An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a "sexual selection" distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

One of Elena Ferrante's "Best 40 books by Female Writers" This Italian bestseller is a "timeless portrait of village life in Sardinia circa 1950s" as it "tells the story of a young girl adopted by a remarkable woman who stands at the threshold of life and death" (Susan Sherman, author of *The Little Russian*). Sardinia, 1950s: Formerly beautiful and at one time betrothed to a fallen soldier, Bonaria Urrai has a long-held covenant with the dead. She is revered and feared in equal measure as the village's Accabadora, midwife to the dying, easing their suffering—and sometimes ending it. When Bonaria adopts Maria, the unloved fourth child of a widow, she tries to shield the girl from the truth about her role as an angel of mercy. Moved by the pleas of a young man crippled in an accident, she breaks her golden rule of familial consent, and in the recriminations that follow, Maria rejects her and flees Sardinia for Turin. Adrift in the big city, Maria strives as ever to find love and acceptance, but her efforts are overshadowed by the creeping knowledge of a debt unpaid, of a duty and destiny that must one day be hers. Written with intriguing subtlety, this Italian best-seller has been awarded 7 major literary prizes, including Italy's prestigious Premio Campiello.

This book is the follow-up to Thierry Groensteen's groundbreaking *The System of Comics*, in which the leading French-language comics theorist set out to investigate how the medium functions, introducing the principle of iconic solidarity, and showing the systems that underlie the articulation between panels at three levels: page layout, linear sequence, and nonsequential links woven through the comic book as a whole. He now develops that analysis further, using examples from a very wide range of comics, including the work of American artists such as Chris Ware and Robert Crumb. He tests out his theoretical framework by bringing it up against cases that challenge it, such as abstract comics, digital comics and shōjo manga, and offers insightful reflections on these innovations. In addition, he includes lengthy chapters on three areas not covered in the first book.

First, he explores the role of the narrator, both verbal and visual, and the particular issues that arise out of narration in autobiographical comics. Second, Groensteen tackles the question of rhythm in comics, and the skill demonstrated by virtuoso artists in intertwining different rhythms over and above the basic beat provided by the discontinuity of the panels. And third he resets the relationship of comics to contemporary art, conditioned by cultural history and aesthetic traditions but evolving recently as comics artists move onto avant-garde terrain.
