Hidden Treasures: Friends Scholastic Inc.

From the bestselling author of *The Man Who Mistook His Wife for a Hat* • Fascinating portraits of neurological disorder in which men, women, and one extraordinary child emerge as brilliantly adaptive personalities, whose conditions have not so much debilitated them as ushered them into another reality. Here are seven detailed narratives of neurological patients, including a surgeon consumed by the compulsive tics of Tourette's syndrome unless he is operating; an artist who loses all sense of color in a car accident, but finds a new sensibility and creative power in black and white; and an autistic professor who cannot decipher the simplest social exchange between humans, but has built a career out of her intuitive understanding of animal behavior. Sacks combines the well honed mind of an academician with the verve of a true storyteller.

**People Maths** Hidden Pictures Publishing

In this latest addition to the hugely successful CAN YOU SEE WHAT I SEE? series, acclaimed photographer Walter Wick welcomes readers out for some spooky search-and-find fun Co-creator of the popular I SPY series, Walter Wick is at it again. Mr. Wick dazzles the senses with spooky scenes that achieve new levels of aesthetic excellence This book offers readers lots of search and find fun as they peer through pages and pages of brilliant photographic compositions looking for fascinating toys and objects. This highly collectable book is a must.

Getting Ready for the 4th Grade Assessment Test: Help Improve Your Child's Math and English Skills - Many parents are expressing a demand for books that will help their children succeed and excel on the fourth grade assessment tests in math and English -especially in areas where children have limited access to computers. This book will help students practice basic math concepts, i.e., number sense and applications as well as more difficult math, such as patterns, functions, and algebra. English skills will include practice in reading comprehension, writing, and vocabulary. Rubrics are included for self-evaluation.

**Time for Fun** Guardian Angel Publishing

Get ready for a ribbiting good time! Liz's delightful critters are hoppin', jumpin' and coraking through 56 pages of "Un-FROG-gettable" fun.

Where Is Salami Highlights Press

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called “the Dear Abby of the work world.” Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit “reply all” • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your

cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together

Follow the adventures of Sparkles the fire safety dog as she helps teach children how to escape a house fire.

[Wisconsin Model Early Learning Standards 5th Edition](#) National Geographic Books

This entertaining book presents a collection of 180 famous mathematical puzzles and intriguing elementary problems that great mathematicians have posed, discussed, and/or solved. The selected problems do not require advanced mathematics, making this book accessible to a variety of readers. Mathematical recreations offer a rich playground for both amateur and professional mathematicians. Believing that creative stimuli and aesthetic considerations are closely related, great mathematicians from ancient times to the present have always taken an interest in puzzles and diversions. The goal of this book is to show that famous mathematicians have all communicated brilliant ideas, methodological approaches, and absolute genius in mathematical thoughts by using recreational mathematics as a framework. Concise biographies of many mathematicians mentioned in the text are also included. The majority of the mathematical problems presented in this book originated in number theory, graph theory, optimization, and probability. Others are based on combinatorial and chess problems, while still others are geometrical and arithmetical puzzles. This book is intended to be both entertaining as well as an introduction to various intriguing mathematical topics and ideas. Certainly, many stories and famous puzzles can be very useful to prepare classroom lectures, to inspire and amuse students, and to instill affection for mathematics.

[Hidden Picture Puzzles in the Ocean](#) Random House

Beth's little brother has so many pets, he's lost track of a few! Children will delight in finding the animals in the vibrant illustrations and discovering hidden items on every page. Humorous rhymes entertain and inform with fun facts about the creatures. Of course, the animals all show up in the end - or do they? Suggested age range for readers: 2-5.

[Topsy Turvy Land](#) Simon and Schuster

Color and discover hundreds of fascinating objects - the longer you look, the more you'll find! This one-of-a-kind adult coloring book stands out with its intricate artwork that's made up of hidden objects. Featuring 35 thoughtful and intriguing designs that are perfect for puzzle-lovers, each contain a variety of elements that act as clever and funny puns relating to the main illustration. Designs are printed on a single side of high-quality paper with perforated edges.

[An Anthropologist on Mars](#) Dover Math Games & Puzzles

Wind your way through pages of endless fun! Decode a secret message using the phases of the moon. Wind your way through a pizza maze. Find hidden presidents, borrow some drachmas, and unscramble an invention time line. Play super duper tic-tac-toe, classic hangman, and match up snowflakes. And look for Mervin the Mouse every time you turn the page—he's watching from his hiding place to help you through this wild and

whacky jam-packed puzzle book! Sharpen more than one pencil—there are enough puzzles here to keep you entertained for hours!

[Quirky Collages to Color](#) Hidden Pictures Publishing

Can you spot the difference? BRAIN FUN PICTURE PUZZLES elevates the fun-level of what's considered a classic among puzzlers. Within these pages are several types of picture puzzles: Spot the difference; find one changed photo among six; reassemble a cut-up image; each presented in a variety of categories. Within each category, puzzles are presented in increasing difficulty levels. Alongside each, solvers can compare their time to that of expert puzzlers and check off each difference as they spot it. Researchers have shown that games like these keep your brain sharp, challenge your powers of observation and train your eye to notice the smallest of details. And, you'll have fun while reaping the benefits. It a win-win!
