What have the hippies
ever done for us?
Matthew Ingram explores
the relationship between
the summer of love and
wellness, medicine, and
health. The counterculture
of the Sixties and the

Seventies is remembered
chiefly for music, fashion,
art, feminism, computing,
black power, cultural
revolt and the New Left.
But an until-now
unexplored, yet no less
important aspect -- both
in its core identity and in
terms of its ongoing
significance and impact --
is its relationship with
health. In this popular and
illuminating cultural
history of the relationship

between health and the
counterculture, Matthew
Ingram connects the dots
between the beats, yoga,
meditation, psychedelics,
psychoanalysis, Eastern
philosophy, sex, and
veganism, showing how
the hippies still have a lot
to teach us about our
wellbeing.

People from outside of Brasília often dismiss Brazil's capital as socially divided, boring, corrupt, and emotionally cold.

Apparently its founders created not a vibrant capital, but a cultural wasteland. However, as Sophia Beal argues, Brasília's contemporary artists are out to prove

the skeptics wrong. These twenty-first-century artists are changing how people think about the city and animating its public spaces. They are recasting Brasília as a vibrant city of the arts in which cultural production affirms a creative right to the city. Various genres—prose, poetry, film, cultural journalism, music, photography, graffiti, street theater, and street dance—play a part. Brasília's initial 1960s art was state-sanctioned, carried out mainly by privileged,

white men. In contrast, the capital's contemporary art is marked by its diversity, challenging norms about who has a voice within the Brasília art scene. This art demystifies the capital's inequities and imagines alternative ways of inhabiting the city.

"Squatting offers a radical but simple solution to the crises of housing, homelessness, and the lack of social space that mark contemporary society: occupying empty

buildings and rebuilding lives and communities in the process. Squatting has a long and complex history, interwoven with the changing and contested nature of urban politics over the last forty years. Squatting can be an individual strategy for shelter or a collective experiment in communal living. Squatted and self-managed social centres have contributed to the renewal of urban struggles across Europe and intersect with larger political projects. However, not all squatters

share the same goals, resources, backgrounds or desire for visibility. Squatting in Europe aims to move beyond the conventional understandings of squatting, investigating its history in Europe over the past four decades. Historical comparisons and analysis blend together in these inquiries into squatting in the Netherlands, Italy, Spain, France, Germany and England. In it members of SqEK (Squatting Europe Kollektive) explore the diverse, radical, and often

controversial nature of squatting as a form of militant research and self-managed knowledge production"--Publisher's description

Alter-globalization in Southern Europe Duke

University Press
The Squatters' Movement in Europe is the first definitive guide to squatting as an alternative to capitalism. It offers a unique insider's view on the movement - its ideals, actions and ways of life. At a time of growing crisis in Europe with high unemployment,

dwindling social housing and declining living standards, squatting has become an increasingly popular option. The book is written by an activist-scholar collective, whose members have direct experience of squatting: many are still squatters today. There are contributions from the Netherlands, Spain, the USA, France, Italy, Germany, Switzerland and the UK. In an age of austerity and precarity this book shows what has been achieved by this resilient social movement,

which holds lessons for policy-makers, activists and academics alike.

The publication of this book is a literary event. It is Miss Bishop's first volume of verse since *Poems*, which was awarded the Pulitzer Prize for Poetry in 1955. This new collection consists of two parts. Under the general heading "Brazil" are grouped eleven poems including "Manuelzinho," "The Armadillo," "Twelfth

Morning, or What You Will," "The Riverman," "Brazil, January 1, 1502" and the title poem. The second section, entitled "Elsewhere," includes others "First Death in Nova Scotia," "Manners," "Sandpiper," "From Trollope's Journal," and "Visits to St. Elizabeths." In addition to the poems there is an extraordinary story of a Nova Scotia childhood, "In the Village." Robert Lowell has recently written, "I am sure no living poet is as curious and observant as Miss Bishop. What cuts so deep

is that each poem is inspired by her own tone, a tone of large, grave tenderness and sorrowing amusement. She is too sure of herself for empty mastery and breezy plagiarism, too interested for confession and musical monotony, too powerful for mismanaged fire, and too civilized for idiosyncratic incoherence. She has a humorous, commanding genius for picking up the unnoticed, now making something sprightly and right, and now a great monument. Once her poems, each

shining, were too few. Now they are many. When we read her, we enter the classical serenity of a new country."

 The contributors to *Remapping Sound Studies* intervene in current trends and practices in sound studies by reorienting the field toward the global South. Attending to disparate aspects of sound in Africa, South and Southeast Asia, Latin America, the Middle East, Micronesia, and a Southern outpost in the

global North, this volume broadens the scope of sound studies and challenges some of the field's central presuppositions. The contributors show how approaches to and uses of technology across the global South complicate narratives of technological modernity and how sound-making and listening in diverse global settings unsettle familiar binaries of sacred/secular, private/public, human/nonhuman, male/female, and nature/culture. Exploring

a wide range of sonic phenomena and practices, from birdsong in the Marshall Islands to Zulu ululation, the contributors offer diverse ways to remap and decolonize modes of thinking about and listening to sound.  A unique study of the engineering and tools used to create Egyptian monuments • Presents a stone-by-stone analysis of key Egyptian monuments, including the statues of Ramses II and the tunnels of the Serapeum • Reveals that highly refined tools and megamachines were used in ancient Egypt From the pyramids in the north to the temples in the south, ancient artisans left their marks all over Egypt, unique marks that reveal

craftsmanship we would be hard pressed to duplicate today. Drawing together the results of more than 30 years of research and nine field study journeys to Egypt, Christopher Dunn presents a stunning stone-by-stone analysis of key Egyptian monuments, including the statue of Ramses II at Luxor and the fallen crowns that lay at its feet. His modern-day engineering expertise provides a unique view into the sophisticated technology used to create these famous monuments

in prehistoric times. Using modern digital photography, computer-aided design software, and metrology instruments, Dunn exposes the extreme precision of these monuments and the type of advanced manufacturing expertise necessary to produce them. His computer analysis of the statues of Ramses II reveals that the left and right sides of the faces are precise mirror images of each other, and his examination of the mysterious underground

tunnels of the Serapeum illuminates the finest examples of precision engineering on the planet. Providing never-before-seen evidence in the form of more than 280 photographs, Dunn's research shows that while absent from the archaeological record, highly refined tools, techniques, and even mega-machines must have been used in ancient Egypt. Oxford University Press 'The Emancipatory City is a wonderful addition to a growing literature on the

public culture of the city. In these spaces, tolerance and intolerance, difference and indifference, transgressions, resistances, and playful spontaneity erupt to give texture to urban life. The book broadens our gaze and deepens our understanding of how cities enable people to express themselves and be free' - Robert A Beauregard, New School University, New York Who are cities for? What kinds of societies might they most democratically

embody? And, how can cities be emancipatory sites? The ambivalent status of urban space in terms of emancipation, democratisation, justice and citizenship is central to recent work in urban geography, 'new' cultural geography, critical geography and postmodern planning, as well as literature on urban social justice, public space and the politics of identity. Seeking alternative and progressive visions of the emancipatory city through an exploration of the

tensions and possibilities between the freedoms and constraints offered by the city, the authors of *The Emancipatory City?* build on this wealth of current perspectives to present a critical analysis of urban experience.

For nearly 40 years, Ronald Reagan's vision--small government, lower taxes, and self-reliant individualism--has remained America's dominant political ideology. The Democratic

Party has offered no truly convincing competing vision. Instead, American liberalism has fallen under the spell of identity politics. Mark Lilla argues with acerbic wit that liberals, originally driven by a sincere desire to protect the most vulnerable Americans, have now unwittingly invested their energies in social movements rather than winning elections. This abandonment of political priorities has had dire consequences. But, with the Republican Party led by an unpredictable

demagogue and in ideological disarray, Lilla believes liberals now have an opportunity to turn from the divisive politics of identity, and offer positive ideas for a shared future. A fiercely-argued, no-nonsense book, *The Once and Future Liberal* is essential reading for our momentous times.

In *Before the Flood* Jacob Blanc traces the protest movements of rural Brazilians living in the shadow of the Itaipu dam—the largest

producer of hydroelectric power in the world. In the 1970s and 1980s, local communities facing displacement took a stand against the military officials overseeing the dam's construction, and in the context of an emerging national fight for democracy, they elevated their struggle for land into a referendum on the dictatorship itself.

Unlike the broader campaign against military rule, however, the conflict at Itaipu was premised on issues that long predated the official start of

dictatorship: access to land, the defense of rural and indigenous livelihoods, and political rights in the countryside. In their efforts against Itaipu and through conflicts among themselves, title-owning farmers, landless peasants, and the Avá-Guarani Indians articulated a rural-based vision for democracy. Through interviews and archival research—including declassified military documents and the first-ever access to the Itaipu

Binational Corporation—Before the Flood challenges the primacy of urban-focused narratives and unearths the rural experiences of dictatorship and democracy in Brazil. Squatting in Europe Simon and Schuster Design academics and practitioners are facing a multiplicity of challenges in a dynamic, complex, world moving faster than the current design paradigm which is largely tied to the values and imperatives of commercial enterprise.

Current education and practice need to evolve to ensure that the discipline of design meets sustainability drivers and equips students, teachers and professionals for the near-future. New approaches, methods and tools are urgently required as sustainability expands the context for design and what it means to be a 'designer'. Design activists, who comprise a diverse range of designers, teachers and other actors, are setting new ambitions for design. They seek to

fundamentally challenge how, where and when design can catalyse positive impacts to address sustainability. They are also challenging who can utilise the power of the design process. To date, examination of contemporary and emergent design activism is poorly represented in the literature. This book will provide a rigorous exploration of design activism that will re-vitalise the design debate and provide a solid platform for students, teachers, design

professionals and other disciplines interested in transformative (design) activism. Design Activism provides a comprehensive study of contemporary and emergent design activism. This activism has a dual aim - to make positive impacts towards more sustainable ways of living and working; and to challenge and reinvigorate design praxis. It will collate, synthesise and analyse design activist approaches, processes, methods, tools and inspirational

examples/outcomes from disparate sources and, in doing so, will create a specific canon of work to illuminate contemporary design discourse. Design Activism reveals the power of design for positive social and environmental change, design with a central activist role in the sustainability challenge. Inspired by past design activists and set against the context of global-local tensions, expressions of design activism are mapped. The nature of contemporary design

activism is explored, from individual/collective action to the infrastructure that supports it generating powerful participatory design approaches, a diverse toolbox and inspirational outcomes. This is design as a political and social act, design to enable adaptive societal capacity for co-futuring.

In Portrait of a Young Painter, the distinguished historian Mary Kay Vaughan adopts a

biographical approach to understanding the culture surrounding the Mexico City youth rebellion of the 1960s. Her chronicle of the life of painter Pepe Zúñiga counters a literature that portrays post-1940 Mexican history as a series of uprisings against state repression, injustice, and social neglect that culminated in the student protests of 1968. Rendering Zúñiga's coming of age on the margins of formal politics, Vaughan depicts midcentury Mexico City as a culture of growing

prosperity, state largesse, and a vibrant, transnationally-informed public life that produced a multifaceted youth movement brimming with creativity and criticism of convention. In an analysis encompassing the mass media, schools, politics, family, sexuality, neighborhoods, and friendships, she subtly invokes theories of discourse, phenomenology, and affect to examine the formation of Zúñiga's persona in the decades leading up to 1968. By

discussing the influences that shaped his worldview, she historicizes the process of subject formation and shows how doing so offers new perspectives on the events of 1968.

From the "heir to R. Crumb and Art

Spiegelman” (Economist), a masterful work of comics journalism about indigenous North America, resource extraction, and our debt to the natural world. The Dene have lived in the vast Mackenzie River Valley since time immemorial, by their account. To the Dene, the land owns them, not the other way around, and it is central to their livelihood and very way of being. But the subarctic Canadian Northwest Territories are home to valuable resources, including oil,

gas, and diamonds. With mining came jobs and investment, but also road-building, pipelines, and toxic waste, which scarred the landscape, and alcohol, drugs, and debt, which deformed a way of life. In *Paying the Land*, Joe Sacco travels the frozen North to reveal a people in conflict over the costs and benefits of development. The mining boom is only the latest assault on indigenous culture: Sacco recounts the shattering impact of a residential school system that aimed to “remove

the Indian from the child”; the destructive process that drove the Dene from the bush into settlements and turned them into wage laborers; the government land claims stacked against the Dene Nation; and their uphill efforts to revive a wounded culture. Against a vast and gorgeous landscape that dwarfs all human scale, *Paying the Land* lends an ear to trappers and chiefs, activists and priests, to tell a sweeping story about money, dependency, loss, and

culture—recounted in stunning visual detail by one of the greatest cartoonists alive.

Samba is Brazil's "national rhythm," the foremost symbol of its culture and nationhood. To the outsider, samba and the famous pre-Lenten carnival of which it is the centerpiece seem to showcase the country's African heritage. Within Brazil, however, samba symbolizes the racial and

cultural mixture that, since the 1930s, most Brazilians have come to believe defines their unique national identity. But how did Brazil become "the Kingdom of Samba" only a few decades after abolishing slavery in 1888? Typically, samba is represented as having changed spontaneously, mysteriously, from a "repressed" music of the marginal and impoverished to a national symbol cherished by all Brazilians. Here, however, Hermano Vianna

shows that the nationalization of samba actually rested on a long history of relations between different social groups--poor and rich, weak and powerful--often working at cross-purposes to one another. A fascinating exploration of the "invention of tradition," *The Mystery of Samba* is an excellent introduction to Brazil's ongoing conversation on race, popular culture, and national identity. Technomad Springer Planning under Pressure offers managers,

planners, consultants and students a comprehensive and authoritative guide to the Strategic Choice Approach, which has gradually been attracting worldwide recognition as a fresh, versatile and practical approach to collaborative decision-making under uncertainty. Starting from basic principles, the book uses helpful diagrams and clear explanations to demonstrate practical ways of approaching daunting decision problems; of devising possible ways forward;

and of working effectively towards agreed courses of action. Along the way, decision makers are helped to cope with diverse sources of uncertainty – technical, political, managerial – in a strategic manner. In this extended third edition, the authors have added short contributions from 21 users from seven countries. These new contributors present lessons from their varied experiences in adapting the Strategic Choice Approach to guide decision-making and

learning in settings ranging from the re-routing of a controversial city carnival procession to national policy for the management of nuclear waste.

Cosmopolis Springer Peru's Truth and Reconciliation Commission not only documented the political violence of the 1980s and 1990s but also gave Peruvians a unique opportunity to examine the causes and nature of that violence. In *Art from a Fractured Past*, scholars and artists expand on the

commission's work, arguing for broadening the definition of the testimonial to include various forms of artistic production as documentary evidence. Their innovative focus on representation offers new and compelling perspectives on how Peruvians experienced those years and how they have attempted to come to terms with the memories and legacies of violence. Their findings about Peru offer insight into questions of art, memory, and truth that

resonate throughout Latin America in the wake of "dirty wars" of the last half century. Exploring diverse works of art, including memorials, drawings, theater, film, songs, painted wooden retablos (three-dimensional boxes), and fiction, including an acclaimed graphic novel, the contributors show that art, not constrained by literal truth, can generate new opportunities for empathetic understanding and solidarity. This book aims to revisit the notion of subculture for the 21st century, reinterpreting it and extending its scope. On

the one hand, the notion of resistance is redefined and applied to contemporary practices of cultural production and entrepreneurship. On the other hand, contributors reconsider the connection of subcultures to everyday culture, exploring more mainstream forms of cultural production and

consumption across a wider range of social groups. As a consequence, this book extends the scope to look beyond the white, male, adolescent, urban cultures identified with earlier subcultural studies. Contributors also examine fusions and crossovers between Western and non-Western cultural practices.
