The Vietnamese Family in Change
Routledge
"African Media, African Children' is the
title of the tenth Yearbook of the
International Clearinghouse on Children,
Youth and Media. Over the years, we have
focused attention on a wide range of
topics, but this is the first Yearbook with a

geographical focus, and a vast continent
at that. A focus on Africa seems both
timely and important. When issues about
children and media are discussed, all too
often the frame of reference is the media
culture of the Western world. There is an
urgent need for the agenda to become
open to non-Western thoughts and
intercultural approaches to a much higher
degree than is the case at present. The
essays in this volume reflect a wide-range
of issues and concerns related to
children's media culture in Africa. For
example, several address the role of
entertainment television in Addis Abba,

Ghana, South Africa, Kenya, and Zambia
and in the lives of Muslim children. Other
essays introduce us to children-centered
media from Ghana, South Africa, and
Zimbabwe, and the innovative programs
of PLAN-International. In addition to
entertainment media and children-
centered media, media education and
digital media literacy are also discussed."--

[Reconceptualising education support
services in South Africa](#) Routledge

This work is an exploration of online
learning in an undergraduate English
language and academic literacy classroom

at a university in South Africa, and theorises the need for technology in developing countries as a means of social inclusion.

African Psychology University of Hawaii Press

This scholarly book is the third volume in an NWU book series on self-directed learning and is devoted to self-directed learning research and its impact on educational practice. The importance of self-directed learning for learners in the 21st century to equip themselves with the necessary skills to take responsibility for their own learning for life cannot be over emphasised. The target audience does not only consist of scholars in the field of self-directed learning in Higher Education and the Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors. The book contributes to the discourse on creating dispositions towards self-directed learning among all learners and adds to the latest body of scholarship in terms of self-directed learning. Although from different perspectives, all chapters in the book are closely linked together around self-directed learning as a central

theme, following on the work done in Volume 1 of this series (Self-Directed Learning for the 21st Century: Implications for Higher Education) to form a rich knowledge bank of work on self-directed learning.

Nordic Voices Springer

Inclusive education has been phased into South Africa since 2001 but relies heavily upon adequate support services to support learners and teachers experiencing barriers to learning and development. This book focuses on the different levels of support provided in South African education – from School-based Support Teams to District-based Support Teams through to special and full-service schools, and how these could be reconceptualised to provide improved support to learners and teachers. Current research indicates that inclusive education is being implemented in varied and fragmented forms across the country, and the point of departure of this work is that education support services need to be improved and reconceptualised to ensure better support for inclusive education.

Commercial Directory Oxford University Press

This volume represents the work of sixteen authors, who all work at different universities and other academic institutions in the Nordic countries. It provides insight into the diversity of research being conducted in the northernmost parts of Europe.

Local Governance and ICTs in Africa AOSIS Education systems today face two major challenges: expanding the reach of education and improving its quality. Traditional solutions will not suffice, especially in the context of today's knowledge-intensive societies. The Open Educational Resources movement offers one solution for extending the reach of education and expanding learning opportunities. The goal of the movement is to equalise access to knowledge worldwide through openly and freely available online high-quality content. UNESCO has contributed to building global awareness about Open Educational Resources, through facilitating an extended conversation in cyberspace. Over the course of two years, a large and diverse international community came together in a series of online discussion forums to discuss the concept of Open

Educational Resources and its potential. In making the background papers and reports from those discussions available for the first time in print, this publication seeks to share even more widely the contributions made by so many. It is intended for all who may be intrigued by the Open Educational Resources movement - its promise and its progress.

Facilitating Reflective Learning In Higher Education AOSIS

Cinderella or Cyberella: what is the future for women in the knowledge society? Cyberella is fluent in the uses of technology, comfortable using and designing computer technology, and working in virtual spaces. Cinderella works in the basement of the knowledge society with little opportunity to reap its benefits. Promoting women's empowerment through ICTs is one of the critical development challenges of the 21st century. Nancy Hafkin and Sophia Huyer, acknowledged as leading scholars on gender and information technology, have assembled a stellar group of authors for this collection. Each essay in the collection depicts ways in which ICTs provide opportunities for women to improve their incomes, gain

awareness of their rights, and improve their own and their families' well-being. Illustrative case studies from Africa, Asia and Latin America, show the global possibilities for women's empowerment through ICTs. Other Contributors: Sonia N. Jorge, Shafika Isaacs, Shoba Arun, Richard Heeks, Sharon Morgan, Maria Garrido, Raul Roman, and Vikas Nath.

Curriculum Implementation BRILL

With case studies from nine African countries this book provides a rich understanding of the status of e-governance in Africa, assesses the effects of information and communications technologies (ICTs) on local governance, and offers a roadmap for policymakers, decision-makers, and practitioners to implement and evaluate their own e-local governance projects. With governance high on the agenda in Africa, many governments are using ICTs to introduce innovations in their structure, practices, and capacities as well as in the ways they use human capital and deliver services to citizens. However, the potential for e-governance in Africa remains largely unexploited. Progress requires infrastructure improvement, the

enactment of appropriate laws and policies, and capacity and content development. This book addresses the lack of evidence on ICTs in local governance in Africa and provides an important collection of studies and analyses on the transformative potential of ICT.

Play Across Childhood SAGE

Named one of the Ten Best Books about New York City by the New York Times
Hong Kong University Press

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Practical help for providing balanced, comprehensive literacy instruction for all students, particularly those from culturally diverse backgrounds and those who are struggling with reading and writing. This popular resource provides comprehensive, balanced, practical literacy instruction for all students in today's increasingly diverse classrooms, especially students from culturally diverse backgrounds and those struggling with reading and writing. As the Common Core raises the bar for all children, *Classrooms That Work* helps

educators meet the challenges by presenting lesson frameworks for providing reading and language arts instruction that helps all children achieve their highest literacy levels. In a clear, friendly writing style, the authors emphasize the importance of promoting the integration of phonics and literature-based process writing and reading instruction to enhance all students' learning and reading skills. The book clarifies concepts, defines key terms, and offers just the right balance of research and practical coverage to make the content complete without being overwhelming.

African Media, African Children Juta and Company Ltd

This book aims to serve as a foundational text in the emerging field of African psychology, which centers the knowledges and experience of continental African realities and postcolonial concerns in psychology. Drawing from the author's key essays as a leading thinker in the field, *African Psychology: The Emergence of a Tradition* describes this discipline's meaning and scope, as well as its epistemological and theoretical

perspectives. Part I presents the theoretical context for the book, proposing the Madiban tradition as a framework of inclusion for the study of psychology in African universities. Part 2 focuses on the epistemological, methodological, and theoretical perspectives in African psychology. Part 3 of the book introduces the reader to the field of African therapeutics, and Part 4 highlights the healing rituals and practices provided to the traumatised in contemporary Africa. The ultimate objective of the book is to give postcolonial Africans a fresh vision of themselves and their psychology and culture.

Fragments of the Present Pearson

This edited volume brings together a broad range of international science education studies, focusing on the interplay of teaching and learning science. It recognizes the complexity present in today's education, associated with major science related issues faced by society, such as climate change, diseases and pandemics, global conflicts over energy, food and water. The studies discussed in this volume are focused on presenting different opportunities to teach these

convoluted matters in order to find simplicity within the complexity and make it accessible to learners. They bring together the challenges of preparing the students of today to become scientifically informed citizens of tomorrow.

Constructing Identities in Online Communities of Practice Ontario Ministry of Education

Like most societies Vietnam has seen marked changes in family structures and dynamics this century. For Vietnam however these changes have been especially radical. After decades of French acculturation the 1940s brought sweeping economic changes and a move away from collectivism. Perhaps because of Vietnam's long isolation from the late 1970s into the early 1990s, very little has been written on the Vietnamese family. This text provides an examination of the Vietnamese family focusing on two fundamental relationships – husband-wife and parent-children – within their wider social and historical context. The author explores how and why marital partners are chosen; individual's domains within the family; reproduction and birth control; son preference; ancestor worship; and the role

of the state. As such, the study will be of interest not just to sociologists but also to those scholars looking to understand the current social transformation of Vietnam. Study and Master Life Sciences Grade 11 CAPS Study Guide African Media, African Children" African Media, African Children' is the title of the tenth Yearbook of the International Clearinghouse on Children, Youth and Media. Study and Master Geography Grade 10 CAPS Study Guide Springer Nature
Fixing the Broken Promise of Education for All, published by the UNESCO Institute for Statistics and UNICEF, presents the latest statistical evidence from administrative records and household surveys to better identify children who are out of school and the reasons for their exclusion from education. It aims to inform the policies needed to reach these children and finally deliver the promise of Education for All. Based on a series of national and regional studies and policy analysis by leading experts, the report explains why better data and cross-sector collaboration are fundamental to the design of effective

interventions to overcome the barriers facing out-of-school children and adolescents. While highlighting the way forward for system-wide policies to improve educational quality and affordability, the report also presents the information needed for targeted approaches to address the compounding effects of disadvantage faced by children caught up in armed conflict, girls, working children, children with disabilities, or members of ethnic or linguistic minorities. This report presents a roadmap to improve the data, research and policies needed to catalyse action for out-of-school children as the world embarks on a new development agenda for education.
Man and Social Process IDRC
Reflective Teaching in Higher Education is the definitive textbook for reflective teachers in higher education. Informed by the latest research in this area, the book offers extensive support for those at the start of an academic career and career-long professionalism for those teaching in higher education. Written by an international collaborative author team of higher education experts led by Paul Ashwin, Reflective Teaching in Higher

Education offers two levels of support: - practical guidance for day-to-day teaching, covering key issues such as strategies for improving learning, teaching and assessment, curriculum design, relationships, communication, and inclusion; and - evidence-informed 'principles' to aid understanding of how theories can effectively inform teaching practices, offering ways to develop a deeper understanding of teaching and learning in higher education. Case studies, activities, research briefings and annotated key readings are provided throughout. The author team: Paul Ashwin (Lancaster University, UK) | David Boud (University of Technology, Sydney, Australia) | Kelly Coate (King's Learning Institute, King's College London, UK) | Fiona Hallett (Edge Hill University, UK) | Elaine Keane (National University of Ireland, Galway, Ireland) | Kerri-Lee Krause (Victoria University, Melbourne, Australia) | Brenda Leibowitz (University of Johannesburg, South Africa) | Iain MacLaren (National University of Ireland, Galway, Ireland) | Jan McArthur (Lancaster University, UK) | Velda McCune (University of Edinburgh, UK) | Michelle Tooher

National University of Ireland, Galway, Ireland) This book forms part of the Reflective Teaching series, edited by Andrew Pollard and Amy Pollard, offering support for reflective practice in early, primary, secondary, further, vocational, university and adult sectors of education. Reflective Teaching in Higher Education and its website, www.reflectiveteaching.co.uk, promote the expertise of teaching within higher education.

Complexity and Simplicity in Science Education Bloomsbury Publishing

This revised and expanded second edition of *Implementing Inclusive Education* shows how Commonwealth countries are attempting to undertake inclusion in education, and will encourage all those charged with ensuring education for all to make certain that disabled children are fully included in all aspects of the education system.

Curriculum Theory United Nations Educational, Scientific & Cultural Organization

"Hong Kong is a fascinating place for the study of curriculum. Its schooling system is influenced by the legacies of a Chinese

tradition and British colonialism and was developed at a time when, around the world, that state was taking more responsibility for the education of young people and educational policies were increasingly influenced by the impact of globalization. To this we can add the complexities of Hong Kong as a society--one that has witnessed major political and economic changes over the past 150 years or so, and particularly since the late 1970s. The dynamics produce an intricate interplay of innovation and conservatism, globalization and localization, liberalism and authoritarianism, devolution and centralization, and many other tensions. This book provides a comprehensive introduction to curriculum as a field of study in a way which highlights its inherent dilemmas and complexities by illustrating the diverse ways in which a curriculum can be developed and analyzed. It also presents a specific analysis of the Hong Kong school curriculum and highlights the ways in which the curriculum both reflects and changes in response to broader socio-political shifts."--Publisher's website. *Fixing the Broken Promise of Education for*
