In the United States, 1,200 community colleges enroll over ten million students each year—nearly half of the nation's undergraduates. Yet fewer than 40 percent of entrants complete an undergraduate degree within six years. This fact has put pressure on community colleges to improve academic outcomes for their students. *Redesigning America's Community Colleges* is a concise, evidence-based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions. It makes a compelling case that two-year colleges can substantially increase their rates of student success, if they are willing to rethink the ways in which they organize programs of study, support services, and instruction. Community colleges were originally designed to expand college enrollments at low cost, not to maximize completion of high-quality programs of study. The result was a cafeteria-style model in which students pick courses from a bewildering array of choices, with little guidance. The authors urge administrators and faculty to reject this traditional model in favor of "guided pathways"—clearer, more educationally coherent programs of study that simplify students' choices without limiting their options and that enable them to complete credentials and advance to further education and the labor market more quickly and at less cost. Distilling a wealth of data amassed from the Community College Research Center (Teachers College, Columbia University), *Redesigning America's Community Colleges* offers a fundamental redesign of the way two-year colleges operate, stressing the integration of services and instruction into more clearly structured programs of study that support every student's goals.

 Honoring the path of a slave, this dramatic picture-book biography and concise anthology of Aesop's most child-friendly fables tells how a child born into slavery in ancient Greece found a way to speak out against injustice by using the skill and wit of his storytelling--storytelling that has survived for 2,500 years. Stunningly illustrated by two-time Caldecott Honor winner Pamela Zagarenski. The Tortoise and the Hare. The Boy Who Cried Wolf. The Fox and the Crow. Each of Aesop's stories has a lesson to tell, but Aesop's true-life story is perhaps the most inspiring tale of them all. Gracefully revealing the genesis of his tales, this true story of Aesop shows how fables not only liberated him from captivity but spread wisdom over a millennium. This is the only children's book biography about him. Includes thirteen illustrated fables: The Lion and the Mouse, The Goose and the Golden Egg, The Fox and the Crow, Town Mouse and Country Mouse, The Ant and the Grasshopper, The Dog and the Wolf, The Lion and the Statue, The Tortoise and the Hare, The Boy Who Cried Wolf, The North Wind and the Sun, The Fox and the Grapes, The Dog and the Wolf, The Lion and the Boar.

Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the world." *Golden Gulag* provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how

the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the "three strikes" law—pose profound and troubling questions for the future of California, the United States, and the world. *Golden Gulag* provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

An inside look at the 2017 Houston Astros championship season, focusing on the epic seven-game World Series, the front office decisions that built a winning team, and the resilience of the city in the wake of Hurricane Harvey. On November 1, 2017, the Houston Astros defeated the Los Angeles Dodgers in an epic seven game battle to become 2017 World Series champs. For the Astros, the combination of a magnificently played series, a 101-victory season, and the devastation Hurricane Harvey brought to their city was so incredible it might give Hollywood screenwriters pause. The nation's fourth-largest city, still reeling in the wake of disaster, was smiling again. The Astros' first-ever World Series victory is a great baseball story, but it's also the story of a major American city -- a city (and a state) that the rest of the nation doesn't always love or understand--becoming a sentimental favorite because of its grace and good will in response to the largest natural disaster in American history. The Astros' miracle season is also the fascinating tale of a thoroughly modern team. Constructed by NASA-inspired analytics, the team's data-driven system took the game to a more sophisticated level than the so-called Moneyball approach. The team's new owner, Jim Crane, bought into the system and was willing to endure humiliating seasons in the baseball wilderness with the hope, shared by few initially, that success comes to those who wait. And he was right. But no data-crunching could take credit for a team of likeable, refreshingly good-natured young men who wore "Houston Strong" patches on their jerseys and meant it--guys like shortstop Carlos Correa, who kept a photo in his locker of a Houston woman trudging through fetid water up to her knees. The Astros foundation included George Springer, a powerful slugger and rangy outfielder; third-baseman Alex Bregman, whose defensive play and clutch hitting were crucial in the series; and, of course, the stubby and tenacious second baseman Jose Altuve, the heart and soul of the team. Hurricane Season is Houston Chronicle columnist Joe Holley's moving account of this extraordinary team--and the extraordinary circumstances of their championship.

Native is about identity, soul-searching, and the never-ending journey of finding ourselves and finding God. As both a citizen of the Potawatomi Nation and a Christian, Kaitlin Curtice offers a unique perspective on these topics. In this book, she shows how reconnecting with her Potawatomi identity both informs and challenges her faith. Curtice draws on her personal journey, poetry, imagery, and stories of the Potawatomi people to address themes at the forefront of today's discussions of faith and culture in a positive and constructive way. She encourages us to embrace our own origins and to share and listen to each other's stories so we can build a more inclusive and diverse future. Each of our stories matters for the church to be truly whole. As Curtice shares what it means to experience her faith through the lens of her Indigenous heritage, she reveals that a vibrant spirituality has its origins in identity, belonging, and a sense of place.

A critical look at the diaconate in the Episcopal Church Times change, and the Order of Deacons in the Episcopal Church has

not remained static. While the book seeks to update contemporary knowledge about deacons, it also shows how the diaconate may be well positioned to lead the church into change that cuts across governance, formation, and ministry. While the institutional church struggles with its structure and purpose, working to change its reality and perception, the book suggests that there are diaconal leaders who have been working all along for this kind of change. The book chronicles ways in which one church order has grown, matured, adapted, adjusted, and is as effective as it is because of its dynamic nature. It is hoped that other orders might learn from the importance of being adaptable, contextual, and baptismal, while highlighting the primary lens deacons look through as they seek to fulfill what the church has called them to do.

Florence Kate Upton (1873-1922) was among the earliest illustrators of children's picture books. Her Golliwogg character, immediately loved by children, was the first fictional character to be mass-produced. This is the first complete and accurate account of the original Golliwogg, filling a void in the history of children's literature and in the history of dolls. Upton was also a respected artist, settling in London after studies in Paris, and this biography is a comprehensive study of her artistic career, bringing together for the first time reproductions of her major works. It therefore adds a rich and formerly unexplored chapter to the history of women in the arts.

Winner of the Kate Greenaway Medal When a young boy embarks on a journey alone . . . he trails a colony of penguins, undulates in a smack of jellyfish, clasps hands with a constellation of stars, naps for a night in a bed of clams, and follows a trail of shells, home to his tribe of friends. If Lane Smith's Caldecott Honor Book Grandpa Green was an homage to aging and the end of life, There Is a Tribe of Kids is a meditation on childhood and life's beginning. Smith's vibrant sponge-paint illustrations and use of unusual collective nouns such as smack and unkindness bring the book to life. Whimsical, expressive, and perfectly paced, this story plays with language as much as it embodies imagination, and was awarded the 2017 Kate Greenaway Medal. This title has Common Core connections.

#### *Sports Illustrated The 50th Anniversary Book* John Wiley & Sons

This colorful book celebrating fifty years of America's most prominent sports magazine is certainly more practical than hoarding 2,500 issues. The six-part book plays to the strength of the magazine: "The Stories" and "The Photographs" sections are the largest. The 35 articles are truncated, often just whetting your appetite for more. The companion book Fifty Years of Great Writing offers many of these in their full glory. On the other hand, the pictures are often bigger than they were in the magazine (or could ever have been with the smaller size). Lose minutes staring at Michael Jordan or Walter Payton frozen in midair. Examine the juxtaposition of a close play at the plate with the bizarre styles of a 60s women's track team. Try not to be swept away at a shot of Bill Russell and Wilt Chamberlain defining basketball. If you have picked up the special issues released during SI's anniversary year, you already seen a decent portion of this book. The notable new writing is Richard Hoffer's essay about the world (both sports and at large) when the magazine began in 1954 and senior editor Frank Deford's pitch-perfect introduction about why the magazine is special and how it grew up in the age of television. The section most folks will spend their coffee table moments is "The Covers," a listing of the entire magazine's cover images, both in chronological order and grouped in similar topics (Scandals, Presidents, Deja Vu). Punctuated by the best sport quotes, SI's "Signs of the Apocalypse," fascinating lists of athletes and teams that were on the cover the most times, and other sport tidbits through the ages, this area is sure to launch a thousand sport memories. Yes, all the swimsuit covers are in one place, too. One quibble: why is their "Sports Person of the Year" in the book not the same as their well-known "Sportsman of the Year?" --Doug Thomas
