Hermann Hesse Farrar, Straus and
Giroux

Few American readers seem to be aware that Hermann Hesse, author of the epic novels *Steppenwolf* and *Siddhartha*, among many others, also wrote poetry, the best of which the poet James Wright has translated and included in this book. This is a special volume—filled with short, direct poems about love, death, loneliness, the seasons—that is imbued with some of the imagery and feeling of Hesse's novels but that has a clarity and

resonance all its own, a sense of longing for love and for home that is both deceptively simple and deeply moving.

Rosshalde Simon and Schuster
Winner of the 2023 PROSE Award for Excellence in Biological and Life Sciences and the 2023 Chautauqua Prize! Named a New York Times Notable Book and a Best Book of the Year by The Economist, Oprah Daily, BookPage, Book Riot, the New York Public Library, and more! In *The Song of the Cell*, the extraordinary author of the Pulitzer Prize-winning *The Emperor of All Maladies* and the #1 New York Times bestseller *The Gene* “blends cutting-edge research, impeccable scholarship, intrepid reporting, and

gorgeous prose into an encyclopedic study that reads like a literary page-turner” (Oprah Daily). Mukherjee begins this magnificent story in the late 1600s, when a distinguished English polymath, Robert Hooke, and an eccentric Dutch cloth-merchant, Antonie van Leeuwenhoek looked down their handmade microscopes. What they saw introduced a radical concept that swept through biology and medicine, touching virtually every aspect of the two sciences, and altering both forever. It was the fact that complex living organisms are assemblages of tiny, self-contained, self-regulating units. Our organs, our physiology, our selves—hearts, blood, brains—are built from these compartments. Hooke christened them “cells.” The discovery of

cells—and the reframing of the human body as a cellular ecosystem—announced the birth of a new kind of medicine based on the therapeutic manipulations of cells. A hip fracture, a cardiac arrest, Alzheimer’s dementia, AIDS, pneumonia, lung cancer, kidney failure, arthritis, COVID pneumonia—all could be reconceived as the results of cells, or systems of cells, functioning abnormally. And all could be perceived as loci of cellular therapies. Filled with writing so vivid, lucid, and suspenseful that complex science becomes thrilling, *The Song of the Cell* tells the story of how scientists discovered cells, began to understand them, and are now using that knowledge to create new humans. Told in six parts, and laced with Mukherjee’s own

experience as a researcher, a doctor, and a prolific reader, *The Song of the Cell* is both panoramic and intimate—a masterpiece on what it means to be human. “In an account both lyrical and capacious, Mukherjee takes us through an evolution of human understanding: from the seventeenth-century discovery that humans are made up of cells to our cutting-edge technologies for manipulating and deploying cells for therapeutic purposes” (The New Yorker).

 The stories Hesse tells appeal to young people, because they keep faith with the powerful emotions of adolescence, which most adults forget or outgrow. As a young middle class boy Emil Sinclair has trouble knowing what is or what should be. Throughout this novel he is

constantly seeking validation as well as mentorship. As Emil struggles a childhood friend begins to mentor him and is said to be his daimon. In ancient greek daimon is a person's deity or guiding spirit. In his story Emil's parents are a symbol of safety and fallback as his friend helps lead him to self realization.

The #1 NEW YORK TIMES Bestseller The basis for the PBS Ken Burns Documentary *The Gene: An Intimate History* Now includes an excerpt from Siddhartha Mukherjee's new book *Song of the Cell!* From the Pulitzer Prize-winning author of *The Emperor of All Maladies*—a fascinating history of the gene and “a magisterial account of how

human minds have laboriously, ingeniously picked apart what makes us tick” (Elle). “Sid Mukherjee has the uncanny ability to bring together science, history, and the future in a way that is understandable and riveting, guiding us through both time and the mystery of life itself.” —Ken Burns “Dr. Siddhartha Mukherjee dazzled readers with his Pulitzer Prize-winning *The Emperor of All Maladies* in 2010. That achievement was evidently just a warm-up for his virtuoso performance in *The Gene: An Intimate History*, in which he braids science, history, and memoir into an epic with all the range and biblical thunder of *Paradise Lost*” (The New York Times). In this biography Mukherjee brings to life the quest to understand human heredity and its surprising

influence on our lives, personalities, identities, fates, and choices. “Mukherjee expresses abstract intellectual ideas through emotional stories...[and] swaddles his medical rigor with rhapsodic tenderness, surprising vulnerability, and occasional flashes of pure poetry” (The Washington Post). Throughout, the story of Mukherjee’s own family—with its tragic and bewildering history of mental illness—reminds us of the questions that hang over our ability to translate the science of genetics from the laboratory to the real world. In riveting and dramatic prose, he describes the centuries of research and experimentation—from Aristotle and Pythagoras to Mendel and Darwin, from Boveri and Morgan to Crick, Watson and

Franklin, all the way through the revolutionary twenty-first century innovators who mapped the human genome. “A fascinating and often sobering history of how humans came to understand the roles of genes in making us who we are—and what our manipulation of those genes might mean for our future” (Milwaukee Journal-Sentinel), *The Gene* is the revelatory and magisterial history of a scientific idea coming to life, the most crucial science of our time, intimately explained by a master. “The Gene is a book we all should read” (USA TODAY).

Twenty-three stories arranged in chronological order that are primarily concerned with the authors own secret.

Lame Deer, Seeker of Visions Macmillan
Lame Deer Storyteller, rebel, medicine man, Lame Deer was born almost a century ago on the Rosebud Reservation in South Dakota. A full-blooded Sioux, he was many things in the white man's world -- rodeo clown, painter, prisoner. But, above all, he was a holy man of the Lakota tribe. Seeker of Vision The story he tells is one of harsh youth and reckless manhood, shotgun marriage and divorce, history and folklore as rich today as ever -- and of his fierce struggle to keep pride alive, though living as a stranger in his own ancestral land.

From the author of the universally acclaimed debut novel *A Case of Exploding Mangoes*: a subversive, often shockingly funny new novel set in

steaming Karachi, about second chances, thwarted ambitions, and love in the most unlikely places. The patients of the Sacred Heart Hospital for All Ailments need a miracle, and Alice Bhatti may be just what they're looking for. She's the new junior nurse, but that's the only thing ordinary about her. Her father is a part-time healer in the French Colony, Karachi's Christian slum--and it seems she has inherited his part-time gift. With a bit of begrudging but inspired improvisation, Alice brings succour to the patients lining the hospital's corridors. Yet, a Christian in an Islamic world, she is ensnared in the red tape of hospital bureaucracy, trapped by the caste system, and torn between her duty to her patients, her father, and her husband--an apprentice to the nefarious

"Gentlemen's Squad" of the police, and about to plunge them both into a situation so dangerous that perhaps not even a miracle can save them. But, of course, Alice Bhatti is no ordinary nurse...

Hermann Hesse was a rite of passage must read writer in the counter culture in North America in the 1960s-1970s.

The passing away of the counter culture meant, in many ways, Hesse's identification with it seemed to ensure his demise. But, was Hesse misread and misinterpreted, thinned out to pander to the reactionary tendencies of significant aspects of the counter culture? This book will argue that there is much more to the nuanced and subtle Hesse than has been mined thus far, and, equally important, in the last decade there has been a sophisticated renewal of Hesse's renaissance and humanist breadth and depth, hence the title of this book, Hermann Hesse: Phoenix Arising. *Siddhartha, Demian, and Other Writings: Hermann Hesse* Infobase Publishing This Deluxe Edition, beautifully designed to be collected and given as a gift to your loved ones, includes: * the

Wandering Shambhala Publications
In the spring of 1922, several months after completing *Siddhartha*, Hermann Hesse wrote a fairy tale that was also a love story, inspired by the woman who was to become his second wife. That story, *Pictor's Metamorphoses*, is the centerpiece of this anthology of Hesse's luminous short fiction. Based on *The Arabian Nights* and the work of the Brothers Grimm, the nineteen stories

collected here represent a half century of Hesse's short writings. They display the full range of Hesse's lifetime fascination with fantasy--as dream, fairy tale, satire, or allegory.

Living Happiness Teach Yourself

Siddhartha (first published in 1922) is a novel based on the early life of Buddha, inspired by the author's visit to India before the First World War. The novel is about the young Brahmin *Siddhartha's* search for self- realization. His quest takes him from a life of decadence to asceticism, from the illusory joys of sensual love with a beautiful courtesan, and of wealth and fame, to the painful struggles with his son and the ultimate wisdom of renunciation
