The Other Powers

Cambridge University  
Press

Originally published in  
1972, this book examines  
the scope and possibilities  
for small states in the

conduct of their foreign  
policies. In the  
introduction the editor  
discusses the problem of  
defining the term 'small  
state' and outlines the

restraints they face and the type of international roles they play. The subsequent chapters analyse the foreign policies of Norway, the Netherlands, Switzerland, Zambia, Israel, Cyprus, Cuba, Singapore and New Zealand. In each study the author examines the factors which shape that country's foreign policy objectives, the organizational structures employed to formulate and implement foreign policy, the type and level of international involvement and the

methods used to deal with the political, economic and security issues which make up and stem from the external policies. The book will be of interest to specialists and students of government, foreign policy analysis and other branches of international relations.

*Pervasive Problems in International Arbitration*  
Kluwer Law International B.V.

"This important book will be of great interest to arbitration lawyers, international lawyers and business people, as well

as to academics, libraries, and students of dispute resolution."--Publisher's website.

Routledge

**The Guide to Construction Arbitration**

The Other Powers

This book is intended as an easily accessible desktop resource for lawyers who regularly counsel businesses when negotiating international

deals, and for those who represent the same clients in achieving a successful resolution when disputes emerge. The text is divided into chapters that follow the life cycle of an international commercial dispute as seen through the eyes of the parties, from when they agree how to resolve disputes in their contracts to the endgame of enforcement. Additionally, the appendices include a number of model submissions for further reference.--Provided by

publisher.  
Routledge  
It often seems today that no dispute is barred from resolution by arbitration. Even the fundamental question of whether a dispute falls under the exclusive jurisdiction of a judicial body may itself be arbitrable. Arbitrability is thus an elusive concept; yet a systematic study of it, as this book shows, yields innumerable guidelines and insights that are of substantial value to arbitral practice. Although the book takes the form of a collection of

essays, it is designed as a comprehensive commentary on practical issues that emerge from the idea of arbitrability. Fifteen leading academics and practitioners from Europe and the United States each explore different facets of arbitrability always with a perspective open to international developments and comparative evaluation of standards. The presentation falls into two parts: in the first the focus is on the general features of arbitrability, its

rationale and the laws applicable to it. In the second, arbitrability is specifically examined in the context of administrative, criminal, corporate, IP, financial, commercial, and criminal law. This book has its origins in an International Conference on Arbitrability held at Athens in September 2005. Seven papers presented there are here reviewed and updated, and nine others are added. The subject of the book and arbitrability and is one that is much

talked about, but seldom if ever given the in-depth treatment presented here. Arbitrators and other practitioners in the field will welcome the way the analysis moves logically from theory to practice regarding every issue, and academics will recognize a definitive treatment of arbitrability as understood and applied in the settlement of disputes today. International Arbitration Kluwer Law International B.V. A great many new developments needed to

be considered for the fourth edition of this popular book on international arbitration. To name only a few: The recent revision of Chapter 12 of the Swiss PILA which will enter into force on 1st January 2021, and in the drafting of which both authors have been heavily involved; the revision of the Legal Framework of the Court of Arbitration for Sports in Lausanne; the inclusion of more than 80 new decisions of the Federal Supreme Court, many of them sending important messages to

the arbitration community; the most recent revisions of the numerous institutional rules covered by this book, such as of the ICC,

LCIA, DIS, SCC, SIAC, HKIA, and VIAC.  
*The International Law of Investment Claims*  
This book is a codification

of the principles and rules relating to the prosecution of investment claims.
