Reminiscent of Scheherazade and One Thousand and One Nights, Gianni Rodari's Telephone Tales is many stories within a story. Every night, a traveling father must finish a bedtime story in the

time that a single coin will buy. One night, it's a carousel that adults cannot comprehend, but whose operator must be some sort of magician, the next, it's a land filled with butter men who melt in the sunshine. Awarded the Hans Christian Anderson Award in 1970, Gianni Rodari is widely considered to be Italy's most important children's author of the 20th century. Newly re-illustrated by Italian artist Valerio Vidali (The Forest), Telephone Tales entertains, while questioning and imagining other worlds. *Catalogo dei libri in commercio* New York City : Chiswick Book Shop ; New Haven : Yale University Press

The Absorbent Mind was Maria Montessori's most in-depth work on her educational theory, based on decades of scientific observation of children. Her view on children and their absorbent minds was a landmark departure from the educational model at the time. This book helped start a revolution in education. Since this book first appeared there have been both cognitive and neurological studies that have confirmed what Maria Montessori knew decades ago.

A boy is leaving for a mysterious journey that will take him to explore far away places. The only words describing these places, in this almost wordless book, are those of the maps that he draws. These fantastic and evocative places express all the shades of emotions from hope to fear, from wonder to sadness,

to finally to love. An unprecedented and highly original itinerary with a story of friendship and great adventure plays out in graphic-novel form that unfolds on the pages between the maps. Highly visual illustrations provide an incentive for children to explore their emotions and create their own new maps for emotional discovery.

Practise and Pass Starters is especially useful for pupils who need to prepare and practise for the Cambridge YLE Test over a relatively short period or alongside another course book. It provides 20 to 30 hours of material. Practise and Pass Starters is much more than a collection of practice tests. The activities are lively and communicative and follow a clear progression, so the pupils prepare, practise and pass. In the "prepare" section the language is introduced, in the "practise" section the language is practised in a meaningful and fun way and finally in the "pass" section the language is tested in a way that will make the eventual test familiar to the pupils. The Practise and Pass Starters Pupil's Book is further divided into three sections, with separate sections covering the Listening, Speaking and Reading and Writing parts of the test, so that it is possible to work on different parts of the exam if extra work is required. Throughout the book there are fun-based hints and tips on exam techniques which will help pupils when they come to take the test. There is also a full Practice Test at the end of the Pupil's Book. The Practise and Pass Starters Teacher's Book contains the key and tapescript as well as advice and tips to help pupils prepare for the test. The Teacher's Book also contains the Class Audio CD with all the listening material relating to the practice activities and to the

practice tests
