 1960s, West Virginia's leadership in country music has lessened. Young performers must now seek fame outside their native state. But, as Ivan Tribe demonstrates, the state's numerous outdoor festivals continue to keep alive the heritage of country music's "mountain mama." Agreements between the mining industry and Indigenous people are not creating sustainable economic futures for Indigenous people, and this demands consideration of alternate forms of economic engagement in order to realise such futures. Within the context of three mining agreements in north Australia this study considers Indigenous livelihood

aspirations and their intersection with sustainable development agendas. The three agreements are the Yandi Land Use Agreement in the Central Pilbara in Western Australia, the Ranger Uranium Mine Agreement in the Kakadu region of the Northern Territory, and the Gulf Communities Agreement in relation to the Century zinc mine in the southern Gulf of Carpentaria in Queensland. Recent shifts in Indigenous policy in Australia seek to de-emphasise the cultural behaviour or imperatives of Indigenous people in undertaking economic action, in favour of a mainstream conventional approach to economic development. Concepts of value, identity, and community are key elements in the tension between culture and economics that exists in the Indigenous policy environment. Whilst significant diversity exists within the Indigenous polity, Indigenous aspirations for the future typically emphasise a desire for alternate forms of economic engagement that combine elements of the mainstream economy with the maintenance and enhancement of Indigenous institutions

and livelihood activities. Such aspirations reflect ongoing and dynamic responses to modernity, and typically concern the interrelated issues of access to and management of country, the maintenance of Indigenous institutions associated with family and kin, access to resources such as cash and vehicles, the establishment of robust representative organisations, and are integrally linked to the derivation of both symbolic and economic value of livelihood pursuits.

Many children and adults experience impairment of their communication skills. These communication disorders impact adversely on all aspects of these individuals' lives. In thirty dedicated chapters, *The Cambridge Handbook of Communication Disorders* examines the full range of developmental and acquired communication disorders and provides the most up-to-date and comprehensive guide to the epidemiology, aetiology and clinical features of these disorders. The volume also examines how these

disorders are assessed and treated by speech and language therapists and addresses recent theoretical developments in the field. The handbook goes beyond well-known communication disorders to include populations such as children with emotional disturbance, adults with non-Alzheimer dementias and people with personality disorders. Each chapter describes in accessible terms the most recent thinking and research in communication disorders. The volume is an ideal guide for academic researchers, graduate students and professionals in speech and language therapy.

*Teaching Primary Science*  
Constructively helps readers to create effective science learning experiences for primary students by using a constructivist approach to learning. This best-selling text explains the

principles of constructivism and their implications for learning and teaching, and discusses core strategies for developing science understanding and science inquiry processes and skills. Chapters also provide research-based ideas for implementing a constructivist approach within a number of content strands.

Throughout there are strong links to the key ideas, themes and terminology of the revised Australian Curriculum: Science. This sixth edition includes a new introductory chapter addressing readers' preconceptions and concerns about teaching primary science.

This report results from a survey of student transportation in Canada, including criteria for bussing students, costs, grants, and certain safety aspects. The report begins with an overview of the student transportation policies and practices at Canadian school boards, examining topics covered in the survey questionnaire as well as other aspects of conveyance that are of concern today.

Information is included on numbers of vehicles and students transported, types of vehicles used, and transportation administration. The report then reviews school transportation legislation and policies by province. The main section of the report provides transportation data and policy information for the school boards that responded to the survey.

THIS BOOK IS OUT FOR REPAIRS, 2/02/09. This book is organised into five chapters. First of all, the arrival of European

settlers, their impact on the aboriginal tribes of the area, and the general pattern of growth in the first half of the nineteenth century. In the next two chapters contrasting environments for growing up in nineteenth century Illawarra, looking closely at family life and schooling in the rural settlement of mid to late nineteenth century Kiama and the mining village of Bulli. The third chapter considers the slow transformation of the region into the industrial heartland of New South Wales and the consequences that this had in many ways for children growing up in the period from the turn of the century to the beginning of the second World War. Finally examining some of the multiplicity of changes that have overwhelmed the region since 1945.

**Justice of the Peace Handbook**

ANU E Press  
How well have classic ideas on whole-word phonology stood the test of time? Waterson claimed that each child has a system of their own; Ferguson and Farwell emphasised the relative accuracy of first words; Menn noted the occurrence of regression and the emergence of

phonological systematicity. This volume brings together classic texts such as these with current data-rich studies of British and American English, Arabic, Brazilian Portuguese, Finnish, French, Japanese, Polish and Spanish. This combination of classic and contemporary work from the last 30 years presents the reader with cutting-edge perspectives on child language by linking historical approaches with current ideas such as exemplar theory and usage-based phonology and contrasting state-of-the-art perspectives from developmental psychology and linguistics. This is a valuable resource for cognitive scientists, developmentalists, linguists, psychologists, speech scientists and therapists interested in understanding how children begin to use language without the benefit of language-specific innate knowledge.

HarperThorsons  
Beneath our feet unit is an ideal way to link science with literacy in the classroom. It provides opportunities for students to explore how natural processes and human activity shape their

surroundings.

*Preventing Car Theft and Crime in Car Parks*

The children from *When Frank was Four* and *Clive Eats Alligators* share their feelings. Clive laughs when he surprises his mother. Rosie runs a circus. Celeste investigates her mother's wardrobe. Frank hates his new haircut. Nicky writes in the sky. But Tessa snaps snakes.

**Earthquake Explorers**

Early stage 1: earth and beyond: weather in my world.

**The Modern Antiquarian**

Exploring the meanings and powers of love from ancient Greece to the present day, Richard Gilman-Opalsky argues that what is called “love” by the best thinkers who have approached the subject is in fact the beating heart of communism—understood as a way of living, not as a form of government.

Along the way, he reveals with clarity that the capitalist way of assigning

value to things is incapable of appreciating what humans value most. Capitalism cannot value the experiences and relationships that make our lives worth living and can only destroy love by turning it into a commodity. The *Communism of Love* follows the struggles of love in different contexts of race, class, gender, and sexuality, and shows how the aspiration for love is as close as we may get to a universal communist aspiration.
