The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

Enlisted Transfer Manual

This manual is aimed at helping medical record workers in the development and management of medical records services of health care facilities in developing countries in an effective and efficient

manner. It has not been designed as an introductory text to medical record management, but rather as an aid to medical record officers (MROs) and medical record clerks by describing appropriate systems for Medical Records Departments in developing countries. It covers manual procedures and may be used as an adjunct to computerized systems. It does not provide all of the options for medical record management, but it does provide one option in each area for the management of medical records in developing countries. A list the textbooks that provide detailed information on medical record

management is also provided.
Directory of Engineering Document Sources
 SECNAV M-5214.1: This Manual provides guidance to program managers and action officers who need to obtain information from the public, other Federal agencies, and within the DON and provides them with the procedures necessary to license their information requirements. It also provides guidance to assist information management control managers on the operation of their information collection programs.
Personnel Man 3 & 2
 Special edition of the Federal Register, containing a codification of documents of general applicability and future
