Trading Away from Conflict Law Business Research Ltd.

This book provides a unique explanation of why Angola and Nigeria—Africa’s two largest oil-producing nations—have experienced different political and economic outcomes since attaining independence. It explains why Asian-led oil-for-infrastructure deals materialised in Angola but failed in Nigeria between 2004 and 2007. One hypothesis of the natural resource curse is that resource wealth leads to underdevelopment because it entrenches autocracy, but that fails to explain the different political economy outcomes in Angola and Nigeria, which were both predominantly autocratic post-independence. The book reveals, through the application of a game-theoretic model, that Angola’s José Eduardo dos Santos successfully used the country’s oil wealth to consolidate power early in his reign by eliminating potential threats to his dictatorial ambitions. He ruled for 38 years, and thus represented one of Africa’s longest autocracies, but was eventually upended by his own ruling party—an unusual outcome. By contrast, no Nigerian leader attained the same level of consolidation over oil or power. Perennial contestation for power—through multiple successful military coups—resulted in an uneven evolution towards a more open and competitive political settlement. The findings of this book will deepen the reader’s understanding of the resource curse and illuminate the importance of tailoring governance solutions to reflect the specificities of any resource-wealthy context.

Oil and Governance Nova Science Publishers

This volume is an authoritative and agenda-setting examination of Nigerian politics.

The Future of Natural Gas Kraft Books

National oil companies (NOCs) play an important role in the world economy. They produce most of the world's oil and bankroll governments across the globe. This book explains the variation in performance and strategy for NOCs and provides fresh insights into the future of the oil industry.

World Energy Outlook 2008 Ezekiel Press

This book offers a thematic study of key debates in the history of the ethnic politics, democratic governance, and minority rights in Nigeria. Nigeria provides a framework for examining the central paradox in post-colonial nation building projects in Africa – the tension between majority rule and minority rights. The liberal democratic model on which most African states were founded at independence from colonial rule, and to which they continue to aspire, is founded on majority rule. It is also founded on the protection of the rights of minority groups to political participation, social inclusion and economic resources. Maintaining this tenuous balance between majority rule and minority rights has, in the decades since independence, become the key national question in many African countries, perhaps none more so than Nigeria. This volume explores these issues, focusing on four key themes as they relate to minority rights in Nigeria: ethnic and religious identities, nationalism and federalism, political crises and armed conflicts.

Oil in Nigeria SBPD Publications

About the book: I'm 9... and heir to a fortune. This is the story of how I made my parents rich - very rich. He was 4 - a bright and boisterous boy - when he arrived at an original idea. It all began when he wanted many more of something he really liked, to share. He overheard adults talk about how to multiply things and, immediately, dug into action - well ahead of everybody. When hard times came calling on the Tobe family, their son seemed to have buried - with his dream of "many more" - their only hope for the rainy day. Now 9, he sets out to piece together the story - with the help of his parents and the other adults - a full half decade later. Meet, here, the unlikely hero - Banji - at his bragging best: "I promise: When you come to the end of the tale you will say, 'What a timely story!'" Happily for all, Banji's folly at four and the fortunate future that followed for his family are two very different things.

International Arbitration Review Cambridge University Press

The International Arbitration Review, edited by James H Carter of Wilmer Cutler Pickering Hale and Dorr, provides an analytical review of what has occurred in each of the important arbitration jurisdictions during the past year, capturing recent developments

and putting them in the context of the jurisdiction's legal arbitration structure and selecting the most important matters for comment. In this book, leading practitioners seek to provide current information on both general international commercial arbitration and international investment arbitration, treating important investor-state dispute developments in each jurisdiction as a separate but closely related topic. There are in-depth examinations of arbitration in 41 jurisdictions as well as editorial chapters on The Impact of Corporate Taxation on Economic Losses, and overviews on ASEAN and Africa. Contributors include: Bart Legum, Michelle Bradfield and Jean-Christophe Honlet, Dentons; James Nicholson, FTI Consulting."e;This new and timely publication promises to tackle pressing and present day global concerns and to make valuable contributions to the ongoing dialogue on international arbitration"e; - Peter Tomka, President, International Court of Justice, The Hague"e;Comprehensive and topical, an excellent reference."e; - Professor Christine Mallin, University of Birmingham Business School"e;The most discursive and engaging survey of the world of arbitration today."e; - Jamie Maples, Weil Gotshal & Manges LLP

Recognition and Enforcement of Foreign Arbitral Awards SBPD Publications

In March 2015, President Goodluck Ebele Jonathan made one of those courageous and insightful decisions when he stepped forward to acknowledge he had lost his re-election bid. Through that single stroke, President Jonathan raised the bar on office holders in his country and across Africa. This publication is a compilation of President Goodluck Jonathan's leadership prowess at the helm. It is also a vivid testimony of yet another real life lesson to office holders across this continent of budding democracies-there is life after state House! -Dr. CHRISTOPHER FOMUNUNYOH, Senior Associate for Africa, National Democratic Institute (NDI), USA

The Rise of Digital Repression Oxford Business Group

Model Predictive Control of Wind Energy Conversion Systems addresses the predicative control strategy that has emerged as a promising digital control tool within the field of power electronics,

variable-speed motor drives, and energy conversion systems. The authors provide a comprehensive analysis on the model predictive control of power converters employed in a wide variety of variable-speed wind energy conversion systems (WECS). The contents of this book includes an overview of wind energy system configurations, power converters for variable-speed WECS, digital control techniques, MPC, modeling of power converters and wind generators for MPC design. Other topics include the mapping of continuous-time models to discrete-time models by various exact, approximate, and quasi-exact discretization methods, modeling and control of wind turbine grid-side two-level and multilevel voltage source converters. The authors also focus on the MPC of several power converter configurations for full variable-speed permanent magnet synchronous generator based WECS, squirrel-cage induction generator based WECS, and semi-variable-speed doubly fed induction generator based WECS. Furthermore, this book: Analyzes a wide variety of practical WECS, illustrating important concepts with case studies, simulations, and experimental results Provides a step-by-step design procedure for the development of predictive control schemes for various WECS configurations Describes continuous- and discrete-time modeling of wind generators and power converters, weighting factor selection, discretization methods, and extrapolation techniques Presents useful material for other power electronic applications such as variable-speed motor drives, power quality conditioners, electric vehicles, photovoltaic energy systems, distributed generation, and high-voltage direct current transmission. Explores S-Function Builder programming in MATLAB environment to implement various MPC strategies through the companion website Reflecting the latest technologies in the field, Model Predictive Control of Wind Energy Conversion Systems is a valuable reference for academic researchers, practicing engineers, and other professionals. It can also be used as a textbook for graduate-level and advanced undergraduate courses.

Nigeria United Nations

The New York Convention has served as the cornerstone of the international arbitration system since its signature in 1958 until the present day. The Guide on the New York Convention provides an insight on the application of the Convention by State courts. It was initiated in 2010 when UNCITRAL commissioned the

assistance of Professors Gaillard and Bermann as part of its efforts to promote wider adherence to the text of the New York Convention as well as its uniform interpretation and effective implementation. The interpretation that derives from court decisions of diverse jurisdictions makes the Guide a unique tool to understand the New York Convention, an almost universally adopted text, and to monitor its application. This guide is mainly designed for legal practitioners.

The S.T.A.B.L.E. Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. S.T.A.B.L.E. stands for the 6 assessment parameters covered in the program: Sugar, Temperature, Airway, Blood pressure, Lab work, and Emotional support for the family. The S.T.A.B.L.E. Program is designed to provide important information about neonatal stabilization for maternal/infant healthcare providers in all settings - from community hospitals and birth centers, to emergency rooms and hospital environments.

Call Me by My Rightful Name OECD Publishing

The Nigerian telecommunications industry has continued to grow in a phenomenal manner following market liberalization reforms that commenced in the 1990s. As of 2017, the telecommunications industry was one of the fastest-growing economic sectors in Nigeria and the fourth largest contributor to the country's Gross Domestic Product. The telecommunications industry, however, remains a highly technical and naturally dynamic industry that has not been a usual area for legal research in developing countries such as Nigeria. This book bridges that gap in knowledge by providing an analysis of the legal and policy instruments that regulate the industry. It comprises eleven chapters that discuss the historical evolution of telecommunications and its regulation; the development of the Nigerian telecommunications industry from 1886 to 2017; the legal basis for the regulation of the industry; the licensing and duties of service providers; the regulation of network infrastructure; the protection of consumers; the regulation of

competition, interconnection, universal access, and environmental protection; and the resolution of industry disputes. This book will be useful to policy makers, legislators, regulators, lawyers, law students, investors, operators, and consumers, as well as any person interested in the Nigerian telecommunications industry.

Power Grab Manila Publishers Company

Energy subsidies have wide-ranging economic consequences. Although they are aimed at protecting consumers, subsidies aggravate fiscal imbalances, crowd out priority public spending, and depress private investment, including in the energy sector. Subsidies also distort resource allocation by encouraging excessive energy consumption, artificially promoting capital-intensive industries, reducing incentives for investment in renewable energy, and accelerating the depletion of natural resources. Most subsidy benefits are captured by higher-income households, reinforcing inequality. Even future generations are affected through the damaging effects of increased energy consumption on global warming. This book provides (1) the most comprehensive estimates of energy subsidies currently available for 176 countries and (2) an analysis of "how to do" energy subsidy reform, drawing on insights from 22 country case studies undertaken by the IMF staff and analyses carried out by other institutions.

New Voices and New Perspectives in International Economic Law American Academy of Pediatrics

Violent conflict weakens governance, undermines economic development and threatens both national and regional stability. Trade shocks can also have stark impact on conflict. This book sets out to empirically test these linkages between trade shocks and conflict via cross-country and intra-country analysis.

The Report: Nigeria 2016 Cambridge Scholars Publishing

This book presents a comprehensive review of renewable energy sources, the environment and sustainable development. This includes all the renewable energy technologies, materials and their development, energy efficiency systems, energy conservation scenarios, energy savings and other mitigation measures necessary to reduce climate change. Also explored in

this volume is ocean energy, its benefits and barriers and solar radiation as a primary daytime source of energy. Various scenarios are extrapolated in order to assess the potential environmental impact of increasing world population and consumption throughout the 21st century and a general overview of the world-wide trend in fossil fuels.

Modular Multilevel Converters Springer Nature

Despite concerns linked to short-term and cyclical risks, including unequal development, policy uncertainty, declining oil prices and localised unrest, the longer-term growth fundamentals are clear. Following the presidential elections in March 2015, the newly elected government of President Muhammadu Buhari will face a host of challenges, ranging from high levels of rural poverty to concerns over governance and an insurgency in the north. The outcome of the presidential elections gave Nigeria its first peaceful handover of power in more than 16 years, as well as a boost of momentum that, along with its economic fundamentals, places it on the cusp of potentially long-term, broad-based growth.

The Missing Clock Ubiquity Press

The Heresiad by Ikeogu Oke was the 2017 winner of The Nigeria Prize for Literature. The poet employs the epic form in questioning power and freedom and probes metaphorically the inner workings of societies and those who shape them. The book speaks to an intense commitment to innovation, tenacity, joyful experimentation and social commentary in a way that provokes delight and engagement.

Iredi War John Wiley & Sons

Commodity trading presents specific and heightened risks of corruption due to the large amount of money involved in commodity trading transactions, which are source of important revenues for developing countries, and due to the sophisticated mechanisms used to channel corrupt payments.
