Your game

getting boys  
on the path to  
higher  
achievement

You've seen it  
in your school:  
boys  
struggling to  
master basic  
literacy skills,  
sitting outside  
the principal's

office, collecting labels like "hyperactive," getting failing grades. Checked out, kicked out, or dropped out, they're benched when they should be scoring goals on the academic playing field. As a school leader, Kelley King has walked the talk: she successfully led her own staff to close the gender gap in reading and writing in just one year. In her step-by-step, research-based

leadership plan for jump-starting boys' achievement, she shares: Critical insight into the brain-based differences between boys and girls First-hand leadership and classroom experiences Ready-to-use activities and resources for leading a successful gap-closing initiative With tips, anecdotes, and more, Writing the Playbook provides educators in all roles with a blueprint for creating

schools where boys (and girls!) thrive. "Finally, some practical advice from an experienced educator on how to make boys into successful students. King's credentials—mother of both a son and daughter as well as a principal who successfully addressed gender gaps at her school—are unbeatable." —Richard Whitmire, Author of Why Boys Fail: Saving Our Sons from an

Educational System That's Leaving Them Behind "Kelley King is both impassioned and level-headed, and she starts a conversation that we desperately need to have in our country."

Routledge  
From renowned Newbery-winning author Jerry Spinelli comes a powerful story about how not fitting in just might lead to an incredible life. This classic book is perfect for fans of Gordon Korman and Carl Hiaasen.

Just like other kids, Zinkoff rides his bike, hopes for snow days, and wants to be like his dad when he grows up. But Zinkoff also raises his hand with all the wrong answers, trips over his own feet, and falls down with laughter over a word like "Jabip." Other kids have their own word to describe him, but Zinkoff is too busy to hear it. He doesn't know he's not like everyone else. And one winter night, Zinkoff's

differences show that any name can someday become "hero." With some of his finest writing to date and great wit and humor, Jerry Spinelli creates a story about a boy's individuality surpassing the need to fit in and the genuine importance of failure. As readers follow Zinkoff from first through sixth grade, it becomes impossible not to identify with and root for him through

failures and triumphs. The perfect classroom read.

... Houghton Mifflin Harcourt "Considered

the bible of scouting techniques" according to the Los Angeles Times, Football Scouting Methods explains the basic scouting strategies and insights of author Steve Belichick. He was widely viewed as the ablest football scout of his time and coached at the U.S. Naval Academy for 33 years; his son is New England Patriots coach Bill Belichick, a three-time Super Bowl winner. When

Steve Belichick died in November 2005, the New York Times headline cited him as "Coach Who Wrote the Book on Scouting," and quoted Houston Texans General Manager Charley Casserly calling Football Scouting Methods "the best book on scouting he had ever read." Joe Bellino, Navy's Heisman Trophy winner in 1960, told the Times that Steve Belichick "was

a genius. On Monday nights, he would give us his scouting reports, and even though we were playing powerhouses, I always felt we were prepared because he found a way for us to win." In recent years Football Scouting Methods has been one of the top ten most sought out-of-print books; used copies have been quite scarce. This reissue edition makes the original 1962 text available

once again in exact facsimile. The book covers how to scout opponents, recognize defenses, analyze offenses, discover "tip-offs" that reveal the opponent's plays, compose a useful report, self-scout, and conduct postgame analysis. "Steve Belichick taught many younger men how to scout and how to watch film and how to prepare their teams for the next week's

game," David Halberstam noted in the Washington Post, and his best student was his own son Bill Belichick, "one of whose greatest skills as a coach to this day remains his ability to analyze other teams, figuring out both their strengths and their vulnerabilities, and shrewdly deciding how to take away from them that which they most want to do." When CBS asked Bill Belichick to

name his favorite book, he replied "Well, I've got to go with my dad's. Football Scouting Methods. I'd have to go with that."

Corwin Press Introduces key terms, concepts, debates, and histories for Disability Studies Keywords for Disability Studies aims

to broaden and define the conceptual framework of disability studies for readers and practitioners in the field and beyond. The volume engages some of the most pressing debates of our time, such as prenatal testing, euthanasia, accessibility in public transportation and the workplace, post-traumatic stress, and questions about the beginning and end of life. Each of the 60 essays in

Keywords for Disability Studies focuses on a distinct critical concept, including "ethics," "medicalization," "performance," "reproduction," "identity," and "stigma," among others. Although the essays recognize that "disability" is often used as an umbrella term, the contributors to the volume avoid treating individual disabilities as keywords, and instead interrogate concepts that

encompass different components of the social and bodily experience of disability. The essays approach disability as an embodied condition, a mutable historical phenomenon, and a social, political, and cultural identity. An invaluable resource for students and scholars alike, *Keywords for Disability Studies* brings the debates that have often remained internal to disability

studies into a wider field of critical discourse, providing opportunities for fresh theoretical considerations of the field's core presuppositions through a variety of disciplinary perspectives. Visit [keywords.nyu.edu](http://keywords.nyu.edu) for online essays, teaching resources, and more.

However, they are often constrained by lack of adequate resources, sound policies,

and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan

for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the

risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and

accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. *The Advocate* Ballantine Books On busy school nights, homework and long-term projects often get pushed to the bottom of the list, especially by
