A free open access ebook is available upon publication. Learn more at www.luminosoa.org. The leadership and legacy of al-Haq, from its origins in Palestine to its international impact

Established in Ramallah in 1979, al-Haq was the first Palestinian human rights organization and one of the first such organizations in the Arab world. This inside history explores how al-Haq initiated methodologies in law and practice that were ahead of its time and that proved foundational for many strands of today's human rights work in Palestine and elsewhere. Lynn Welchman looks at both al-Haq's history and legacy to explore such questions as: Why would one set up a human rights organization under military occupation? How would one go about promoting the rule of law in a Palestinian society deleteriously served by the law and with every reason to distrust those charged with implementing its protections? How would one work to educate overseas allies and

activate international law in defense of Palestinian rights? This revelatory story speaks to the practice of local human rights organizations and their impact on international groups.

Ernest Renan was one of the leading lights of the Parisian intellectual scene in the second half of the nineteenth century. A philologist, historian, and biblical scholar, he was a prominent voice of French liberalism and secularism. Today most familiar in the English-speaking world for his 1882 lecture "What Is a Nation?" and its definition of a nation as an "everyday plebiscite," Renan was a major figure in the debates surrounding the Franco-Prussian War, the Paris Commune, and the birth of the Third Republic and had a profound influence on thinkers across the political spectrum who grappled with the problem of authority and social organization in the new world wrought by the forces of modernization. *What Is a Nation? and Other Political Writings* is the first English-language anthology of Renan's political thought. Offering a broad selection of Renan's writings from

several periods of his public life, most previously untranslated, it restores Renan to his place as one of France's major liberal thinkers and gives vital critical context to his views on nationalism. The anthology illuminates the characteristics that distinguished nineteenth-century French liberalism from its English and American counterparts as well as the more controversial parts of Renan's legacy, including his analysis of colonial expansion, his views on Islam and Judaism, and the role of race in his thought. The volume contains a critical introduction to Renan's life and work as well as detailed annotations that assist in recovering the wealth and complexity of his thought.

Lucy's Legacy Holt McDougal
Russia, 1905. Behind the gates of the Karenin Palace, Sergei, son of

Anna Karenina, meets Tolstoy in his dreams and finds reminders of his mother everywhere: the almost-living portrait that the Tsar intends to acquire and the opium-infused manuscripts she wrote just before her death, one of which opens a trapdoor to a wild feminist fairytale. Across the city, Clementine, an anarchist seamstress, and Father Gapón, the charismatic leader of the proletariat, tip the country ever closer to revolution. *Boullosa* lifts the voices of coachmen, sailors, maids, and seamstresses in this playful, polyphonic, and subversive revision of the Russian revolution, told through the lens of Tolstoy's most beloved work.

"Lucy is a 3.2-million-year-old skeleton who has become the spokeswoman for human evolution. She is perhaps the best known and most studied fossil hominid of the twentieth century, the benchmark by which other discoveries of human ancestors are judged."—From *Lucy's Legacy* In his New York Times bestseller, *Lucy: The Beginnings of Humankind*, renowned paleoanthropologist

Donald Johanson told the incredible story of his discovery of a partial female skeleton that revolutionized the study of human origins. Lucy literally changed our understanding of our world and who we come from. Since that dramatic find in 1974, there has been heated debate and—most important—more groundbreaking discoveries that have further transformed our understanding of when and how humans evolved. In *Lucy's Legacy*, Johanson takes readers on a fascinating tour of the last three decades of study—the most exciting period of paleoanthropologic investigation thus far. In that time, Johanson and his colleagues have uncovered a total of 363 specimens of *Australopithecus afarensis* (Lucy's species, a transitional creature between apes and humans), spanning 400,000 years. As a result, we now have a unique fossil record of one branch of our family tree—that family being humanity—a tree that is believed to date back a staggering 7 million years. Focusing on dramatic new fossil finds and breakthrough advances in

DNA research, Johanson provides the latest answers that post-Lucy paleoanthropologists are finding to questions such as: How did Homo sapiens evolve? When and where did our species originate? What separates hominids from the apes? What was the nature of Neandertal and modern human encounters? What mysteries about human evolution remain to be solved? Donald Johanson is a passionate guide on an extraordinary journey from the ancient landscape of Hadar, Ethiopia—where Lucy was unearthed and where many other exciting fossil discoveries have since been made—to a seaside cave in South Africa that once sheltered early members of our own species, and many other significant sites. Thirty-five years after Lucy, Johanson continues to enthusiastically probe the origins of our species and what it means to be human.

Books that Changed the World The New Press
Carol Schultz Vento recounts the post-World War II years of her famous father "Dutch" Schultz. Daughters, fathers and war - three words seldom used together. In "The Hidden Legacy of World

War II: A Daughter's Journey", Carol Schultz Vento weaves life with her paratrooper father into the larger narrative of World War II and the homecoming of the Greatest Generation. The book describes the seldom told story of how the war trauma of World War II impacted one family. This personal story is combined with the author's thorough research and investigation of the reality for those World War II veterans who could not forget the horrors of war. This nonfiction work fills in the missing pieces of the commonly accepted societal view of World War II veterans as stoic and unwavering, a true but incomplete portrait of that generation of warrior. About the author: Carol Schultz Vento is a former Political Science professor and attorney. She is a graduate of Temple University and Rutgers University School of Law. She is the daughter of 82nd Airborne World War II veteran Arthur "Dutch" Schultz. Carol is a native of Philadelphia and lives in Palmyra, New Jersey. [Holt World History](#) Holt McDougal
The MacArthur grant-winning environmental justice

activist's riveting memoir of a life fighting for a cleaner future for America's most vulnerable A Smithsonian Magazine Top Ten Best Science Book of 2020 Catherine Coleman Flowers, a 2020 MacArthur "genius," grew up in Lowndes County, Alabama, a place that's been called "Bloody Lowndes" because of its violent, racist history. Once the epicenter of the voting rights struggle, today it's Ground Zero for a new movement that is also Flowers's life's work—a fight to ensure human dignity through a right most Americans take for granted: basic sanitation. Too many people, especially the rural poor, lack an affordable means of disposing cleanly of the waste from their toilets and, as a consequence, live amid filth. Flowers calls this America's dirty secret. In this "powerful and moving book" (Booklist), she tells the story of systemic class, racial, and geographic prejudice that foster Third World conditions not just in Alabama, but across America, in Appalachia, Central California, coastal Florida, Alaska, the urban Midwest, and on Native American reservations in

the West. In this inspiring story of the evolution of an activist, from country girl to student civil rights organizer to environmental justice champion at Bryan Stevenson's Equal Justice Initiative, *Flowers* shows how sanitation is becoming too big a problem to ignore as climate change brings sewage to more backyards—not only those of poor minorities.

ONE OF BARACK OBAMA'S FAVOURITE BOOKS OF THE YEAR A NUMBER ONE NEW YORK TIMES BESTSELLER LONGLISTED FOR THE NATIONAL BOOK AWARD FOR NON-FICTION
'A beautifully readable reminder of how much of our urgent, collective history resounds in places all around us that have been hidden in plain sight.' Afua Hirsch, author of *Brit(ish)* Beginning in his hometown of New Orleans, Clint Smith leads the reader on an unforgettable tour of monuments and landmarks - those that are honest about the past and those that are not - which offer an intergenerational story of how slavery has been central in shaping a

nation's collective history, and our own. It is the story of the Monticello Plantation in Virginia, the estate where Thomas Jefferson wrote letters espousing the urgent need for liberty while enslaving more than four hundred people. It is the story of the Whitney Plantation, one of the only former plantations devoted to preserving the experience of the enslaved people whose lives and work sustained it. It is the story of Angola, a former plantation-turned-maximum-security prison in Louisiana that is filled with Black men who work across the 18,000-acre land for virtually no pay. And it is the story of Blandford Cemetery, the final resting place of tens of thousands of Confederate soldiers. A deeply researched and transporting exploration of the legacy of slavery and its imprint on centuries of American history, *How the Word Is Passed* illustrates how some of our most essential stories are hidden in plain view - whether in places we might drive by on our way to work, holidays such as Juneteenth or entire neighbourhoods like downtown Manhattan, where the brutal history

of the trade in enslaved men, women and children has been deeply imprinted. *How the Word Is Passed* is a landmark book that offers a new understanding of the hopeful role that memory and history can play in making sense of the United States. Chosen as a book of the year by President Barack Obama, *The Economist*, *Time*, the *New York Times* and more, fans of *Brit(ish)* and *Natives* will be utterly captivated. What readers are saying about *How the Word Is Passed*: 'How the Word Is Passed frees history, frees humanity to reckon honestly with the legacy of slavery. We need this book.' Ibram X. Kendi, Number One *New York Times* bestselling author 'An extraordinary contribution to the way we understand ourselves.' Julian Lucas, *New York Times* Book Review 'The detail and depth of the storytelling is vivid and visceral, making history present and real.' Hope Wabuke, NPR 'This isn't just a work of history, it's an intimate, active exploration of how we're still constructing and distorting our history.'" Ron Charles, *The Washington Post* 'In re-examining neighbourhoods, holidays

and quotidian sites, Smith forces us to reconsider what we think we know about American history.' Time 'A history of slavery in this country unlike anything you've read before.' Entertainment Weekly 'A beautifully written, evocative, and timely meditation on the way slavery is commemorated in the United States.' Aren't new methods needed to combat the apocalyptic violence of al-Qaeda? Shouldn't we sacrifice some rights to

make us all safer? And if we can kill a combatant in battle, why shouldn't we torture them if it will save lives? William Schulz, Executive Director of Amnesty International USA, examines these and other fundamental questions through the prism of our new consciousness about terrorism in this provocative new book. It questions America's own ambivalent record—its tainted legacy—and addresses recent human rights violations: the imprisonment without charge of non-citizens and the violation of the Geneva Convention at Guantanamo Bay. Schulz writes, "One of Osama bin Laden's goals is to destroy the solidarity of the international community and undermine the norms and standards that have sustained that community since the end of World War II. The great irony of the post-9/11 world is that, when it comes to human rights, the United States has been doing his work for him." [World History: Human Legacy](#) Little, Brown The Scholar as Human brings together faculty from a wide range of disciplines—history; art; Africana, American, and Latinx studies; literature, law, performance and media arts, development sociology, anthropology, and Science and Technology Studies—to focus on how scholarship is informed, enlivened, deepened, and made more meaningful by each scholar's sense of identity, purpose, and place in the world. Designed to help model new paths for publicly-engaged humanities, the contributions to this groundbreaking volume are guided by one overarching question: How can scholars practice a more human scholarship? Recognizing that colleges and universities must be more

responsive to the needs of both their students and surrounding communities, the essays in *The Scholar as Human* carve out new space for public scholars and practitioners whose rigor and passion are equally important forces in their work. Challenging the approach to research and teaching of earlier generations that valorized disinterestedness, each contributor here demonstrates how they have energized their own scholarship and its reception among their students and in the wider world through a deeper engagement with their own life stories and humanity. Resonances: Engaging Music in Its Cultural Context offers a fresh curriculum for the college-level music appreciation course. The musical examples are drawn from classical, popular, and folk traditions from around the globe. These examples are organized into thematic chapters, each of which explores a particular way in which human beings use music. Topics include storytelling, political expression, spirituality, dance, domestic entertainment, and more. The chapters and examples can be taught in any order, making *Resonances* a flexible resource that can be adapted to your teaching or learning needs. This textbook is accompanied by a complete set of PowerPoint slides, a test bank, and learning objectives.

History in the Making Holt Rinehart Winston

This compilation of reader response to Jonathan Edwards, spanning 276 years, includes a reprint of two earlier works ? *Jonathan Edwards: A Reference Guide* (1981) and *Jonathan Edwards: An Annotated Bibliography* (1994) ? and the publication of a third, a

gathering of commentary from 1994 to 2005. Nearly 140 essays have been added to the first and second works, while the last new gathering ? which includes a celebration of the tercentenary of Edwards??'s birth ? adds another 700 to the whole. The text preserves the pattern of arranging items alphabetically within a given year and of recording cross-references. Essays in a collection are annotated serially rather than alphabetically. Each of the three sections is self-contained with an introduction and annotated bibliography of its own. Adding to the immense value of this work to Edwards scholars are the chronology of Edwards??'s works, listed by date and by short and long title, which precedes the entire work, and the three comprehensive indexes ? of authors and titles, of subjects, and additions to the previous volumes.

Waste Holt McDougal
A New York Times Notable Book of 2014 We are doomed to repeat history if we fail to learn from it, but how are we affected by the forces that are invisible to us? What role does Neanderthal DNA

play in our genetic makeup? How did the theory of eugenics embraced by Nazi Germany first develop? How is trust passed down in Africa, and silence inherited in Tasmania? How are private companies like Ancestry.com uncovering, preserving and potentially editing the past? In *The Invisible History of the Human Race*, Christine Kenneally reveals that, remarkably, it is not only our biological history that is coded in our DNA, but also our social history. She breaks down myths of determinism and draws on cutting-edge research to explore how both historical artefacts and our DNA tell us where we have come from and where we may be going.

Supremacy Chrome Publishing Company U.S. History is designed to meet the scope and sequence requirements of most introductory courses. The text provides a balanced approach to

U.S. history, considering the people, events, and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience). U.S. History covers key forces that form the American experience, with particular attention to issues of race, class, and gender.

[The Chrome e-Manuscripts](#) Penguin Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic"

profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.
