*Introduction to Particle Physics* Butterworth-Heinemann

This book, based on authoritative sources and reports, links environmental communication to different fields of competence: environment, sustainability, journalism, mass media, architecture, design, art, green and circular economy, public administration, big event management and legal language. The manual offers a new, scientifically based perspective, and adopts a theoretical-practical approach, providing readers with qualified best practices, case studies and 22 exclusive interviews with professionals. A fluent style of writing leads the readers through specific details, enriching their knowledge without being boring. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students, scholars, professionals, and anyone who would like to know more on the matter.

*Before and Beyond Divergence* Woodhead Publishing

In this volume, the study of the history of the doctrine of the Holy Spirit is carried on from the sub-apostolic writers to the end of the patristic period, which is generally held to terminate with Gregory the Great in the West and John of Damascus in the East. This is an early classic study in doctrinal development by one of the foremost exegetes of the late 19th/early 20th century.

*Handbook of Formal Languages* Jones & Bartlett Learning

Why did sustained economic growth arise in Europe rather than in China? The authors combine economic theory and historical evidence to argue that political processes drove the economic divergence between the two world regions, with continued consequences today that become clear in this innovative account.

*Gopāla-campū* Springer Science & Business Media

This third volume of the Handbook of Formal Languages discusses language theory beyond linear or string models: trees, graphs, grids, pictures, computer graphics. Many chapters offer an authoritative self-contained exposition of an entire area. Special emphasis is on interconnections with logic.

*Small-Animal SPECT Imaging* Springer

The 2008 U.S. presidential campaign offered a unique opportunity

to evaluate the usefulness and applicability of social media technology in the American political environment. This study's assessment of the role that social media played during the 2008 U.S. presidential campaign confirms some widely held tenets of conventional wisdom about social media, but it also indicates that the role of social media as the new sine qua non of American politics is far from certain.

**SAS Basic Covert Surveillance Operations** Springer Science & Business Media

The Hotel Bartender Who Slips You A Guests Room Number Because He Thinks It Will Help Him Get Lucky. The Security Guard Who Lets A Team Into A Top-Secret Facility Because He Thinks Hes Pitching In On Covert-Ops Training. The Business Suit Who Drops Ten Thousand Nuyen On A Project Because He Thinks Itll Earn Him Fifty Thousand. Marks, All Of Them, And The Sixth World Is Full Of Them. Yeah, Blasting Your Way Into A Well-Guarded Facility Is Fun, But Talking Your Way In, Smooth And Subtle, Might Be More Rewarding. Almost Every Kind Of Shadowrun Involves At Least A Little Con Artistry, And Some Of Them Are Full-On Long Cons. That Means You Need To Sharpen Your Con Game. With Tips, Plot Updates, Spells, Gear, And More To Improve Characters Con Abilities, Cutting Aces Gives Players The Swagger And Skills They Need To Swindle The World. It Also Includes Information On One Of The Sixth Worlds Hottest Spots For Running A Conistanbul, City Of The Worlds Desire. Cuttings Aces Is For Use With Shadowrun, Fifth Edition, And It Also Contains Plot Information, Story Ideas, And Characters That Can Be Used With Shadowrun: Anarchy With Slight Adjustments Of Character Stats.

*The Storyteller's Thesaurus* Springer Science & Business Media

A historical record of expeditions to Florida by Hernando de Soto and others from the years 1512-1568.

*Understanding the Global Spa Industry* Checkmark Books

Chesley's Hypertensive Disorders in Pregnancy continues its tradition as one of the beacons to guide the field of preeclampsia research, recognized for its uniqueness and utility. Hypertensive disorders remain one the major causes of maternal and fetal morbidity and death. It is also a leading cause of preterm birth now known to be a risk factor in remote cardiovascular disease. Despite this the hypertensive disorders remain marginally studied

and management is often controversial. The fourth edition of Chesley's Hypertensive Disorders in Pregnancy focuses on prediction, prevention, and management for clinicians, and is an essential reference text for clinical and basic investigators alike. Differing from other texts devoted to preeclampsia, it covers the whole gamut of high blood pressure, and not just preeclampsia. - Features new chapters focusing on recent discoveries in areas such as fetal programming, genomics/proteomics, and angiogenesis - Includes extensive updates to chapters on epidemiology, etiological considerations, pathophysiology, prediction, prevention, and management - Discusses the emerging roles of metabolic syndrome and obesity and the increasing incidence of preeclampsia - Each section overseen by one of the editors; each chapter co-authored by one of the editors, ensuring coherence throughout book

*Manual for Pharmacy Technicians* Harvard University Press

- Spa services and the development of the spa business from its historical beginnings to the size of the market today.
- Business development and planning, spa operations and business models.
- Spa products and technologies, retailing and the application of branding and marketing strategies.
- Infrastructure, design and environmental issues including sustainability and social and environmental benchmarking.
- Human resources issues from education and training to professional and regulatory issues and professional and corporate ethics and values.

**Backstage Cirque Du Soleil** Routledge

A timely work describing how localized hospital-based health technology assessment (HB-HTA) complements general, 'arms-length' HTA agency efforts, and what has been the collective global impact of HB-HTA across the globe. While HB-HTA has gained significant momentum over the past few years, expertise in the field, and information on the operation and organization of HB-HTA, has been scattered. This book serves to bring this information together to inform those who are currently working in the field of HTA at the hospital, regional, national or global level. In addition, this book is intended for decision-makers and policy-makers with a stake in determining the uptake and decommissioning of new and established technologies in the hospital setting. HTA has traditionally been performed at the

National/Regional level by HTA Agencies, typically linked to governments. Yet hospitals are the main entry door for most health technologies (HTs). Hospital decision-makers must undertake multiple high stakes investment and disinvestment decisions annually for innovative HTs, usually without adequate information. Despite the existence of arms-length HTA Agencies, inadequate information is available to hospital decision-makers either because relevant HTA reports are not yet released at the time of entry of new technologies to the field, or because even when the report exists, the information contained is insufficient to clarify the contextualized informational needs of hospital decision makers. Therefore, there has recently been a rising trend toward hospital-based HTA units and programs. These units/programs complement the work of National/Regional HTA Agencies by providing the key and relevant evidence needed by hospital decision makers in their specific hospital context, and within required decision-making timelines. The emergence of HB-HTA is creating a comprehensive HTA ecosystem across health care levels, which creates better bridges for knowledge translation through relevance and timeliness.

Academic Press

A detailed guide for nephrologists and allied medical professionals to using continuous ambulatory peritoneal dialysis and various modifications of automated peritoneal dialysis, such as continuous cycling peritoneal dialysis, to provide prolonged dialysis to infants, children, and adolescents with end-stage renal disease. Includes discussions of the NAPRTCS experience in North America, children in developing countries, the structure and function of the pediatric peritoneal membrane, the organization and management of a pediatric dialysis unit, anemia and its treatment in children on continuous dialysis, prescribing the various forms of dialysis, peritonitis, gynecologic issues, the ethics of withholding and withdrawing therapy in infants and young children, the effects of renal neurotoxicity on cognitive development, a parent's view, new peritoneal dialysate solutions and intraperitoneal therapies, nutritional therapy, and other topics. Incorporates developments in the decade since the first edition. Annotation copyrighted by Book News, Inc., Portland, OR

**Hospital-Based Health Technology Assessment** Manual for Pharmacy Technicians

This textbook is a unique treatise on the present status of particle physics summarised for physics students at an introductory level: it provides insights into the essential experimental and theoretical techniques needed to start research at modern high energy accelerators such as the Large Hadron Collider at CERN. The first three parts of the book discuss the experimental and phenomenological aspects at a level suitable for MSc students, but BSc students interested in particle physics will also find useful information there. The fourth part is oriented to advanced MSc or PhD students to make them acquainted with the precise formulation of the standard model of particle interactions, as well as with the mathematical background needed for the correct interpretation of the experimental results. In this two-step approach, the book offers a gradually deepening understanding of particle physics, building up the standard model and providing an overview of its verification, together with the necessary theoretical and experimental techniques. Using the example of the simplest present-day experiments, it is explained how one can obtain experimental results and theoretical estimations for measurable quantities from clear basic principles. The sources of uncertainties and the methods of improving precision are also discussed.

*QuickBooks Fundamentals 2018* Editions Assouline

Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) \*at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence,

starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 20 (thesis year 1975) a total of 10,374 theses titles from 28 Canadian and 239 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. The organization of Volume 20 is identical to that of past years. It consists of theses titles arranged by discipline and by university within each discipline.

**Sanders' Paramedic Textbook** Elsevier

This book presents a comprehensive survey of acute heart failure. A series of experts recognized worldwide discuss specific topics so that, together, a wide spectrum of experimental and clinical investigations are covered. Pathophysiologic, diagnostic and therapeutic aspects are included. The present volume will help clinicians deal with the important problem of acute heart failure. It will help provide an up-to-date reference for those involved in cardiology, internal medicine, pediatrics, anesthesia, intensive care and emergency medicine.

Small-Animal SPECT Imaging is an edited work derived from the first workshop on Small-Animal SPECT Imaging held January 14-16, 2004 at the University of Arizona, Tucson, AZ, USA. The overall goal of the meeting and therefore this volume is to promote information exchange and collaboration between the research groups developing systems for small-animal applications. Topics include the biomedical significance of small-animal imaging, an overview of detector technologies including scintillation cameras and semi-conductor arrays, imager design and data acquisition systems, animal handling and anesthesia issues, objective assessment of image quality, and system modeling and reconstruction algorithms.

**Official Records** Wipf and Stock Publishers

This timely edited collection offers a multidisciplinary perspective on social commerce, a phenomenon that has gained increasing interest over the last 8 years. Investigating how social media can be used to generate value for brands beyond customer relationship purposes, the skilled authors explore how social

media users co-create value for businesses, influence other consumers and generate electronic word-of-mouth (eWOM). Providing insights from practitioners and academics, this book goes further than simply exploring e-commerce and social media, and addresses the real relevance of social commerce in today's business landscape. With a selection of contemporary case studies and a Foreword written by Inthefrow's creator, Victoria Magrath, Social Commerce will be an engaging read for those studying consumer behaviour, online marketing, and e-commerce.

"Fluid Machinery and Fluid Mechanics: 4th International

Symposium (4th ISFMFE)" is the proceedings of 4th International Symposium on Fluid Machinery and Fluid Engineering, held in Beijing November 24-27, 2008. It contains 69 highly informative technical papers presented at the Mei Lecture session and the technical sessions of the symposium. The Chinese Society of Engineering Thermophysics (CSET) organized the First, the Second and the Third International Symposium on Fluid Machinery and Fluid Engineering (1996, 2000 and 2004). The purpose of the 4th Symposium is to provide a common forum for exchange of scientific and technical information worldwide on fluid machinery and fluid engineering for scientists and engineers. The main

subject of this symposium is "Fluid Machinery for Energy Conservation". The "Mei Lecture" reports on the most recent developments of fluid machinery in commemoration of the late professor Mei Zuyan. The book is intended for researchers and engineers in fluid machinery and fluid engineering. Jianzhong Xu is a professor at the Chinese Society of Engineering Thermophysics, Chinese Academy of Sciences, Beijing.
