This book includes recent research that focuses on analog integrated circuits and covers three main topics, namely: fundamentals, synthesis and performance. Eleven chapters are divided among these three topics as follows: Chapters One to Four are a part of fundamentals. The first chapter (The Next Generation of Nanomaterials for Designing Analog Integrated Circuits) describes new directions for applying nanomaterials for the design of modern analog circuits. Chapter Two (Application of Nullors in Designing Analog Circuits for Frequency Bandwidth) uses the pathological circuit element known as a nullor to design analog integrated circuits with frequency specifications to

accomplish a desired bandwidth. Chapter Three (RC and RL to LC Circuit Conversion, and its Application in Poles and Zeros Identification) details an important property from circuit theory to estimate roots by performing conversions of passive elements. Chapter Four (Enhanced and Improved Symbolic Circuit Analysis Using MATLAB) relays the development of symbolic circuit analysis and focuses on enhancing an already developed symbolic tool to allow the symbolic analysis of large circuits. The synthesis of analog integrated circuits has been a challenge because there is no way to establish general rules to cover the gap between the behavioral and transistor circuit levels of abstraction. In this book, the second topic includes four chapters, from Five to Eight. Chapter Five (On the Synthesis of Sinusoidal Oscillators Using Nullors), just as in Chapter Two, uses the pathological circuit element known as a nullor to perform the synthesis of sinusoidal oscillators, which are quite useful in many electronic systems. Other kinds of oscillators are described in Chapter Six (Synthesis of SRCOs and Multi-Phase Oscillators from State Variables to their Implementation Using CMOS IC Technology) where the synthesis process identifies the resistor that controls the oscillating frequency and applies a state variable approach. Chapter Seven (Evolutionary Optimisation in the Design of CMOS Analog Integrated Circuits) shows the application of heuristics for circuit optimisation, and how it can be extended to bigger analog integrated circuits. Chapter Eight provides details on the synthesis and design of a CMOS harmonic mixer with output power management for narrowband and wideband wireless communications: the Bluetooth and UWB cases. The third part of this book is devoted to analog circuit performances and includes three chapters. Chapter Nine details the FPGA realisation of radio frequency (RF) power amplifier models. In this case, the system is modeled in the analog domain and implemented in the digital one. Chapter Ten (White-Box Models of Optimal-Sized Solutions of Analog Integrated Circuits) generates analytical expressions for modeling the dominant behavior of CMOS analog circuits. Finally, Chapter Eleven (Radial Basis Function Surrogate Modeling for the Accurate Design of Analog Circuits) applies modern modeling approaches to accomplish real target

specifications and to improve the design of reliable circuits.

If you believe that all students should have opportunities to write in genres of their choice but aren't sure how, Matt Glover is here to help. In *Craft and Process Studies*, Matt makes a compelling case for raising student engagement and writing quality by allowing students to choose the genre they want to write in. Then he shows you how with 17 possible units, divided into craft and process studies, that teach important writing skills while also providing opportunities for choice of genre. Matt uses a predictable structure for each unit that includes suggestions for: - applicable grade ranges - time of year to try - key unit goals and questions - mentor texts - minilesson topics - conferring goals. With key teaching points, ideas for how to fit the units into your existing curriculum, and strategies to overcome common roadblocks, Matt gives you all the specific how-to's for implementing the studies even in school settings where writing units are already set. And with 40 classroom videos, you'll see the power of this work in action.

Breakfast on Mars and 37 Other Delectable Essays will inspire students to think differently about the much-feared assignment in elementary and middle schools around the country: essay writing. Rebecca Stern's fifth-grade students were bored to death with essay writing, and the one thing Rebecca needed to inspire them—great examples appropriate for kids—was nowhere to be found. Inspired by a challenge, Rebecca joined forces with her friend, social entrepreneur Brad Wolfe, and the two came up with a terrific proposal—to gather together a collection of unconventional essays by some of the best writers around. They have compiled and edited a collection of imaginative, rule-breaking, and untraditional essays that is sure to change the way you think about the essay. Contributors include: Ransom Riggs, Kirsten Miller, Scott Westerfeld, Alan Gratz, Steve Almond, Jennifer Lou, Chris Higgins, Rita Williams-Garcia, Elizabeth Winthrop, Chris Epting, Sloane Crosley, April Sinclair, Maile Meloy, Daisy Whitney, Khalid Birdsong, Sarah Prineas, Ned Vizzini, Alane Ferguson, Lise Clavel, Mary-Ann Ochota, Steve Brezenoff, Casey Scieszka, Steven Weinberg, Michael Hearst, Clay McLeod Chapman, Gigi Amateau, Laurel Snyder, Wendy Mass, Marie Rutkoski, Sarah Darer Littman, Nick Abadzis, Michael David Lukas, Léna Roy, Craig Kielburger, Joshua Mohr, Cecil Castellucci, Joe Craig, and Ellen Sussman.

Florida is a story of astonishing growth, a state swelling from 500,000 residents at the outset of the 20th century to some 16 million at the end. As recently as mid-century, on the eve of Pearl Harbor, Florida was the smallest state in the South. At the dawn of the millennium, it is the fourth largest in the country, a megastate that was among those introducing new words into the American vernacular: space coast, climate control, growth management, retirement community, theme park, edge cities, shopping mall, boomburbs, beach renourishment, Interstate, and Internet. *Land of Sunshine, State of Dreams* attempts to understand the firestorm of change that erupted into modern Florida by examining the great social, cultural, and economic forces driving its transformation. Gary Mormino ranges far and wide across the landscape and boundaries of a place that is at

once America's southernmost state and the northernmost outpost of the Caribbean. From the capital, Tallahassee—a day's walk from the Georgia border—to Miami—a city distant but tantalizingly close to Cuba and Haiti—Mormino traces the themes of Florida's transformation: the echoes of old Dixie and a vanishing Florida; land booms and tourist empires; revolutions in agriculture, technology, and demographics; the seductions of the beach and the dynamics of a graying population; and the enduring but changing meanings of a dreamstate. Beneath the iconography of popular culture is revealed a complex and complicated social framework that reflects a dizzying passage from New Spain to Old South, New South to Sunbelt.

An important challenge to what currently masquerades as conventional wisdom regarding the teaching of writing. There seems to be widespread agreement that—when it comes to the writing skills of college students—we are in the midst of a crisis. In *Why They Can't Write*, John Warner, who taught writing at the college level for two decades, argues that the problem isn't caused by a lack of rigor, or smartphones, or some generational character defect. Instead, he asserts, we're teaching writing wrong. Warner blames this on decades of educational reform rooted in standardization, assessments, and accountability. We have done no more, Warner argues, than conditioned students to perform "writing-related simulations," which pass temporary muster but do little to help students develop their writing abilities. This style of teaching has made students passive and disengaged. Worse yet, it hasn't prepared them for writing in the college classroom. Rather than making choices and thinking critically, as writers must, undergraduates simply follow the rules—such as the five-paragraph essay—designed to help them pass these high-stakes assessments. In *Why They Can't Write*, Warner has crafted both a diagnosis for what ails us and a blueprint for fixing a broken system. Combining current knowledge of what works in teaching and learning with the most enduring philosophies of

classical education, this book challenges readers to develop the skills, attitudes, knowledge, and habits of mind of strong writers.

Love it or hate it, the five-paragraph essay is perhaps the most frequently taught form of writing in classrooms of yesterday and today. But have you ever actually seen five-paragraph essays outside of school walls? Have you ever found it in business writing, journalism, nonfiction, or any other genres that exist in the real world? Kimberly Hill Campbell and Kristi Latimer reviewed the research on the effectiveness of the form as a teaching tool and discovered that the research does not support the five-paragraph formula. In fact, research shows that the formula restricts creativity, emphasizes structure rather than content, does not improve standardized test scores, inadequately prepares students for college writing, and results in vapid writing. In *Beyond the Five-Paragraph Essay*, Kimberly and Kristi show you how to reclaim the literary essay and create a program that encourages thoughtful writing in response to literature. They provide numerous strategies that stimulate student thinking, value unique insight, and encourage lively, personal writing, including the following: Close reading (which is the basis for

writing about literature) Low-stakes writing options that support students' thinking as they read Collaboration in support of discussion, debate, and organizational structures that support writing as exploration A focus on students' writing process as foundational to content development and structure The use of model texts to write in the form of the literature students are reading and analyzing The goal of reading and writing about literature is to push and challenge our students' thinking. We want students to know that their writing can convey something important: a unique view to share, defend, prove, delight, discover, and inspire. If we want our students to be more engaged, skilled writers, we need to move beyond the five-paragraph essay.

A fresh new look for this National Book Award finalist by Pulitzer Prize-winning novelist Louise Erdrich! This is the first installment in an essential nine-book series chronicling one hundred years in the life of one Ojibwe family and includes charming interior black-and-white artwork done by the author. She was named Omakakiins, or Little Frog, because her first step was a hop. Omakakiins and her family live on an island in Lake Superior. Though there are growing numbers of white people encroaching on their land, life continues much as it always has. But the satisfying rhythms of their life are shattered when a visitor comes to their lodge one winter night, bringing with him an invisible enemy that will change things forever—but that will eventually lead Omakakiins to discover her calling. By turns moving and humorous, this novel is a breathtaking tour de force by a gifted writer. The beloved and celebrated Birchbark House series by Louise Erdrich includes *The Birchbark House*, *The Game of Silence*, *The Porcupine Year*, *Chickadee*, and *Makoons*, with more titles to come.

'If you want a picture of the future, imagine a boot stamping on a human face--forever.' *Nineteen Eighty-Four* (1949), George Orwell's final novel, was completed in difficult conditions shortly before his early death. It is one of the most influential and widely-read novels of the post-war period, and has been a huge international bestseller over many decades. Continually in print, it has long been controversial, both in its immediate Cold War context and in later history. It is in some ways a realist novel, but

in others is more akin to a work of science fiction, a dystopia or a satire. It also has strong affiliations to Gothic in its plotting, motifs and affective states. Full of horror and terror, it contains prophetic dreams and a central character who thinks of himself as a 'monster', a 'ghost' and 'already dead'. Like *Frankenstein* and *Dracula*, it is fascinated by the power of a documentary remnant addressed to an unknown reader.

A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That's what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows the rules. No crying. No snitching. Revenge. That's where Will's now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother's gun. He gets on the elevator, seventh floor, stoked. He knows who he's after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that's when Will sees that one bullet is missing.

And the only one who could have fired Shawn's gun was Shawn. Huh. Will didn't know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck's in the elevator? Just as Will's trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck's cigarette. Will doesn't know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, *Long Way Down* is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.
