Mrs. Louise Mallard, afflicted with a heart condition, reflects on the death of her husband from the safety of her locked room. Originally published in Vogue magazine, "The Story of an Hour" was retitled as "The Dream of an Hour," when it was published amid much controversy under its new title a year later in St. Louis Life. "The Story of an Hour" was adapted to film in The Joy That Kills by director Tina Rathbone, which was part of a PBS anthology called American Playhouse.  In the business world, recent years have seen a growing acknowledgement of the value of

intangible assets rather than physical assets. This has precipitated a crisis in the accounting industry: the accounting representations relied upon for years can no longer be taken for granted. Here, Norman Macintosh argues that we now need to understand accounting in a different manner. Offering several different ways of looking at accounting and accountants, he draws upon the work of eminent thinkers such as Barthes, Baudrillard, Derrida, Foucault, Lyotard and Bakhtin. In doing this, he develops revolutionary insights into the nature of accounting, pioneering the introduction of contemporary poststructuralist ideas into accounting theory and practice. With a wide range of examples and case studies and now available in paperback for the first time, this revolutionary new work will be essential reading for academic and professional accountants along with all those with an interest in the future of accounting.

 Meet calls for increased quality and understand accreditation expectations Author Linda Suskie is internationally recognized for her work in higher education assessment, and she is a former vice president of a major regional accreditor. In Five Dimensions of Quality: A Common Sense Guide to

Accreditation and Accountability in Higher Education she provides a simple, straightforward model for understanding and meeting the calls for increased quality in higher education ever-present in today's culture. Whether your institution is seeking accreditation or not, the five dimensions she outlines will help you to identify ways to improve institutional quality and demonstrate that quality to constituents. For those wading through the accreditation process, which has become more difficult in recent years due to increasing regulation and pressure for greater accountability, Suskie offers expert guidance on understanding the underlying principles of the expectations of accrediting bodies. Using the model presented here, which is much easier to understand than the sometimes complex resources provided by individual accrediting bodies, American colleges and universities can understand what they need to do to earn and maintain their regional accreditation as well as improve overall institutional quality for their students. You'll be able to: Identify ways to improve institutional quality Demonstrate the quality of your institution to internal and external constituents Avoid wasting time and energy on misguided institutional processes to comply with accreditation requirements By focusing on why colleges and universities should take particular

actions rather than only on what those actions should be, Five Dimensions of Quality gives them the knowledge and strategies to prepare for a successful review. It is an ideal resource for leaders, accreditation committee members, and everyone on campus.

Byrd Baylor's text captures and shares some of the special experiences in the Southwest desert country that have inaugurated her private celebrations: The Time of Falling Stars, in the middle of August, when "every time a streak of light goes shooting through the darkness, I feel my heart shoot out of me"; Rainbow Celebration Day, marking the time she and a jackrabbit stood together watching a triple-rainbow over a canyon; and the real New Year's Day (January first is "just another winter day"), the day spring begins. "I celebrate with horned toads and ravens and lizards and quail...And, Friend, it's not a bad party."

This book offers an easy-to-follow set of writing principles. For example, use active verbs whenever possible, favour concrete language over vague abstractions, avoid long strings of prepositional phrases, employ adjectives and adverbs only when they contribute something new to the meaning of a sentence and reduce your dependence on the "waste words": 'it', 'this', 'that' and 'there'. The author also shows these rules in action through examples from famous authors such as Shakespeare and Emily Dickinson. The book includes a test to help you assess your own writing and get advice on problem areas.

An instant New York Times bestseller. Over 1 million copies sold! Two spiritual giants. Five days. One timeless question. Nobel Peace Prize Laureates His Holiness the Dalai Lama and Archbishop Desmond Tutu have survived more than fifty years of exile and the soul-crushing violence of oppression. Despite their hardships—or, as they would say, because of them—they are two of the most joyful people on the planet. In April 2015, Archbishop Tutu traveled to the Dalai Lama's home in Dharamsala, India, to celebrate His Holiness's eightieth birthday and to create what they hoped would be a gift for others. They looked back on their long lives to answer a single burning question: How do we find joy in the face of life's inevitable suffering? They traded intimate stories, teased each other continually, and shared their spiritual practices. By the end of a week filled with laughter and punctuated with tears, these two global heroes had stared into the abyss and despair of our time and revealed how to live a life brimming with joy. This book offers us a rare opportunity

to experience their astonishing and unprecedented week together, from the first embrace to the final good-bye. We get to listen as they explore the Nature of True Joy and confront each of the Obstacles of Joy—from fear, stress, and anger to grief, illness, and death. They then offer us the Eight Pillars of Joy, which provide the foundation for lasting happiness. Throughout, they include stories, wisdom, and science. Finally, they share their daily Joy Practices that anchor their own emotional and spiritual lives. The Archbishop has never claimed sainthood, and the Dalai Lama considers himself a simple monk. In this unique collaboration, they offer us the reflection of real lives filled with pain and turmoil in the midst of which they have been able to discover a level of peace, of courage, and of joy to which we can all aspire in our own lives.

Design Thinking, a method widely used in design business and management, has changed the landscape of contemporary design. Whereas in the past non-designers were called upon to serve as external consultants ad-hoc, in an effort to promote creativity and innovation most design teams now consist of a mix of designers and other professionals. The impact of this development on the design landscape in recent years is so far without thorough investigation and analysis of its various influences. This book comprises an edited collection of selected papers from the 13th Design Thinking Research Symposium (DTRS13) which offers an exploration of Design Thinking from theoretical, practical, and pedagogical perspectives as well as critical analysis of the design process. The book is arranged in five parts as follows: Part 1: Thinking about design Part 2: Design thinking in the studio Part 3: Design thinking in practice and professional training Part 4: Design teams of diverse backgrounds, Interdisciplinary projects Part 5: Design and nature; visual representation Providing a comprehensive source for new perspectives on design and Design Thinking, *Expanding the Frontiers of Design* is ideal for designers and design academics of all disciplines wishing to strengthen and innovate their practice, as well as industry leaders who seek to consolidate their business strategies and evolve their work.

In an increasingly scientific and technological world the need for a knowledgeable citizenry, individuals who understand the fundamentals of technological ideas and think critically about these issues, has never been greater. There is growing appreciation across the broader education

community that educational three dimensional virtual learning environments are part of the daily lives of citizens, not only regularly occurring in schools and in after-school programs, but also in informal settings like museums, science centers, zoos and aquariums, at home with family, in the workplace, during leisure time when children and adults participate in community-based activities. This blurring of the boundaries of where, when, why, how and with whom people learn, along with better understandings of learning as a personally constructed, life-long process of making meaning

and shaping identity, has initiated a growing awareness in the field that the questions and frameworks guiding assessing these environments should be reconsidered in light of these new realities. The audience for this book will be researchers working in the Serious Games arena along with distance education instructors and administrators and students on the cutting edge of assessment in computer generated environments.
