 Praise for *How Learning Works* "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning."

—Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, *Tools for Teaching* "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching."
 —Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with

concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues." —Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you in this organized and readable book." —From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, *e-Learning and the Science of Instruction*; and author, *Multimedia Learning*

The Missionaries Simon and Schuster
 "You're hooked, you feel every cut, grope up every cliff, swallow water with every spill of the canoe, sweat with every draw of the bowstring. Wholly absorbing [and] dramatic."—Harper's Magazine The setting is the Georgia wilderness, where the states most remote white-water river awaits. In the thundering froth of that river, in its echoing stone canyons, four men on a canoe trip discover a freedom and exhilaration beyond compare. And then, in a moment of horror, the adventure turns into a struggle for survival as one man becomes a human hunter who is offered his own harrowing deliverance. Praise for Deliverance "Once read, never forgotten."—Newport News Daily Press "A tour de force . . . How a man acts when shot by an arrow, what it feels like to scale a cliff or to capsize, the ironic psychology of fear: these things are conveyed with remarkable descriptive writing."—The New Republic "Freshly and intensely alive . . . with questions that haunt modern urban man."—Southern Review "A fine and honest book that hits the reader's mind with the sting of a baseball just caught in the hand."—The Nation "[James Dickey's] language has descriptive power not often matched in contemporary American writing."—Time "A harrowing trip few readers will forget."—Asheville Citizen-Times "A novel that will curl your toes . . . Dickey's canoe rides to the limits of dramatic tension."—New York Times Book Review "A brilliant and breathtaking adventure."—The New Yorker

'The Great Game' (also referred to as the Tournament of Shadows) is a term used to describe the political and diplomatic confrontation that existed during most of the 19th Century between the British Empire and the Russian Empire centered around Afghanistan and its surrounding regions. The classic Great Game period is generally regarded as running approximately from the Russo-Persian Treaty of 1813 to the Anglo-Russian Convention of 1907, in which nations like the Emirate of Bukhara fell. Alexander Burnes was a British adventurer and employee of the East India Company during this turbulent era. He spoke Hindi and Persian and was nicknamed Bokhara Burnes for his role in establishing contact with and exploring Bukhara, which made his name. He was rumored to be a spy during the first Afghan War and was knighted by Queen Victoria for his clandestine services during the conflict. Burnes kept a lively, detailed record of his trail-blazing journey across Afghanistan, Uzbekistan, the Indian sub-continent and beyond which he later published in three volumes to great acclaim, entitled *Travels into Bokhara - A Voyage up the Indus to Lahore and a Journey to Cabool, Tartary & Persia*. This is Volume One.

The Ship that Flew Simon and Schuster

A child is kidnapped with consequences that extend across worlds... A writer reaches into the past to discover the truth about a possible murder... Far away a young woman prepares for her mysterious future... In a future scarred by fracking and ecological collapse, Jenna Hoolman's world is dominated by illegal smartdog racing: greyhounds genetically modified with human DNA. When her young niece goes missing that world implodes... Christy's life is dominated by fear of her brother, a man she knows capable of monstrous acts and suspects of hiding even darker ones. Desperate to learn the truth she contacts Alex, who has his own demons to fight... And Maree, a young woman undertaking a journey that will change her world forever.
