"This is History Book. It explored the grand scheme of world history as a product of real-life human beings pursuing their individual and collective interests. It also offered a global perspective on the past by focusing on both the distinctive characteristics of individual societies and the connections that have linked the fortunes of different societies. It has combined a clear chronological framework with the twin themes of traditions and encounters, which help to make the unwieldy story of world history both more manageable and more engaging. From the beginning, Traditions & Encounters offered an inclusive vision of the global past—one that is meaningful and appropriate for the interdependent world of contemporary times"--

Leopold von Ranke (1795-1886), generally recognized as the founder of the school of modern critical historical scholarship, and Jacob Burckhardt (1818-1897), the great Swiss proponent of cultural interpretation, are fathers of modern history--giants of their time who continue to exert an immense influence in our own. They are usually seen as contrasts, Ranke as representative of political history and Burckhardt of cultural history. In five essays, each flowing gracefully into the next, the distinguished historian Felix Gilbert shows that such contrasts are oversimplifications. Despite their interest in different aspects of the past, Ranke's and Burckhardt's views arose from common elements in the first half of the nineteenth century, the time in which they grew up and in which their first masterworks attracted such wide attention. This concise volume clarifies the beginnings of history as an autonomous discipline, while forcing us to examine our views on basic questions in historical scholarship. In the case of Ranke, relating his work to his times counteracts the current tendency to disregard the difference between the historical concepts of the eighteenth and nineteenth centuries. By focusing on this difference, Gilbert emphasizes the originality and novelty of Ranke's ideas about history. Although Burckhardt is often portrayed as an intellectually lonely figure, this book

reveals the importance of relating his thought to the intellectual trends of his time. Originally published in 1990. Handbook of Early Childhood Literacy Princeton University Press
The ability to communicate through spoken and written language is one of the defining characteristics of the human race, yet it

remains a deeply mysterious process. The young science of psycholinguistics attempts to uncover the mechanisms and representations underlying human language. This interdisciplinary field has seen massive developments over the past decade, with a broad expansion of the research base, and the incorporation of new experimental techniques such as brain imaging and computational modelling. The result is that real progress is being made in the understanding of the key components of language in the mind. The Oxford Handbook of Psycholinguistics brings together the views of 75 leading researchers in psycholinguistics to provide a comprehensive and authoritative review of the current state of the art in psycholinguistics. With almost 50 chapters written by experts in the field, the range and depth of coverage is unequalled. The contributors are eminent in a wide range of fields, including psychology, linguistics, human memory, cognitive neuroscience, bilingualism, genetics, development and neuropsychology. Their contributions are organised into six themed sections, covering word recognition, the mental lexicon, comprehension and discourse, language production, language development, and perspectives on psycholinguistics. The breadth of coverage, coupled with the accessibility of the short chapter format should make the handbook essential reading for both students and researchers in the fields of psychology, linguistics and neuroscience.

Once slighted as mere copying from China, the arts of Japan are now seen as a unique alternation of advances and withdrawals. At times the islanders produced Chinese-style works of great beauty, unmatched on the continent. When they chose to be independent, their art differs at every level. Sculpture, and even more painting, are concrete, sensuous, and emotional, speaking directly to all.

Eritrean refugees crisscross between countries in the Horn of Africa and North Africa in search of a safe place. Along their journeys, they are looted, threatened, intimidated, violated, and held for ransom. This book revisits the human trafficking crisis that first emerged in the Sinai at the end of 2008 and examines the expansion of human trafficking of Eritrean refugees and other forms of exploitation beyond the Sinai. It focuses on the modus operandi of these practices and on identifying their key facilitators and beneficiaries. The book locates the origin of these practices within Eritrea; it reveals how a deliberate policy of

impoverishment and human rights abuses has driven the people out of the country, and how individuals within Eritrea, and particularly within the ruling party, benefit from the smuggling and trafficking of Eritrean refugees. The use of information communication technologies (ICTs) is identified as key to the new modus operandi of this criminal business and is found to further facilitate widespread collective trauma amongst Eritreans, who witness the abuse of their family members and fellow nationals through digital networks. An entire section in this book is dedicated to assessing the extent and effects of individual and collective trauma caused by Sinai trafficking and to examining potential approaches to healing. Other sections discuss the vulnerabilities of Eritrean minors and women, and the connections between human trafficking, terrorism and organ trafficking. The last section of the book raises the question of accountability. It examines and evaluates international responses to this forgotten crisis, and discusses the need for policies that tackle the problem where it emerges: in Eritrea.

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable

economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in

Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.
