In this exciting adventure mixed with amazing scientific study, a young, exuberant explorer and geoscientist journeys deep into the Amazon—where rivers boil and legends come to life. When Andrés Ruzo was just a small boy in Peru, his grandfather told him the story of a

mysterious legend: There is a river, deep in the Amazon, which boils as if a fire burns below it. Twelve years later, Ruzo—now a geoscientist—hears his aunt mention that she herself had visited this strange river. Determined to discover if the boiling river is real, Ruzo sets out on a journey deep into the Amazon. What he finds astounds him: In this long, wide, and winding river, the waters run so hot that locals brew tea in them; small animals that fall in are instantly cooked. As he studies the river, Ruzo faces challenges more complex than he had ever imaged. The

Boiling River follows this young explorer as he navigates a tangle of competing interests—local shamans, illegal cattle farmers and loggers, and oil companies. This true account reads like a modern-day adventure, complete with extraordinary characters, captivating plot twists, and jaw-dropping details—including stunning photographs and a never-before-published account about this incredible natural wonder. Ultimately, though, *The Boiling River* is about a man trying to understand the moral obligation that comes with scientific discovery—to protect a sacred

site from misuse, neglect, and even from his own discovery.

 "The first exhibition to offer a critical assessment of the artistic experimentation that took place in Mexico during the last three decades of the twentieth century. The exhibition carefully analyzes the origins and emergence of techniques, strategies, and modes of operation at a particularly significant moment of Mexican history, beginning with the 1968 Student Movement, until the Zapatista uprising in the State of Chiapas. The show includes work by a wide range of artists, including Francis Alys, Vicente Rojo, Jimmie Durham, Helen Escobedo, Julio Galán, Felipe Ehrenberg, José Bedia, Guillermo Gómez-Peña, Francisco Toledo, Carlos Amorales, Melanie Smith, and Alejandro Jodorowsky, among many others. The edition is illustrated with 612 full-color plates of the art produced during these last three decades of the twentieth century reflect the social, political and technical developments in Mexico and ranged from painting and photography to poster design, installation, performance, experimental theatre, super-8 cinema, video, music,

poetry and popular culture like the films and ephemeral actions of 'Panic' by Alejandro Jodorowsky, Pedro Friedeberg's pop art, the conceptual art, infrarealist and urban independent photography, artists books, the development of contemporary political photography, the participation of Mexican artists in Fluxus in the seventies and the contribution of Ulises Carrión to the international artist book movement and popular rock music, the pictorial battles of the eighties and the emergence of a variant of neo-conceptual art in 1990. The exhibition is curated by Olivier Debroye, Pilar García de Garmen, Cuauhtémoc Medina, Álvaro Vázquez Mantecón"--Provided by vendor.

This title examines one of the world's critical issues, the Mexican drug war. Readers will learn the historical background of this issue leading up to its current and future impact on society. Elements of Mexico's drug war such as cartels, police and government corruption, kidnappings, and The United States' involvement are discussed in detail, as are the drugs that are traded such as

marijuana, opium, heroin, methamphetamine, and ecstasy. Issues related to drug use such as child neglect and abuse, low user achievement, meth mouth, disease transmission, and its affects on children including their recruitment into cartels are covered. Legislation and programs to address drug use, such as the Merida Initiative, Controlled Substances Act, the use of paraquat, and the argument to legalize drugs are introduced. Engaging text, informative sidebars, and color photographs present information realistically, leaving readers with a thorough, honest interpretation of Mexican drug war. Features include a timeline, facts, additional resources, Web sites, a glossary, a bibliography, and an index. Essential Issues is a series in Essential Library, an imprint of ABDO Publishing Company.

 Who knows the best way to be mad? Bear stomps. Hare hops. Bobcat screams. Mouse? He just can't get it right. But when he finds the way that works for him--still and quiet--he discovers that his own way

might be the best of all. Linda Urban's story about self-expression is both sweet and sly, and Henry Cole's cast of animal friends is simply irresistible.

 Shortly after the conquest of Granada in 1492 by the Catholic kings, Muslim subjects in Spain became known derogatorily as Moriscos, Moros, Muhammadans, Hagarans, and Saracens, despite the fact that they were forced to accept the sacrament of baptism. They were relegated to the margin of Christian society, considered aliens in their own land, and subjected to strictures and persecution. In turn, the Moriscos developed their own attitude, which they expressed in an extensive literature in Aljamiado, their Spanish dialect written in Arabic script. This literature was for the most part inspired by Arabic models reiterating Islamic values through the vehicles of history, legends, epic tales, stories, wisdom sayings, and sorcery. Written mostly during the fifteenth and sixteenth centuries, Aljamiado literature is significant for the study of cultural change. Islam and the West: The Moriscos is the first comprehensive study of this long-

neglected subject. Chejne surveys and analyzes the self-expression of the Moriscos and assesses their status as a minority struggling for survival, placing them in the social context of ideological conflict, the clash of religions and cultures, and differing perceptions. This book provides a more complete picture of the literatures and cultures of medieval Spain. *Let's Explore Japan* ABDO Publishing Company

"John Paul Lederach's work in the field of conciliation and mediation is internationally recognized. He has provided consultation, training and direct mediation in a range of situations from the Miskito/Sandinista conflict in Nicaragua to Somalia, Northern Ireland, Tajikistan, and the Philippines. His influential 1997 book *Building Peace* has become a classic in the discipline. In this book, Lederach poses the question, "How do we transcend the cycles of violence that bewitch our human community while still living in them?" Peacebuilding, in his view, is both a learned skill and an art. Finding this art, he says, requires a worldview shift. Conflict professionals must envision their work as a creative act-an exercise of what

Lederach terms the "moral imagination." This imagination must, however, emerge from and speak to the hard realities of human affairs. The peacebuilder must have one foot in what is and one foot beyond what exists. The book is organized around four guiding stories that point to the moral imagination but are incomplete. Lederach seeks to understand what happened in these individual cases and how they are relevant to large-scale change. His purpose is not to propose a grand new theory. Instead he wishes to stay close to the "messiness" of real processes and change, and to recognize the serendipitous nature of the discoveries and insights that emerge along the way. overwhelmed the equally important creative process. Like most professional peacemakers, Lederach sees his work as a religious vocation. Lederach meditates on his own calling and on the spirituality that moves ordinary people to reject violence and seek reconciliation. Drawing on his twenty-five years of experience in the field he explores the evolution of his understanding of peacebuilding and points the way toward the future of the art." <http://www.loc.gov/catdir/enhancements/f>

The gods have been proven mortal and new heroes will arise as the battle continues in the sequel to Age of Myth—from the author of the Riyria Revelations and Riyria Chronicles series. In Age of Myth, fantasy master Michael J. Sullivan launched readers on an epic journey of magic and adventure, heroism and betrayal, love and loss. Now the thrilling saga continues as the human uprising is threatened by powerful enemies from without—and bitter rivalries from within. Raithe, the God Killer, may have started the rebellion by killing a Fhrey, but long-standing enmities dividing the Rhunes make it all but impossible to unite against the common foe. And even if

the clans can join forces, how will they defeat an enemy whose magical prowess renders them indistinguishable from gods? The answer lies across the sea in a faraway land populated by a reclusive and dour race who feel nothing but disdain for both Fhrey and mankind. With time running out, Persephone leads the gifted young seer Suri, the Fhrey sorceress Arion, and a small band of misfits in a desperate search for aid—a quest that will take them into the darkest depths of Elan. There, an ancient adversary waits, as fearsome as it is deadly. Magic, fantasy, and mythology collide in Michael J. Sullivan's Legends of the First Empire series: AGE OF MYTH • AGE OF SWORDS • AGE OF WAR

Appearing for the first time in English, Karl Anton Nowotny's Tlacuilolli is a classic work of Mesoamerican scholarship. A concise analysis of the pre-Columbian Borgia Group of manuscripts, it is the only synthetic interpretation of divinatory and ritual codices from Mexico. Originally published in German and unavailable to any but the most determined scholars, Tlacuilolli has nevertheless formed the foundation for subsequent scholarly works

on the codices. Its importance extends beyond the study of Mexican codices: Nowotny's sophisticated reading of these manuscripts informs our understanding of Mesoamerican culture. Of particular importance are Nowotny's corrections of errors in fact and interpretation in the Spanish edition of Eduard Seler's commentary on the Borgia Group. George A. Everett and Edward B. Sisson have translated Nowotny's masterwork into English while maintaining the flavor of the original German edition. To the core text they have added an extensive bibliography and constructed a framework of annotation that relates the principles in Tlacuilolli to current research. This edition includes a selection of eleven stunning full-color images chosen from the original catalog.

David Gibson uses 3D visual representations of sounds in a mix as a tool to explain the dynamics that can be created in a mix. This book provides an in-depth exploration into the aesthetics of what makes a great mix. Gibson's unique approach explains how to map sounds to visuals in order to create a visual framework that can be used to analyze what is going on in any mix. Once you have the framework down, Gibson then

uses it to explain the traditions that have been developed over time by great recording engineers for different styles of music and songs. You will come to understand everything that can be done in a mix to create dynamics that affect people in really deep ways. Once you understand what engineers are doing to create the great mixes they do, you can then use this framework to develop your own values as to what you feel is a good mix. Once you have a perspective on what all can be done, you have the power to be truly creative on your own – to create whole new mixing possibilities. It is all about creating art out of technology. This book goes beyond explaining what the equipment does – it explains what to do with the equipment to make the best possible mixes.

A beautiful book on the famed Chinati Foundation in Marfa, Texas The Chinati Foundation, a world-famous destination for large-scale contemporary art, was founded by Donald Judd (1928-1994) to preserve and present a select number of permanent installations that were inextricably linked to the surrounding landscape in Marfa, Texas. This handsome publication, first published in 2010 and now available with a new chapter devoted to the permanent installation by Robert Irwin that was inaugurated in 2016 and a new foreword by Jenny Moore, director of the Chinati Foundation, describes how Judd developed his ideas of the role of art and museums from the early 1960s onward, culminating in the creation of Chinati. The individual installations featured here include work by John Chamberlain, Dan Flavin, David Rabinowitch, Roni Horn, Ilya Kabakov, Richard Long, Ingólfur Arnarsson, Carl Andre, Claes Oldenburg and Coosje Van Bruggen, and John Wesley, as well as by Judd himself. The book also features a complete catalogue of the collection and
