Donna Williams' challenging book, written by an autistic person for people with autism and related disorders, carers, and the professionals who work with them, is a practical handbook to understanding, living with and working with autism. Exploring autism from the inside, it shows clearly how the behaviours associated with autism can have a range of different causes, and in many cases reflect the autistic person's

attempt to gain control over their internal world. The sensory and perceptual problems that challenge a person with autism are described in depth, together with strategies for tackling them so as to enable that person to take more control of their lives. Donna Williams comments on the various approaches to autism, drawing out those strategies that are of real use, and explaining why some approaches may prove counterproductive, leaving the autistic person feeling even more isolated and misunderstood. Taking the view that understanding autism is the key to managing the condition, Donna Williams' book will bring illumination to all those who have felt

baffled and frustrated by the outside appearance of autism. It contains a wealth of helpful suggestions, insights and new ideas, exploding old myths and promoting a view that all those involved with autism will find empowering and creative.

The majority of Vision Rehabilitation Professionals who teaches clients how to use their remaining field of view is constantly asked to recommend the right book to explain eye Diseases. Although there are several great textbooks on the visual field available, none seems to meet the need and standard of vision rehabilitation professionals to satisfy their clients' needs.

This book is therefore the prescription that encompasses the major topics of eye disease in relation to low vision, orientation and mobility specialists and vision therapy. This book answers all the questions about the anatomy, physiology, pathophysiology, pathology, treatment, prevention and vision rehabilitation therapy of any abnormally of the eye. This book can serve as a companion text for not only vision rehabilitation professional but also all medical or blindness students along with family.

'Market Harborough, and Inside the Bar' is an adventure novel written by G. J. Whyte-Melville and illustrated

by John Charlton. The story follows the life of Mr. Sawyer, who the author describes as "...a well-built, able-bodied personage, standing five feet eight in the worsted stockings he usually affects, with a frame admirably calculated to resist fatigue, to perform feats of strength rather than agility, and to put on beef: the last tendency he keeps down with constant and severe exercise, so that the twelve stone which he swings into his saddle is seldom exceeded by a pound."

*Inside Canadian Intelligence* Mark Prussian

This is the first book for the general public, written by a physician, to guide you through what really happens in the Emergency

Department (ED). In Canada there are over 15 million Emergency visits a year. In the USA, over 145 million annually - a shocking 46 visits for every 100 persons! Learn what to expect if you, or a loved one, becomes one. - What happens and why from the ambulance to the trauma bay? - What and whom should you bring? - Why do you have to wait so long? Why did that person get seen before you? - Who gets seen faster? How can you get treated sooner? - Why do you have to tell the same story over again? - Who are all these people? - What should you do to prepare? Dr. Voon also busts some common myths and provides tons of practical tips and tricks to help you stay out of

the ED: - What might not be an emergency after all? - What should everyone stock in their Home Medicine Cabinet? - What internet sites can we trust? As an in-depth and comprehensible resource, this non-fiction is a reference that belongs in every household and every waiting room. Find out more on the web at [DrVoon.com](http://DrVoon.com).

Patriots or anarchist? Jeff (19) and Ann (18) were graduates of the Castleway Academy. Each swore their allegiance to the United States and the principles set forth in the Bill of Rights. They dedicated their lives, and the resources of the Academy, towards preserving democracy

and protecting the individual rights guaranteed to all citizens under the U.S. Constitution. Americans were apathetic and permitted the government to compromise guaranteed rights by allowing the government, in the name of Homeland Security, to erode such simple things as privacy, gun rights, speech and assembly all for the greater good of the ruling political elite under the auspices of national security. Jeff and Ann create a random encryption interface which reencrypted data every second preventing unlawful spying by the NSA and drones. To awaken Americans, Jeff and Ann produced

historically accurate video programs covering the Declaration of Independence and the U.S. Constitution. As citizens awakened, the political elite became the targets of questions and demands that individual rights be restored and the Constitution followed. The government, through Homeland Security retaliated and arrested Jeff as a domestic terrorist for producing the educational videos that enticed social disobedience in the name of liberty and freedom. The battle for liberty was reborn. New Beginnings is the first book in a trilogy that addresses government overreach, lack of transparency and the desire to stop

fourth amendment violations by disabling drones and shutting down the NSA data collector. Springer  
In this companion volume to her pioneering study Redcoats Against Napoleon, Carole Divall tells the fascinating inside story of a typical infantry regiment during the Revolutionary and Napoleonic wars. Rather than focusing on the history of the 30th Regiment of the Line in action and on campaign, she explores its organization, traditions and hierarchy, its personnel, and the ethos that held it together. Using primary source material, in particular surviving regimental records, War Office

documents, letters and journals, Divall reconstructs the life of the 30th Foot - and the lives of the men who served in it - during a critical period in Europe's military history.

Moral Panics, Mental Illness Stigma, and the Deinstitutionalization Movement in American Popular Culture

University of Alaska Press

Over several decades, scholarship in New Testament and early Christianity has drawn attention both to the ways in which ancient Mediterranean conceptions of embodiment, sexual difference, and desire were fundamentally different from modern ones and also to important lines of genealogical connection between

the past and the present. The result is that the study of "gender" and "sexuality" in early Christianity has become an increasingly complex undertaking. This is a complexity produced not only by the intricacies of conflicting historical data, but also by historicizing approaches that query the very terms of analysis whereby we inquire into these questions in the first place. Yet at the same time, recent work on these topics has produced a rich and nuanced body of scholarly literature that has contributed substantially to our understanding of early Christian history and also proved relevant to ongoing theological

and social debates. The Oxford Handbook of Gender and Sexuality in the New Testament provides a roadmap to this lively scholarly landscape, introducing both students and other scholars to the relevant problems, debates, and issues. Leading scholars in the field offer original contributions by way of synthesis, critical interrogation, and proposals for future questions, hypotheses, and research trajectories.

**The Oxford Handbook of New Testament, Gender, and Sexuality** Joni Leonard

"Jay Leno's Tonight show [is explored] in this book by insider Dave Berg, who spent 18 years as Jay's co-producer. There were

always two shows: the one on stage and the one behind the curtain. This narrative weaves both together, featuring the show's most legendary moments, including Hugh Grant's game-changing mea culpa, Arnold Schwarzenegger's shocking political announcement, and the historic booking of Barack Obama as the first sitting president ever to do a late-night show"--Amazon.com. [Inside the Regiment](#) Xlibris Corporation This book cumulates numerous observations made by the author during more than five decades. This period includes the Second World war, the siege of Leningrad (1941-44), postwar years in the secondary school and at the Medical

Institute, the dark time of dictatorship of the Communist party and Soviet power, discriminations, the violation of human rights, anti-Semitism, the aggressive behavior against foreigners, thaw, perestroika, the breakdown of illusions and hopes, chaos of a wild capitalism, a formation of the society of rich new-Russians. The author had focused his attention on those episodes representing the Traits of his Epoch. The author's life was very rich in meeting and friendly relations with many distinguished personalities. In science (Nobel Laureates Julius Axelrod and Daniel Bovet), in music (Dmitri Shostakovich

and Genrich Neigaus), in art (Solomon Gershov), in literature (Igor Guberman). Friendship with Andrei Sakharov, the leader of struggle for Human Rights, Nobel Laureate for Peace, during fifteen years enriched the author enormously. The unique book demonstrates the treasures of the human dignity resistant to numerous pressures of the regime. Without such books the past is growing dim.

This book is aimed at someone who knows little to nothing about the game of Go.

Perhaps you've seen glimpses of it in popular media or maybe you have a friend who is a Go

enthusiast, and would just like to learn more about how he or she spends their Thursday evenings. This publication will not only take you through the basics of the rules and strategy, but also you can learn a lot about the culture surrounding this game and its 4000 year old history.

Humanity is in trouble and it's not looking good for our future.

The way we use our

minds has caused untold damage through personal anxiety, national disruption, and the threat of global annihilation. This book reveals how we innocently misuse our thinking to create emotional and behavioural instability and how to interrupt dysfunctional patterns and experience a higher quality of thought. We explore how present-day spiritually based psychology is re-aligning with ancient biblical principles, providing an opportunity for everyone to participate in change from the inside-out. Unboxing this ancient wisdom reveals that there has always been two conflicting routes to enlightenment operating in our world,

both promising a life beyond the material realm, so discernment is required, and this is where the renewed mind will be our guide. To understand the source of these routes and the invisible forces behind them we journey back to the very dawn of the human era, to the first moment humans were offered the choice between spiritual life or death. Back then we made the wrong choice resulting in spiritual isolation and the need to develop a mind suited to self-survival, but the way is still open for redemption and the choice of life or death for all humanity is one for the ages. We each have freedom to choose. It's not too late for renewal of the mind....and the heart and the soul of

humanity.

Is there a right way to study how the brain works? Following the empiricist's tradition, the most common approach involves the study of neural reactions to stimuli presented by an experimenter. This 'outside-in' method fueled a generation of brain research and now must confront hidden assumptions about causation and concepts that may not hold neatly for systems that act and react. György Buzsáki's *The Brain from Inside Out* examines why the outside-in framework for understanding brain function have become stagnant and points to new directions for

understanding neural function. Building upon the success of *Rhythms of the Brain*, Professor Buzsáki presents the brain as a foretelling device that interacts with its environment through action and the examination of action's consequence. Consider that our brains are initially filled with nonsense patterns, all of which are gibberish until grounded by action-based interactions. By matching these nonsense "words" to the outcomes of action, they acquire meaning. Once its circuits are "calibrated" by action and experience, the brain can disengage from its sensors and actuators, and examine "what happens if" scenarios by peeking into its own

computation, a process that we refer to as cognition. The *Brain from Inside Out* explains why our brain is not an information-absorbing coding device, as it is often portrayed, but a venture-seeking explorer constantly controlling the body to test hypotheses. Our brain does not process information: it creates it.

How can management cure health care's ills? If you need the best practices and ideas for transforming health care--but don't have time to find them--this book is for you. Here are 10 inspiring and

useful perspectives, all in one place. The HBR articles in this collection propose several remedies: - Organizing doctors into teams - Focusing incentives on patients' recovery - Saving lives and dollars by designing clearer work processes - Sharing knowledge through industry networks - Knocking down barriers to innovation in funding, policy, and technology - Treating common ailments with simpler interventions - Bridging the divide between clinicians and administrators - Ramping up R&D productivity by returning power to scientists

### **Behind the Curtain**

Good Press

In October of 2010, six men who were serving on the board of the

Calista Elders Council (CEC) gathered in Anchorage with CEC staff to spend three days speaking about the subsistence way of life. The men shared stories of their early years growing up on the land and harvesting through the seasons, and the dangers they encountered there. The gathering was striking for its regional breadth, as elders came from the Bering Sea coast as well as the Yukon and Kuskokwim rivers. And while their accounts had some commonalities, they also served to demonstrate the wide range of different approaches to subsistence in different regions. This book gathers the men's stories for the current generation and those

to come. Taken together, they become more than simply oral histories—rather, they testify to the importance of transmitting memories and culture and of preserving knowledge of vanishing ways of life.

**Autism: An Inside-Out Approach**

Harvard University Press

Col. James V. Young spent almost twenty years in Asia, including fourteen in Korea.

Here, he writes with the expertise of an old Korea hand about a period that saw South Korea develop from an agrarian economy to a modern industrial state. Young volunteered in 1969 for a new program aimed at creating area specialists within the military. In 1975, after

four years of training in Korean language and culture, he witnessed how American diplomats convinced Park ChungHee, the South Korean president, not to develop his own nuclear weapons.

Later, from the perspective of a military attaché, Young saw the mistrust that characterized

U.S.Korean relations during the 1970s. He provides new insights into the

behindthescenes efforts to derail President Jimmy Carter's troop withdrawal policies and argues that the United States was caught flatfooted by such crucial episodes as the coup of 1979 and the 12/12 Incident. Young's memoir straddles the line between military

and diplomatic history and offers entertaining and often humorous stories. Those interested in the region, the issues, and military life off the battlefield will value this book.

*So You Want to Play Go? Level 1* Vanderbilt University Press

If you have seen his weekly television program, *Downunder Horsemanship*, then you know that Clinton Anderson's training techniques can achieve amazing results with almost any horse. Now his methods are available for the first time in a reader-friendly, highly illustrated book, and you, too, can learn the

program that teaches "everyday people"—regardless of riding style, age, or ability—how to better communicate with their mounts.

University Press  
High security institutions for mentally disordered offenders are far more complex than regular mental health hospitals or prisons. Ashworth Hospital is no exception. This book raises questions as to why Ashworth resisted the call for change and survived moves towards de-institutionalisation, enquiries, and threats of closure.
