Longman Publishing Group

Archaeology, the science in charge of studying ancient cultures, is without a doubt one of the most alluring professions in today's academic world. It is a versatile and complex discipline requiring a lot of skill expertise from

both students and specialists, including the efficient management of team of coworkers, logistics, resources, etc. Project Management for Archaeology is a first approach to students and inexperienced archaeologists striving to better organize, lead, and execute an archaeological project. It also offers great insight and strategies to experienced and Old-school researchers in order to improve efficiency, leadership, and organizational

skills, following the most effective management techniques in the market. Presented with a flexible approach that accommodates all types of archaeological research (from academic to rescue and salvage projects), *Project Management for Archaeology* is meant to be a practical handbook to be used all along the lifetime of any archaeological project.

*A Guide to Writing as an Engineer*

Macmillan

Workflow-based Web applications present a central pillar of companies' endeavors towards increased business process efficiency and flexibility. Considering their particular characteristics, this book presents innovative approaches for their efficient, completely model-driven construction

with particular emphasis on effective stakeholder involvement, usability-oriented dialog design and cross-methodological reuse.

*The Technical Communication Handbook*  
National Archives and Records Administration

This report, published in its entirety (OTA-TCT-578) and in a summary form (OTA-TCT-579) containing only the first chapter of the complete report, focuses on key topics and issues that are central to the successful use of electronic delivery by government. The review conducted by the Office of Technology Assessment concludes that the movement toward electronic delivery of government services is accelerating, but that many factors must be considered. The greatest risks of electronic delivery

are overlooking the human element and users' needs, which would further widen the gap between the technologically literate and the technologically illiterate, and failing to capitalize on all the opportunities that partnerships among government agencies and the private sector could provide. Changes that will be required in federal management are outlined, and options for successful implementation of electronic delivery are sketched. Many rely on the amplification of existing structures. Five appendixes complement the complete report, including a list of the 11 boxes, 5 figures, and 22 tables that illustrate the discussion; and lists of acronyms and terms, contributors, field study participants, and contractor reports. The summary volume contains four tables

and two boxes. (SLD)

### **Writing and Speaking in the Technology Professions**

Congress  
This volume presents the revised and peer reviewed contributions of the 'ERP Future 2013' conference held in Vienna/Austria on November 12-13th, 2013. The ERP Future 2013 Research conference is a scientific platform for research on enterprise information systems in general and specifically on core topics like business process management (BPM), business intelligence (BI) and enterprise resource planning (ERP) systems. Besides the scientific community the event also addresses businesses developing, implementing and intensively using enterprise information systems. To master the challenges of enterprise

information systems comprehensively, the ERP Future 2013 Research conference accepted contributions with a business as well as an IT focus to consider enterprise information systems from various viewpoints. This combination of business and IT aspects is a unique characteristic of the conference that resulted in several valuable contributions with high theoretical as well as practical impact. *Intelligent Transportation System and Advanced Technology* Springer

"This book focuses on environment information scanning and organization-wide support for strategic intelligence. It also provides practical guidance to organizations for developing effective approaches, mechanisms, and systems to scan, refine, and support strategic

information provision"--Provided by publisher.

Scientific and Technical Aerospace Reports Springer Nature

Includes a mid-December issue called Buyer guide edition.

Your Federal Income Tax for Individuals Springer

This book investigates request strategies in Mandarin Chinese and Korean, and is one of the first attempts to address cross-cultural strategies employed in the speech act of requests in two non-Western languages. The data, drawn from role-plays and naturally recorded conversations, complement each other in terms of exhaustiveness and authenticity. This study explores the similarities and differences of the request patterns that emerged in the

Chinese and Korean data, and the intricate relation between request strategies and social factors (such as power and distance). The findings raise questions about the influence of methodology on data, and the applicability of so called universals to East Asian languages. They also offer new insights into generally held ideas of directness and requesting behaviours in Chinese and Korean, and the problems of cross-cultural and cross-linguistic communication. This research is suggestive for the disciplines of cross-cultural pragmatics, cross-cultural communication, contrastive linguistics, applied linguistics and discourse analysis.

Business Expert Press

The Danube-Oder-Elbe Canal promised to create an integrated waterway system across Europe, linking Black Sea ports to Atlantic markets and giving landlocked Czech nation its own connections to the ocean. The fascinating history of this never-completed project, *European Coasts of Bohemia* tells the story of the experts who confronted and contributed to different and often conflicting geopolitical visions of Europe. Jíra Janáč

shows how the canal-backers adapted themselves to various political developments, such as the break-up of the Austrian–Hungarian Empire and the integration into the Soviet Bloc, while still managing to keep the canal project alive.

**Technical Communication** John Benjamins Publishing

The Technical Communication Handbook, a life-long companion for technical communicators, is a comprehensive reference guide for technical communication students at all levels, as well as by practicing technical communicators and others writing in the technical workplace. The handbook boasts a full-color design, extensively annotated model documents, and coverage of current topics in intellectual

property, digital communication, collaboration, and accessibility issues. Making Government Work KIT Scientific Publishing

The definitive technical writing reference in an updated sixth edition. This comprehensive resource—alphabetically arranged for quick reference—provides guidance on the writing process, in-depth treatment of grammar and usage, abundant real-world examples of technical writing, and up-to-date coverage of technology.

Project Management for Archaeology John Wiley & Sons

This book constitutes the refereed proceedings of the 12th International Baltic Conference on Databases and Information Systems, DB&IS 2016, held in Riga, Latvia, in July 2016. The 25

revised full papers presented were carefully reviewed and selected from 62 submissions. The papers are organized in topical sections on ontology, conceptual modeling and databases; tools, technologies and languages for model-driven development; decision support systems and data mining; advanced systems and technologies; business process modeling and performance measurement; software testing and quality assurance; linguistic components of IS; information technology in teaching and learning. Request Strategies IGI Global

In this book, the following subjects are included: information security, the risk assessment and treatment processes (with practical examples), the information security controls. The text is

based on the ISO/IEC 27001 standard and on the discussions held during the editing meetings, attended by the author. Appendixes include short presentations and check lists. CESARE GALLOTTI has been working since 1999 in the information security and IT process management fields and has been leading many projects for companies of various sizes and market sectors. He has been leading projects as consultant or auditor for the compliance with standards and regulations and has been designing and delivering ISO/IEC 27001, privacy and ITIL training courses. Some of his certifications are: Lead Auditor ISO/IEC 27001, Lead Auditor 9001, CISA, ITIL Expert and CBCI, CIPP/e. Since 2010, he has been Italian delegate for the the editing group for the ISO/IEC

27000 standard family. Web:

*The Black Diamond* IGI Global  
Combining guidance for writing over 40  
typers of professional documents with  
thorough coverage of grammar, usage,  
and style, the Handbook of Technical  
Writing functions as both a writer's  
handbook and a complete guide to  
technical communication. It provides  
quick access to hundreds of topics and  
scores of sample documents and visuals.  
[publisher's note]

**Public Roads** Aspen Publishing  
Forensic Accounting and Fraud  
Examination introduces students and  
professionals to the world of fraud  
detection and deterrence, providing a  
solid foundation in core concepts and  
methods for both public and private

sector environments. Aligned with the  
National Institute of Justice (NIJ) model  
curriculum, this text provides  
comprehensive and up-to-date coverage  
of asset misappropriation, corruption,  
fraud, and other topics a practicing  
forensic accountant encounters on a  
daily basis. A focus on real-world  
practicality employs current examples  
and engaging case studies to reinforce  
comprehension, while in-depth  
discussions clarify technical concepts in  
an easily relatable style. End of chapter  
material and integrated IDEA and  
Tableau software cases introduces  
students to the powerful, user-friendly  
tools accounting professionals use to  
maximize auditing and analytic  
capabilities, detect fraud, and comply  
with documentation requirements, and

coverage of current methods and best practices provides immediate relevancy to real-world scenarios. Amidst increased demand for forensic accounting skills, even for entry-level accountants, this text equips students with the knowledge and skills they need to successfully engage in the field.

**Area Travel Survey** Macmillan

This brief, easy-to-use guide to the essentials of technical writing is designed specifically to meet the needs of engineers, focuses on reports, business letters, office memoranda and e-mail, as well as oral presentations using PowerPoint and applying for jobs using the Internet.

*Information security: risk assessment, management systems, the ISO/IEC 27001 standard* Amsterdam University

"Casebook on Federal Income Taxation for students taking this elective course"--

### **European Coasts of Bohemia**

Macmillan

An updated edition of the classic guide to technical communication Consider that 20 to 50 percent of a technology professional's time is spent communicating with others. Whether writing a memo, preparing a set of procedures, or making an oral presentation, effective communication is vital to your professional success. This anthology delivers concrete advice from the foremost experts on how to communicate more effectively in the workplace. The revised and expanded second edition of this popular book completely updates the original, providing authoritative guidance on

communicating via modern technology in the contemporary work environment.

Two new sections on global communication and the Internet address communicating effectively in the context of increased e-mail and web usage. As in the original, David Beer's Second Edition discusses a variety of approaches, such as:

- \* Writing technical documents that are clear and effective
- \* Giving oral presentations more confidently
- \* Using graphics and other visual aids judiciously
- \* Holding productive meetings

Becoming an effective listener The new edition also includes updated articles on working with others to get results and on giving directions that work. Each article is aimed specifically at the needs of engineers and others in the technology professions, and is written by a

practicing engineer or a technical communicator. Technical engineers, IEEE society members, and technical writing teachers will find this updated edition of David Beer's classic Writing and Speaking in the Technology Professions an invaluable guide to successful communication.
