MORIAH GUERRA

Language Rights and Cultural Diversity
Oshawa, Ont. : S & S Learning Materials
Provides ideas, lesson plans, information sheets and many follow-up activities that pertain to the local, provincial/territorial and federal government. ... [Shows] the structure of each level of government, how it functions and how the three levels interrelate.

Celebrate Autumn Diaphanes

From the author of the international bestseller *On Tyranny*, the definitive history of Hitler's and Stalin's politics of mass killing, explaining why Ukraine has been at the center of Western history for the last century. Americans call the Second World War "the Good War." But before it even began, America's ally Stalin had killed millions of his own citizens—and kept killing them during and after the war. Before Hitler was defeated, he had murdered six million Jews and nearly as many other Europeans. At war's end, German and Soviet killing sites fell behind the Iron Curtain, leaving the history of mass killing in darkness. Assiduously researched, deeply humane, and utterly definitive, *Bloodlands* is a new kind of European history, presenting the mass murders committed by the Nazi and Stalinist regimes as two aspects of a single story. With a new afterword addressing the relevance of these events to the contemporary decline of democracy, *Bloodlands* is required reading for anyone seeking to understand the central tragedy of modern history and its meaning today.

Big Book of Canadian Celebrations

Gr. 1-3 Center for Basque Studies Press
This book examines the international impact of Bolshevism in the period between the two World Wars. It explores

both the significance of the 'Bolshevik threat' in European countries and colonies, as well as its spread through the circulation of ideas and people during this period. Focusing on the interplay between international relations and domestic politics, the volume analyses the rise of Bolshevism on the international stage, incorporating insights from India and China. The chapters show how the interwar international order was challenged by the ideology, which infiltrated a range of political societies. While it was incapable of overthrowing national systems, Bolshevism constituted a credible threat, which favoured the spread of fascist and nationalist trends. Offering the first detailed account of the Bolshevik danger at an international level, the book draws on multi-national and multiarchival research to examine how the peril of Bolshevism paradoxically allowed a stabilization of the post-World War I Versailles system.

Celebrate Autumn Oshawa, Ont.: S&S Learning Materials

This eclectic and carefully organized range of essays—from women's history and settler societies to colonialism and borderlands studies—is the first collection of comparative and transnational work on women in the Canadian and U.S. Wests. It explores, expands, and advances the aspects of women's history that cross national borders. Out of the talks presented at the 2002 "Unsettled Pasts: Reconceiving the West through Women's History," Elizabeth Jameson and Sheila McManus have edited a foundational text for pioneering scholars of this emergent, interdisciplinary field. "We are stepping into unfamiliar territory." This unfamiliar territory is the borderlands of women's histories traversing the American and Canadian

West. Specialists in women's history, settler societies, colonialism, storytelling, education, and native and borderlands studies introduced by Elizabeth Jameson and Sheila McManus pool their distinct contributions toward forging the very first comparative, transnational collection of its kind. "We cannot build bridges across unmapped divides." Sixteen essays arising from the "Unsettled Pasts: Reconceiving the West through Women's History" conference at the University of Calgary comprise this foundational text. *One Step Over the Line* is not only the map; it is the bridgework to span the transnational, gendered divide—a must for readers who have been searching for a wide, inclusive perspective on our western past. Contributors: Susan Armitage, Jean Barman, Nora Faires, Cheryl Foggo, Margaret D. Jacobs, Elizabeth Jameson, Joan M. Jensen, Cynthia Loch-Drake, Sheila McManus, Laurie Mercier, Mary Murphy, Helen Raptis, Molly P. Rozum, Char Smith, Sylvia Van Kirk, Margaret Walsh

The Rise of Bolshevism and its Impact on the Interwar International Order

Napanee, Ont. : S&S Learning Materials
In this finely wrought memoir of life in postcolonial Pakistan, Suleri intertwines the violent history of Pakistan's independence with her own most intimate memories—of her Welsh mother; of her Pakistani father, prominent political journalist Z.A. Suleri; of her tenacious grandmother Dadi and five siblings; and of her own passage to the West. "Nine autobiographical tales that move easily back and forth among Pakistan, Britain, and the United States. . . She forays lightly into Pakistani history, and deeply into the history of her family and friends. . . . The Suleri women at home in Pakistan make this

book sing."—Daniel Wolfe, New York Times Book Review "A jewel of insight and beauty. . . . Suleri's voice has the same authority when she speaks about Pakistani politics as it does in her literary interludes."—Rone Tempest, Los Angeles Times Book Review "The author has a gift for rendering her family with a few, deft strokes, turning them out as whole and complete as eggs."—Anita Desai, Washington Post Book World "Meatless Days takes the reader through a Third World that will surprise and confound him even as it records the author's similar perplexities while coming to terms with the West. Those voyages Suleri narrates in great strings of words and images so rich that they left this reader . . . hungry for more."—Ron Grossman, Chicago Tribune "Dazzling. . . . Suleri is a postcolonial Proust to Rushdie's phantasmagorical Pynchon."—Henry Louise Gates, Jr., Voice Literary Supplement
Our Canadian Governments Gr. 5-8 On The Mark Press

This introduction to the world of the snail aims to bring this familiar, small creature sympathetically to life. Young children should be fascinated by this tiny life found just outside their back door.

Staged Otherness Instructional Fair
"Discover the ancient world of the Aztecs people, the island city of Tenochtitlan, the Temple Quarter, royal palaces, Montezuma the king, the Spanish Conquest and more."--Page 4 of cover.

The Amazing Aztecs Napanee, Ont. : S&S Learning Materials

This delightful occasion can be the source of fun and excitement for your students as well as a basis for learning a wide range of critical skills in literacy, math, and science. The teacher guide will provide you with background information on the origins of this holiday

to share with your students. Students are invited to explore groundhogs, shadows and the weather. The highly visual activities are student friendly, and the original stories complete with pictures to color will delight them. 21 activities Teacher guide Answer key 64 pages

The Arctic and World Order [Gimli, Man.] : Gimli Women's Institute

Turn your classroom into a great hall and celebrate Christmas with your students, medieval style. Includes information cards with follow-up activities focus on Christmas in the Middle Ages, Mumming, Medieval Traditions, St. George and the Dragon, a Christmas Feast in the Middle Ages and Saint Nicholas. Students are asked to compare a Medieval Christmas to a modern-day Christmas.

Our Canadian Governments A&C Black

There are around 6,000 living languages in the world, but as of 2012, less than 4 percent of them can claim official status in one of more of the 196 existing states. This lack of official status, along with other cultural, political, and legal factors, is contributing to a worldwide loss of linguistic diversity and cultural richness. The essays in this book explore the many facets of language rights and language protection from a variety of theoretical, legal, and academic perspectives. Important lessons are taken from the Basque case in Europe, and Native American and French-Canadian cases in North America. Woven throughout the book is the belief in the power of discourse and research to protect and even enhance linguistic diversity through legal recognition and other means. Language protection, however, is only possible if we encourage the acceptance of cultural diversity and multilingualism as a

positive outcome for the whole population of the state, not just for a minority within it. We should abandon the idea of the monolingual monocultural nation-state, and encourage the population of each country to adopt the concept of a multi-cultural state.

Lithuanian Jewish Communities S&S Learning Materials

A comprehensive and integrated introduction to the phenomena and theories of perceptual learning, focusing on the visual domain. Practice or training in perceptual tasks improves the quality of perceptual performance, often by a substantial amount. This improvement is called perceptual learning (in contrast to learning in the cognitive or motor domains), and it has become an active area of research of both theoretical and practical significance. This book offers a comprehensive introduction to the phenomena and theories of perceptual learning, focusing on the visual domain. Perceptual Learning explores the tradeoff between the competing goals of system stability and system adaptability, signal and noise, retuning and reweighting, and top-down versus bottom-down processes. It examines and evaluates existing research and potential future directions, including evidence from behavior, physiology, and brain imaging, and existing perceptual learning applications, with a focus on important theories and computational models. It also compares visual learning to learning in other perceptual domains, and considers the application of visual training methods in the development of perceptual expertise and education as well as in remediation for limiting visual conditions. It provides an integrated treatment of the subject for students and researchers and for practitioners who want to incorporate perceptual

learning into their practice. Practice or training in perceptual tasks improves the quality of perceptual performance, often by a substantial amount. This improvement is called perceptual learning, in contrast with learning in the cognitive or motor domains. Perceptual learning has been a very active area of research of both theoretical and practical interest. Research on perceptual learning is of theoretical significance in illuminating plasticity in adult perceptual systems, and in understanding the limitations of human information processing and how to improve them. It is of practical significance as a potential method for the development of perceptual expertise in the normal population, for its potential in advancing development and supporting healthy aging, and for noninvasive amelioration of deficits in challenged populations by training. Perceptual learning has become an increasingly important topic in biomedical research. Practitioners in this area include science disciplines such as psychology, neuroscience, computer sciences, and optometry, and developers in applied areas of learning game design, cognitive development and aging, and military and biomedical applications. Commercial development of training products, protocols, and games is a multi-billion dollar industry. Perceptual learning provides the basis for many of the developments in these areas. This book is written for anyone who wants to understand the phenomena and theories of perceptual learning or to apply the technology of perceptual learning to the development of training methods and products. Our aim is to provide an introduction to those researchers and students just entering this exciting field, to provide a

comprehensive and integrated treatment of the phenomena and the theories of perceptual learning for active perceptual learning researchers, and to describe and develop the basic techniques and principles for readers who want to successfully incorporate perceptual learning into applied developments. The book considers the special challenges of perceptual learning that balance the competing goals of system stability and system adaptability. It provides a systematic treatment of the major phenomena and models in perceptual learning, the determinants of successful learning and of specificity and transfer. The book provides a cohesive consideration of the broad range of perceptual learning through the theoretical framework of incremental learning of reweighting evidence that supports successful task performance. It provides a detailed analysis of the mechanisms by which perceptual learning improves perceptual limitations, the relationship of perceptual learning and the critical period of development, and the semi-supervised modes of learning that dominate perceptual learning. It considers limitations and constraints on learning multiple tasks and stimuli simultaneously, the implications of training at high or low levels of performance accuracy, and the importance of feedback to perceptual learning. The basis of perceptual learning in physiology is discussed along with the relationship of visual perceptual learning to learning in other sensory domains. The book considers the applications of perceptual learning in the development of expertise, in education and gaming, in training during development and aging, and applications to remediation of mental health and vision disorders. Finally, it

applies the phenomena and models of perceptual learning to considerations of optimizing training.

A Groundhog Celebration : Grades Two to Three : Twenty-one Activities

On The Mark Press

This volume lists, in alphabetical order, the major Jewish communities that existed in Lithuania before World War II. The name of each community is accompanied by information about it: when it was founded, the Jewish population in different years, shops and synagogues, and the names of citizens. An appendix locates each town on a map of Lithuania. Since most of the Jewish communities in Lithuania were destroyed in the Holocaust, this volume will be a valuable tool in recreating a picture of Lithuanian Jewry.

Canada Gr. 1 Basic Books

The cultural phenomenon of exhibiting non-European people in front of the European audiences in the 19th and 20th century was concentrated in the metropolises in the western part of the continent. Nevertheless, traveling ethnic troupes and temporary exhibitions of non-European humans took place also in territories located to the east of the Oder river and Austria. The contributors to this edited volume present practices of ethnographic shows in Russia, Poland, Czechia, Slovenia, Hungary, Germany, Romania, and Austria and discuss the reactions of local audiences. The essays offer critical arguments to rethink narratives of cultural encounters in the context of ethnic shows. By demonstrating the many ways in which the western models and customs were reshaped, developed, and contested in Central and Eastern European contexts, the authors argue that the dominant way of characterizing these performances as “human zoos” is too narrow. The

contributors had to tackle the difficult task of finding traces other than faint copies of official press releases by the tour organizers. The original source material was drawn from local archives, museums, and newspapers of the discussed period. A unique feature of the volume is the rich amount of images that complement every single case study of ethnic shows.

Bloodlands On The Mark Press

Relatively affluent individuals from various corners of the globe are increasingly choosing to migrate, spurred on by the promise of a better and more fulfilling way of life within their destination. Despite its increasing scale, migration academics have yet to consolidate and establish lifestyle migration as a subfield of theoretical enquiry, until now. This volume offers a dynamic and holistic analysis of contemporary lifestyle migrations, exploring the expectations and aspirations which inform and drive migration alongside the realities of life within the destination. It also recognizes the structural conditions (and constraints) which frame lifestyle migration, laying the groundwork for further intellectual enquiry. Through rich empirical case studies this volume addresses this important and increasingly common form of migration in a manner that will interest scholars of mobility, migration, lifestyle and culture across the social sciences.

All About Peru Gr. 3-5 MIT Press

Contemporary theatrical productions as diverse in form as experimental performance, new writing, West End drama, musicals and live art demonstrate a recurring fascination with adapting existing works by other artists, writers, filmmakers and stage practitioners. Featuring seventeen

interviews with internationally-renowned theatre and performance artists, *Theatre and Adaptation* provides an exceptionally rich study of the variety of work developed in recent years. First-hand accounts illuminate a diverse range of approaches to stage adaptation, ranging from playwriting to directing, Javanese puppetry to British children's theatre, and feminist performance to Japanese Noh. The transition of an existing source to the stage is not a smooth one: this collection examines the practices and the complex set of negotiations each work of transition and appropriation involves. Including interviews with Societas Raffaello Sanzio, Handspring Puppet Company, Katie Mitchell, Rimini Protokoll, Elevator Repair Service, Simon Stephens, Ong Keng Sen and Toneelgroep Amsterdam, the volume reveals performance's enduring desire to return, rewrite and repeat.

Unsettled Pasts On The Mark Press

Help children learn the systems of the human body and their functions! An excellent supplement for a textbook or comprehensive study of human

anatomy. The Human Body Homework Booklet for grades 4 to 6 is primarily a collection of true-to-life drawings of the systems of the human body. Used in conjunction with a science textbook, students can use it for practice in labeling the various parts of the human body. Also included are activities on nutrition and health. Students will have fun while gaining a firm understanding of the human body. Features:

- A pull-out answer key in the center of the book to make checking answers quick and easy.
- This book is intended to be completed by the student with little or no help from a parent or teacher, which makes it a great resource for use at home or school. Our extremely popular Homework Booklet series is a must have for any student! Great for reinforcing, reviewing, or teaching specific skills these booklets feature step-by-step practice drills with easy-to-understand directions and highlighted examples. With over 85 titles for children in preschool to high school and covering all key subjects including math, reading, social studies, grammar, foreign language, and more, students will find the extra practice they need to succeed in all subjects! Help your student today and collect all the titles in this amazing series!

It's Groundhog Day Gr. 3 Oshawa, Ont. : S&S Learning Materials

The traditional mythology of the West is dominated by male images: the fur trader, the Mountie, the missionary, the miner, the cowboy, the politician, the Chief. *Unsettled Pasts: Reconceiving the West* claims to re-examine the West through women's eyes. It draws together contributions from researchers, scholars, and academic and community activists, and seeks to create dialogue across geographic, cultural, and disciplinary boundaries. Ranging from scholarly

essays to poetry, these pieces offer the reader a sample of some of today's most innovative approaches to western Canadian women's history; several of the themes that run throughout the volume have only recently been critically addressed. By rewriting the West from the perspective of women, the contributors complicate traditional narratives of the region's past by contesting historical generalizations, thus transcending the myths and "frontier" legacies that emerged out of imperial and masculine priorities and perspectives. With Contributions by: Kristin Burnett Cristine Georgina Bye Sarah Carter Mary Leah De Zwart Lesley A. Erickson Cheryl Foggo Nadine I. Kozak Siri Louie Graham A. Macdonald Florence Melchior Patricia A. Roome Eliane Leslau Silverman Olive Stickney Aritha Van Herk Muriel Stanley Venne Cora J. Voyageur *Canada's Traditions and Celebrations* On The Mark Press

Learn about Canada's land of towering mountains, lush green forests, fertile farmlands, northern wastelands and our

mosaic of cultures with the 59 activities. *A Groundhog Celebration Gr. 2* On The Mark Press

The Arctic, long described as the world's last frontier, is quickly becoming our first frontier—the front line in a world of more diffuse power, sharper geopolitical competition, and deepening interdependencies between people and nature. A space of often-bitter cold, the Arctic is the fastest-warming place on earth. It is humanity's canary in the coal mine—an early warning sign of the world's climate crisis. The Arctic "regime" has pioneered many innovative means of governance among often-contentious state and non-state actors. Instead of being the "last white dot on the map," the Arctic is where the contours of our rapidly evolving world may first be glimpsed. In this book, scholars and practitioners—from Anchorage to Moscow, from Nuuk to Hong Kong—explore the huge political, legal, social, economic, geostrategic and environmental challenges confronting the Arctic regime, and what this means for the future of world order.
